Diseases of Connective Tissue

*The Proceedings of a Symposium organised by the
Royal College of Pathologists*

Edited by D. L. Gardner

The cells—Fibroblasts M. ABERCROMBIE ● Chondrocytes R. A. STOCKWELL ● Synoviocytes HONOR B. FELL ● The muscle cell J. C. SLOPER, M. C. BARRETT, AND T. A. PARTRIDGE

Extracellular materials—Collagens D. S. JACKSON ● Collagen and elastin fibres A. J. BAILEY ● Basement membrane JOHN T. IRELAND ● Proteoglycans of cartilage HELEN MUIR

Disease mechanisms—Diseases of the collagen molecule C. I. LEVENE ● Molecular abnormalities of collagen F. M. POPE AND A. C. NICHOLLS ● Lysosomes and the connective-tissue diseases LUCILLE BITENSKY

Genetic disease—HLA system and rheumatic disease D. A. BREWERTON ● Replacement therapy in the mucopolysaccharidoses MICHAEL F. DEAN ● Genetic disease and amyloid J. R. HOBBS

Inflammation and fibrosis—Rheumatoid arthritis—a virus disease? A. M. DENMAN ● Systemic lupus erythematosus—an autoimmune disease? E. J. HOLBOROW ● Hepatic cirrhosis—a collagen formative disease? J. O'D. MCGEE AND A. FALLON ● Fibrosis of lung—an environmental disease? P. C. ELMES AND J. C. WAGNER

Kettle Memorial Lecture—Atherosclerosis—disease of old age or infancy? C. I. LEVENE

Structural and metabolic disease—New knowledge of connective tissue ageing J. D. SCHOFIELD AND B. WEIGHTMAN ● New knowledge of osteoarthritis S. YOUSUF ALI ● New knowledge of intervertebral disc disease J. BALL ● New knowledge of the pathogenesis of gout J. T. SCOTT ● New knowledge of chondrocalcinosis PAUL DIEPPE

A consensus—Connective tissue diseases: A consensus D. L. GARDNER

Price: Inland £6.00; Abroad US \$15.00, including postage

Payment must be enclosed with order or a surcharge of 30p will be made for rendering invoices and statements

New books from Blackwell

A Reference Manual of Growth and Development

J.M.H. Buckler M.A. D.M. F.R.C.P. December 1978. 108 pages, 40 illustrations. Paper, about £4.00

This volume presents easily-accessible data on the growth and development of normal children in graphical percentile forms and tables. Normal values are illustrated together with their interpretation and application. It is designed as a convenient reference manual for all medical staff working with children.

Metabolic Disease in Childhood

L. Sinclair M.B. B.Sc. F.R.C.P. D.C.H. Early 1979. 420 pages, 115 illustrations. About £20.00

This work is designed to clarify the subject of metabolic disease in childhood so that clinicians may be able to appreciate the scientific basis of the subject and the laboratory worker may better understand the clinical problems. The text is intended to interest the reader and keep him up to date with not only recent biochemical advances but also changes in attitude to those afflicted by metabolic handicap.

Neonatal Respiration: Physiological and Clinical Studies

L.B. Strang M.D. F.R.C.P. 1978. 328 pages, 113 illustrations. £14.50

Common Symptoms of Disease in Children

R.S. Illingworth M.D. F.R.C.P. D.P.H. D.C.H. Sixth Edition, December 1978. 392 pages, 4 illustrations. About £6.75

Lecture Notes on Paediatrics

S.R. Meadow M.A. B.M. F.R.C.P. D.C.H. F.R.C.O.G. and R.W. Smithells M.B. F.R.C.P. D.C.H. Third Edition, December 1978. Paper, about £4.25

The Essentials of Child Psychiatry

Helen Connell M.B. B.S. F.R.A.N.Z.C.P. M.R.C.Psych. D.C.H. December 1978. 228 pages, 12 illustrations. Paper, about £6.50

This book is based on a course designed to introduce medical students to the management of psychological problems of childhood and adolescence in paediatric and general practice. As well as providing an excellent text for students studying for higher examinations in psychiatry, it will also be useful to other professionals involved in the welfare of children.

