

Monatsschrift für Kinder— heilkunde

Organ der Deutschen Gesellschaft für Kinderheilkunde

124. Band · Heft 6 · Juni 1976

Originalien

- F. Majewski, J. Spranger Über einen neuen Typ des primordialen Minderwuchses: Der brachymele primordiale Minderwuchs (A New [Brachymelic] Type of Primordial Dwarfism) 499
- P. Emmrich Die transkutane Sauerstoffpartialdruckmessung in der Pädiatrie (Transcutaneous Oxygen Tension Measurement in Pediatrics) 504
- E. Straub, K. Stockamp „Urologisch bedingte“ Pyelonephritis: Verlauf unter medikamentöser Therapie nach operativer Behandlung der kongenitalen Harnwegsfehlbildung. Langzeitbeobachtungen an 398 kinderurologischen Fällen aus fünf Jahrgängen (Pyelonephritis in Patients with Congenital Malformations of the Urinary Tract After Corrective Operation and Under Antibiotic Therapy) 511
- I. Greinacher, P. Gutjahr Tumorbedingte Veränderungen im Röntgenbild der kindlichen Wirbelsäule (Tumor-related Radiographic Changes of the Vertebral Column in Childhood) 519

Fortbildung und Praxis

Übersichten

- K. Winkler Paraneoplastische Symptome bei Neuroblastom (Paraneoplastic Symptoms of Neuroblastoma) 527
- F. Graser Hyperpyrexie und Schock (Hyperpyrexia and Shock) 533

Kasuistik

- B.-K. Jüngst, J. Spranger Bollonierende Mitralklappe bei Tricho-rhino-phalangealem Syndrom I (Ballooning Mitral Valve in Tricho-rhino-phalangeal Syndrome I) 538
- F. K. Friederiszick Professor Dr. med. Ulrich Köttgen zum 70. Geburtstag 542

PEDIATRIC RESEARCH

Volume 10, No. 5

August 1976

Contents

- Genetics and Etiology of Childhood Cancer** 513
 A. G. KNUDSON, JR. (Houston, Texas) The heritable forms of childhood malignancies are reviewed and a mutation model of childhood cancers is presented.
- The Role of Cellular Immunity in Neoplasia** 517
 P. R. GLADE, N. M. ZALDIVAR, L. MAYER, AND L. T. CAHILL (Miami, Florida and New York, New York) The surveillance function of the immune system is reviewed in this article with emphasis on the role of cell-mediated immunity.
- Electrolyte Abnormalities in Very Low Birthweight Infants** 522
 C. M. DAY, I. C. RADDE, J. W. BALFE, AND G. W. CHANCE (Toronto, Ontario, Canada) Electrolyte changes in healthy very low birthweight infants are reported together with possible contributory factors.
- Late Hyponatremia in Very Low Birthweight Infants (<1.3 Kilograms)** 526
 R. N. ROY, G. W. CHANCE, I. C. RADDE, D. E. HILL, D. M. WILLIS, AND J. SHEEPERS (Toronto, Ontario, Canada) In an effort to determine the nutritional requirements of the very low birthweight infant, the effect of different feed volumes and Na⁺ and caloric intakes was measured on plasma and urinary electrolytes and on body fluid compartments.
- The Effect of Spermidine and Spermine on Proliferation *in Vitro* of Fibroblasts from Normal and Cystic Fibrosis Patients** 531
 W. A. GAHL, J. E. CHANGUS, AND H. C. PITOT (Madison, Wisconsin) The toxic effects of polyamines on cultured cystic fibrosis fibroblasts were compared with normal cell strains.
- Ketonemia and Seizures: Metabolic and Anticonvulsant Effects of Two Ketogenic Diets in Childhood Epilepsy** 536
 P. R. HUTTENLOCHER (Chicago, Illinois) Metabolic effects of a ketogenic regime in which ketonemia is induced by the feeding of a medium chain triglyceride diet are compared with those of the standard high fat ketogenic diet.
- Cholesterol Metabolism in Cultured Fibroblasts in Adrenoleukodystrophy** 540
 E. YAVIN, A. MILUNSKY, G. R. DE LONG, A. H. NASH, AND E. H. KOLODNY (Waltham and Boston, Massachusetts) The authors are unable to demonstrate any abnormal kinetics of cholesterol metabolism in cultured skin fibroblasts from patients with adrenoleukodystrophy.
- Methionine Adenosyltransferase and Transmethylation in Fetal and Neonatal Lung of the Human, Monkey, and Rabbit** 545
 H. J. STERNOWSKY, N. C. R. RÄIHÄ, AND G. GAULL (Staten Island and New York, New York, Helsinki, Finland) The activity of some of the enzymes of the methionine cycle and transsulfuration was examined at times of increased need for methylation.
- Type I Hyperprolinemia: A Study of the Intestinal Absorption of Proline, Hydroxyproline, and Glycine** 550
 J. P. FARRIAUX AND J. L. DHONDT (Lille, France) The levels of intestinal absorption of iminoacids and glycine were studied in a patient with type I hyperprolinemia and in six control subjects.
- Intracellular Deoxyribonucleic Acid-modifying Activity of Phototherapy Lights** 553
 W. T. SPECK AND H. S. ROSENKRANZ (New York, New York) Structural changes were demonstrated in the DNA isolated from human cells growing in culture after exposure to high intensity illumination in the absence of added photosensitizers.

