

A HANDLIST OF THE WRITINGS OF SIR ROBERT HUTCHISON

COMPILED BY ALFRED WHITE FRANKLIN

Sir Robert Hutchison has written and lectured and published books*, some in the best-seller class, for over 50 years. After working in chemistry and physiology and making some interesting researches into the thyroid gland, his arrival in London and in clinical medicine gave him the opportunity for which his qualities best suited him—of teaching. From the days in 1896 when in the residents' quarters in The Hospital for Sick Children, Great Ormond Street, he planned and executed with Harry Rainy their 'Clinical Methods' the place of teaching grew in his thoughts and in his life. He has taught by the spoken and the written word, students, undergraduates, and postgraduates, practising doctors in their local medical societies, and, in unobtrusive fashion, the public. He has taught his consultant colleagues by making them write in his 'Index of Treatment'. Many of his published articles and some of his best books are in lecture form. They hold no smell of the lamp, but they have style. He could speak and write easily, clearly and with a dry native humour.

He was interested in every new thing, but what was new was always suspect and had to pass stern tests set by a keen and critical mind before being accepted into the body of his teaching knowledge. All new ideas had to give the acceptable password, truth, to this ever alert and common sense sentry. Those who read recorded in these writings how he received a half a century of innovations will learn to respect his shrewd, sound, judgment, intelligent, balanced, well-informed, and accurate.

To the reader of the future a study of these writings will reveal a man cast in a large mould, conservative yet forward looking, keeping his own yard-stick and his own integrity in a world of changing values, more interested, perhaps, in the doctor than the patient. Such a reader will find few words addressed to him, for Sir Robert Hutchison laboured for his fellows, albeit two whole generations of them. It was to them that he spoke more than to posterity.

* Some items have certainly been omitted, but it is hoped that none are important. Translations of books or papers have not been included.

BOOKS

- 1. Clinical Methods. A Guide to the Practical Study of Medicine.** With Harry Rainy.
1897. London: Cassell & Co. Pp. xii, 552.
Of this best-seller R.H. continued to be the main author. He was joined by D. Hunter in 1935 for the tenth edition and by R. R. Bomford for the twelfth in 1949. This work, of which there have been 45 impressions, has been for many years the working manual of every British medical student.
- 2. Food and the Principles of Dietetics.**
1900. London: Edward Arnold.
For the eighth edition (1936) V. H. Mottram joined R.H. The ninth edition (1940) was revised by V.H.M. and George Graham. This was the twenty-fifth printing of the work, which is being continued as Hutchison's *Food and the Principles of Dietetics*.
- 3. Patent Foods and Patent Medicines.** Two lectures.
1904. London: John Bale, Sons and Danielsson.
1906. Second edition.
A reprint in book form of articles 32 and 43.
- 4. Lectures on Diseases of Children.**
1904. London: Edward Arnold. Pp. xii, 338.
Seven editions were published by R.H., the seventh in 1936. In 1940 and in 1945 the lectures were edited by A. A. Moncrieff, but much of the

- matter remains unchanged. The lectures were first delivered at the London Hospital and published in the *Clinical Journal* (see no. 38).
- 5. An Index of Treatment, by Various Writers.**
Edited by R. H. and H. Stansfield Collier, F.R.C.S. 1907. Bristol: John Wright and Co. London: Simkin, Marshall, Hamilton, Kent and Co. New York: William Wood and Co. Pp. xiii, 877.
R.H. wrote 20 articles in the first edition. In all there have been 13 editions and 17 printings of this book. The 12th (1940) and the 13th (1948) were edited by R.H. assisted by R. Hilton.
- 6. Applied Physiology. A Handbook for Students of Medicine.**
1908. London: Edward Arnold. Pp. xii, 298.
1909. Second impression.
- 7. Lectures on Dyspepsia.**
1925. London: Edward Arnold. Pp. 176.
1927. Second edition.
- 8. The Elements of Medical Treatment.**
1926. Bristol: John Wright. Pp. vi, 163.
1932. Second edition.
1937. Third edition.
1945. Fourth edition.
These were routine lectures on therapeutics to The London Hospital medical students.

9. **Some Principles of Diagnosis, Prognosis and Treatment A Trilogy.**
1928. Bristol: John Wright. Pp. 3, 54.
1937. Second edition.
These appeared as separate articles (see no. 185, 193).
 10. **Harvey, The Man, His Method and His Message for us Today.**
The Harveian Oration for 1931. Oxford: Clarendon Press. Pp. 26. (See also no. 219.)
 11. **For and Against Doctors An Anthology.**
Compiled by R.H. and G. M. Wachope. 1935. London: Edward Arnold. Pp. 168.
 12. **Presidential Address: Royal College of Physicians. 1939.**
 13. **Presidential Address: Royal College of Physicians. 1940.**
 14. **Presidential Address: Royal College of Physicians. 1941.**