Paediatric Therapeutics

Edited by H.B. Valman M.D. F.R.C.P. D.C.H. Early 1979. 240 pages, 21 illustrations. Paper, about £7.50

This book outlines the management of common paediatric therapeutic problems. The first three chapters deal with the scientific principles on which rational treatment is based. Each of the remaining chapters is concerned with a specific clinical problem and is written by an authority in that field. It is aimed at the post-graduate student but family doctors and undergraduate students will find it an up-to-date guide to a rapidly changing subject.

Anaesthesia for Children including Aspects of Intensive Care

T.C.K. Brown M.B. Ch.B. F.F.A.R.A.C.S. and G.C. Fisk M.A. B.M. B.Ch. F.F.A.R.A.C.S. Early 1979. 416 pages, 140 illustrations. About £20.00

Prenatal Diagnosis of Genetic Disease

D.C. Siggers M.B. B.S. M.R.C.P. 1978. 72 pages, 25 illustrations. Paper, £3.25

Paediatric Neurology

Edited by F. Clifford Rose F.R.C.P. Summer 1979. 640 pages, 100 illustrations. About £25.00

Blackwell Scientific Publications

PEDIATRIC RESEARCH

Volume 12, No. 10

October 1978

Contents

- The Relationship of Amniotic Membrane 11-Oxidoreductase Activity to Lung Maturation in the Human Fetus** 957
A. K. TANSWELL AND B. T. SMITH (Kingston, Ontario, Canada)
The findings demonstrate that in pregnancies where the fetus is destined to develop respiratory distress syndrome after delivery, the amniotic membranes are defective in their ability to produce cortisol, resulting in a possible reduction in the amount of cortisol available to the fetal lung during maturation *in utero*.
- Cellular and Humoral Immunity in Cartilage-Hair Hypoplasia** 961
M. VIROLAINEN, E. SAVILAHTI, I. KAITILA, AND J. PERHEENTUPA (Helsinki, Finland)
In an unselected series of 28 subjects with cartilage-hair hypoplasia, almost all subjects had subnormal responses in tests of cellular immunity, although most of them had no apparent unusual susceptibility to infections. This feature was a more constant feature of the syndrome than the hair abnormality.
- Salivary Amylase in Cystic Fibrosis: A Marker of Disordered Autonomic Function** 967
G. P. DAVIDSON, A. KOHEIL, AND G. G. FORSTNER (Toronto, Ontario, Canada)
To determine whether an increased salivary isoenzyme activity might be present in cystic fibrosis, these scientists examined total serum amylase and isoenzyme patterns from a series of patients, including cystic fibrosis (CF) patients with and without steatorrhea, patients with exocrine pancreatic insufficiency without CF (Shwachman's syndrome), and a control group who had neither CF nor pancreatic insufficiency.
- The Effect of Racemic, D-Propranolol, L-Propranolol, and Practolol on the Response to Cold by the Newborn Rabbit** 971
I. DOBER, V. JASZAI, T. HEIM, AND R. D. G. MILNER (Pecs, Hungary, Toronto, Canada, and Sheffield, England)
In this investigation the newborn rabbit has been used as a model to investigate the effects of propranolol, the isomers of propranolol, and practolol on the response to cold exposure.
- Fetomaternal Potassium Relations in the Rat on the Twentieth Day of Gestation. II. Effects of Maternal Hypocalcemia** 977
A. G. FANTEL (Seattle, Washington)
A study of potassium homeostasis during maternal hypokalemia was undertaken in potassium-deficient rats on the 20th day of gestation.
- Plasma 25-Hydroxyvitamin D in Familial Hypercholesterolemic Children Receiving Colestipol Resin** 980
R. C. TSANG, M. S. ROGINSKY, M. J. MELLIES, AND C. J. GLUECK (Cincinnati, Ohio)
The effects of colestipol, a new synthetic organic bile sequestrant polymer (U26-597A), on vitamin D metabolism have been assessed in children with familial hypercholesterolemia over a 2-year period.
- Pulmonary Diffusing Capacity in Lambs During the Early Neonatal Period** 983
J. M. BISSONNETTE, W. H. DRUMMOND, W. K. WICKHAM, AND J. Z. CRONAN (Portland, Oregon)
When a rebreathing method to measure pulmonary diffusing capacity in neonatal lambs was employed, a significant increase in diffusing capacity was found to take place in the first day of life.
- Distortions in Fetal Growth Standards** 987
R. L. NAEYE AND J. B. DIXON (Hershey, Pennsylvania)
The findings of the present studies indicate that widely used fetal growth standards appear to include measurements from both growth-retarded neonates and from neonates older than their calculated gestational ages.
- Maturation of *p*-Aminohippuric Acid Transport in the Developing Rabbit Kidney: Interrelationships of the Individual Components** 992
B. R. COLE, J. T. BROCKLEBANK, R. G. CAPPS, B. N. MURRAY, AND A. M. ROBSON (St. Louis, Missouri)
This investigation was undertaken to examine systematically the contribution of the individual cellular mechanisms to the reduction on aryl acid excretion in the immature rabbit kidney with *p*-aminohippuric acid being used as the test aryl acid.
- Abnormal Colonization of Neonates in an Intensive Care Unit: Means of Identifying Neonates at Risk of Infection** 998
K. SPRUNT, G. LEIDY, AND W. REDMAN (New York, New York)
Results of these studies indicate that serial throat cultures permit selection of the group of Intensive Care Unit neonates at greatest risk of infection and indicate the probable organism from which they are at risk.
-