ARCHIVES OF DISEASE IN CHILDHOOD on MICROFICHE

Since January 1976, Archives of Disease in Childhood has been published in a microfiche edition simultaneously with the standard paper edition. Overseas subscribers to the microfiche edition will receive microfiches, by AIR MAIL, within days of publication. The availability of the microfiche edition should have great appeal to libraries and other readers far distant from the United Kingdom.

The microfiche produced for the British Medical Association conform to the international standard as laid down by the National Microfilm Association of America. These microfiches are produced by a step and repeat camera with duplicates produced on silver halide film for archival permanence. Each fiche measures 105 mm × 148 mm and can contain up to 98 images filmed at a reduction ratio of 24 × along with an eye readable title for identification. Details of microfiche volume binders are available on request.

The subscription prices for each annual volume on microfiche are as follows :

	Inland	Abroad
For subscribers to the paper edition	£13.50	US \$27.00
For those who do not subscribe to the paper edition	£20.25	US \$41.00

Volume 50, 1975 of this journal is also available on microfiche at these rates.

Orders for the microfiche edition of this journal can be sent to :

The Publisher, Archives of Disease in Childhood, B.M.A. House, Tavistock Square, London WC1H 9JR. Readers in the U.S.A. can order from: BRITISH MEDICAL JOURNAL, 1172 Commonwealth Avenue, Boston, Mass. 02134, or through any leading subscription agent

CHARLES C THOMAS • PUBLISHER

NORMAL AND ABNORMAL DEVELOPMENT: The Influence of Primitive Reflexes on Motor Development (2nd Ptg.) by **Mary R. Fiorentino**, *Newington Children's Hospital, Newington, Connecticut*. Foreword by **Myron E. Schafer**. The development of the normal child in contrast to the abnormal development of the cerebral palsied child is discussed at length in this text. Certain reflexes including the Moro, asymmetrical tonic neck, and positive supporting are considered and their effect on the child with cerebral palsy emphasized. An analysis of the influence and persistence of the primitive reflexes on abnormal development is set forth. '76, 80 pp. (6 3/4 x 9 3/4), 91 il., \$7.50

THE PHYSIOLOGY OF THE NEWBORN INFANT (4th Ed.) edited by **Clement A. Smith**, *Harvard Medical School, Boston, Massachusetts*, and **Nicholas M. Nelson**, *Hershey Medical Center, Hershey, Pennsylvania*. (9 Contributors) This completely updated Fourth Edition on neonatal and prenatal physiology provides a foundation for understanding such treatments as the management of hyperbilirubinemia, the prevention of hyaline membrane disease and the approach to neonatal sepsis. The authors not only answer many questions about the human infant, but also suggest additional ones which will direct the development of neonatal physiology. '76, 784 pp. (6 3/4 x 9 3/4), 260 il., 122 tables, \$52.00

SCHOOL HEALTH PROBLEMS edited by **Glenn R. Knotts**, *Kent State Univ., Kent, Ohio*, and **John P. McGovern**, *McGovern Allergy Clinic, Houston, Texas*. (19 Contributors) Health problems which are dominant among children attending school from kindergarten through high school are analyzed in this practical text. Chapters are concerned with such basic health needs as mental and dental health, nutrition, sex and drug addiction, allergies, vision, hearing and safety. '76, 352 pp., 47 il., 17 tables, \$19.75

CHILDREN WITH CONGENITAL INTRACARDIAC DEFECTS: A Pictorial Atlas of Individual Somatic and Neuropsychologic Development Before and After Open Heart Surgery edited by **Leona M. Bayer**, *Institutes of Medical Sciences, San Francisco, California*, and **Marjorie P. Honzik**, *Univ. of California, Berkeley*. (11 Contributors) The physical, mental and behavioral growth patterns of children with congenital intracardiac defects corrected by open heart surgery are presented in this text. Individual case studies are compared against normal children and others with intracardiac lesions. '76, 276 pp. (8 1/2 x 11), 919 il., 4 tables, \$35.75

CLINICAL ECOLOGY edited by **Lawrence D. Dickey**, *Past President, Society for Clinical Ecology*. (45 Contributors) Discussed in this text are the application of avoidance procedures where specific excitants are recognized; the use of hyposensitization, desensitization, immunizing and neutralizing techniques when exposures are unavoidable; domiciliary air pollution; and the improved tolerance that results with avoidance and dietary, nutritional, orthomolecular and immunotherapeutic procedures. '76, 832 pp. (6 3/4 x 9 3/4), 47 il., 94 tables, \$35.75

CHILDREN'S SPATIAL DEVELOPMENT compiled and edited by **John Eliot**, *Univ. of Maryland, College Park*, and **Neil J. Salkind**, *Univ. of Kansas, Lawrence*. (4 Contributors) Written to stimulate interest in problems associated with children's spatial development, this text presents different research orientations, abstractions of experiments involving children's spatial behavior, a status description of genetic studies of spatial behavior, studies of neurological influences, a description of research on the language of space, a discussion of the relation of spatial development to the study of child development, and a comprehensive bibliography. '75, 312 pp., 24 il., 3 tables, \$23.50

A 99.1% chance of success in U.T.I.

The chart above shows the percentage sensitivities of isolates from acute urinary infections against five commonly-used antibacterials. (From an *in-vitro* study involving 173 general practitioners). SEPTRIN was superior to all other oral antibacterials tested, with 99.1% of urinary pathogens sensitive.

SUPPLEMENT TO ANNALS OF THE RHEUMATIC DISEASES VOL. 34, No. 6, 1975

ARTICULAR CARTILAGE

Edited by

G. E. Kempson, A. Maroudas and B. Weightman

CONTENTS

- INTRODUCTION—M. A. R. Freeman and S. V. A. Swanson
- I. STRUCTURE OF ARTICULAR CARTILAGE—*Chairman*, G. Meachim
- II. CHEMISTRY OF THE MATRIX—*Chairman*, H. Muir
- III. METABOLISM—*Chairman*, A. Maroudas
- IV. ENZYMES AND DEGRADATION—*Chairman*, J. T. Dingle
- V-A. FUNCTIONAL PROPERTIES—*Chairman*, L. Sokoloff
- V-B. FUNCTIONAL PROPERTIES—*Chairman*, L. Sokoloff
- VI. PATHOGENESIS OF OSTEROARTHROSIS—
Chairman, M. A. R. Freeman
- CONCLUSIONS OF A WORKING PARTY OF MORBID
ANATOMISTS—P. D. Byers

PRICE: Inland £4.50 Abroad US \$11.25 INCLUDING POSTAGE

Metabolic Aspects of Disease

Treatment of inborn errors has advanced our basic knowledge of disease. Metabolic problems are also a frequent consequence of disease.

Day-time variations in serum phenylalanine (triangles) and tyrosine (circles) in a phenylketonuric child having his first meal as usual at 07.45 hours or fasting until 11.45 hrs. Note the phenylalanine depressing effect of the breakfast (phenylalanine-restricted meal with Albumaid (R) (Güttler, Olesen & Wamberg—Kennedy Institute—Denmark in *Enzymopenic Anaemias, Lysosomes and other papers*, pages 149-158 E. & S. Livingstone.)

PRECISION PRODUCTS:

Designed to meet the metabolic defect are called for.

Products more fundamental than enzymes.

Products more basic than protein.

Products which enable precise nutrition.

Products which succeed where cows' milk is a failure.

PRECISION PRODUCTS FOR:

Phenylketonuria, Homocystinuria, Cystinosis, Maple Syrup Urine Disease, Hyperglycinaemia, Hyperprolinaemia, Arginine Succinic Urea, Histidinaemia, Tyrosinosis, Carbohydrate and Protein Intolerance, Malabsorptions, Cystic Fibrosis, Glycogen Storage Disease.

MILNER SCIENTIFIC AND MEDICAL RESEARCH

Now maintains a world-wide interest in every aspect of metabolism in disease, and products are directly available in most countries.