CHARLES C THOMAS • PUBLISHER

NUTRITIONAL FACTORS IN GENERAL MEDICINE: Effects of Stress and Distorted Diets by Mark D. Altschule. Biochemistry, metabolic errors, food additives, the entire range of vitamins, and related topics are discussed. \$10.75

BASICS OF FOOD ALLERGY by J. C. Breneman. Practical information for the clinician covers topics ranging from gastrointestinal allergy and cholecystitis to allergic mechanisms involved in learning disabilities and epilepsy. \$32.50

EDUCATIONAL AUDIOLOGY FOR THE LIMITED HEARING INFANT (4th Ptg.) by Doreen Pollack. Chapters detail research in child growth and development, psycholinguistics and theories of perception and learning. Procedures for detecting infant hearing loss are also presented. \$12.50

POISONING: Toxicology—Symptoms—Treatments (3rd Ed., 2nd Ptg.) by Jay M. Arena. Symptoms and life saving measures for the toxic effects of such drugs as tricyclic drugs, naloxone hydrochloride, drugs and chemicals in breast milk, and isoniazid are discussed. \$45.50

MOLECULAR PATHOLOGY edited by Robert A. Good, Stacey B. Day and Jorge J. Yunis. In this text authors from many areas of research have been brought together to contribute to the understanding of disease at the molecular level. \$77.75

CHILDREN'S EXPERIENCE WITH DEATH by Rose Zeligs. Chapters cover the child's developmental concepts of death, his fear of death, the influence of religion on his attitudes toward death, and the dying child himself. \$12.50

MATERNAL AND CHILD HEALTH PRACTICES: Problems, Resources and Methods of Delivery edited by Helen M. Wallace, Edwin M. Gold and Edward F. Lis. Discussion includes identification and management of high risk pregnancy, maternal nutrition, family planning, and child health supervision. \$43.25

ALLERGY AND IMMUNOLOGY IN CHILDREN by Frederic Speer and Robert J. Dockhorn. Among the topics discussed are immune globulins, normal and abnormal immune responses, immunologic deficiency diseases and autoimmunity. \$45.50

AN INTRODUCTION TO PEDIATRIC CARDIOLOGY by William B. Strong, Maurice Levy, Dorothy Tompkins and Myron J. Adams. This self-instructional text presents the anatomy and hemodynamics of cardiac defects. \$18.00, spiral (paper)

MAJOR MEDICINAL PLANTS: Botany, Culture and Uses by Julia F. Morton. The origin and geographical distribution are detailed along with areas of cultivation, yields, chemical constituents, economic uses, and toxicity. \$57.00

THE BIRTH OF LANGUAGE: The Case History of a Non-verbal Child (3rd Ptg.) by Shulamith Kastein and Barbara Trace. The authors present a case history of a child handicapped by central nervous system deficit, perceptual difficulties, and language and behavior disorders. \$10.00

LEUKEMIA AND LYMPHOMA IN THE NERVOUS SYSTEM edited by Carl Pochedly. This book reviews the clinical manifestations, the pathophysiological mechanisms, and the rationale and technique for prevention and treatment of this disease. \$27.25

PATHOLOGY AND SURGERY OF THE SALIVARY GLANDS by Jose Yoel. This graphic text contains information on the surgical complications and sequelae with operative techniques shown in atlas form. \$152.50

PEDIATRIC SCREENING TESTS edited by William K. Frankenburg and Bonnie W. Camp. The fundamentals for selecting a test appropriate for a specific disease are presented in addition to discussion of the conditions commonly recommended for screening such as physical problems and sensory defects. \$28.50

THE HUMAN FETAL AND NEONATAL CIRCULATION: Function and Structure by S. Zoe Walsh, W. W. Meyer and John Lind. This monograph details the changes that occur at birth in fetal circulation. \$17.25

CARDIAC CATHETERIZATION AND ANGIO-CARDIOGRAPHY IN SEVERE NEONATAL HEART DISEASE by Michael T. Gyepes and William R. Vincent. Specific problems of diagnosis of symptomatic congenital heart disease in the newborn period are detailed. \$16.75

RUBELLA edited by Herman Friedman and James E. Prier. The text details the pathogenesis and virological aspects of Rubella infection, the nature and value of prophylactic immunization, and the role of the laboratory in monitoring efficacy of immunization and susceptibility of individuals. \$10.75

MEDICAL PROBLEMS IN THE CLASSROOM: An Educator's Guide edited by Raymond M. Peterson and James O. Cleveland. Medical syndromes and their effects on behavior and learning are given. \$21.75

Atopic Allergy?

a hereditary predisposition?

"In children with a double parental history of atopic disease the incidence of such disease was higher than in children with a single such heredity in whom, however, the incidence was higher than in children without any parental history of atopic disease."

When history and examination are equivocal the use of IgE as a parameter for atopic allergy either for diagnostic or predictive purposes should be decisive.

Kjellman, N-I Max: Immunglobulin E and Atopic Allergy in Children. Linköping University Medical Dissertations 36, 1976.

Phadebas IgE PRIST®

(Paper Radio Immuno Sorbent Test)

The test to predict atopic allergies in children.

A new cutaneous pO₂ monitor from Kontron

This new technique is being used on an increasing scale to supplement blood gas analysis of high risk neonates by continuously monitoring and recording cutaneous pO₂ via a temperature-stable, non-invasive sensor.

Features of the new instrument include:

- ✿ Built in chart recorder
- ✿ Dual temperature setting for sensor 43°C or 44°C
- ✿ Rapid response to changes in oxygen partial pressure
- ✿ Maximum/minimum alarm call

For demonstrations and full information about this Monitor, please complete the slip below and post to Kontron Instruments Limited, PO Box 88, St. Albans AL1 5JG, or telephone St. Albans (0727) 33221.

Please contact me to arrange a demonstration of the Kontron pO₂ Monitor*
Please send me further information about the pO₂ Monitor*

Remembering Henry

Edited by Stephen Lock and Heather Windle

*A man of stature—in all ways—Henry Miller occupied a large part in many people's lives and his death in 1976 left a large gap. Though a neurologist of world renown he was best known in the North-East, where he spent most of his life, and where, for the last eight years of it, he was Vice-Chancellor of the University of Newcastle upon Tyne. A cross-section of his many friends and colleagues have contributed their reminiscences to **Remembering Henry** and, as each person saw him from a different angle, those who did not know him will find that the whole man gradually comes to life. Professor John Walton has written the introduction, three of Henry Miller's best-known articles are included (writing was his first interest after neurology), and there is a bibliography of his prolific publications. A fitting tribute, **Remembering Henry** may fill some of the gaps for those who have stayed behind. Profits from the book will be given to the Henry Miller Memorial Appeal.*

Reduced Subscription Rates for Junior Hospital Doctors Residents and Interns...

from January 1 1979 the

Archives of Disease in Childhood

will be available to junior doctors in all parts of the world for a maximum of four consecutive years at **REDUCED Annual Subscription Rates.** (Thereafter, or when reaching consultant status this special offer will no longer apply.) The following subscription rates apply for the twelve issues published in 1979.

Inland £17.00

Overseas US\$40.00

(The full rates are: Inland £28.00; Overseas US\$65.50)

The opportunity to subscribe to this journal of international authority and repute at a substantially reduced subscription rate is one not to be missed by junior doctors seeking to specialise in paediatrics.

Please complete the adjacent order form and send for your subscription NOW.

Further order forms can be supplied on request.
