

Product Change  
Announcement

Improved dietary management  
of phenylketonuria

## Aminogran Food Supplement Aminogran Mineral Mixture

Allen & Hanburys Ltd., pioneers in the development of products for the dietary management of phenylketonuria, are now able to announce important modifications to Aminogran, already well established as an advance in therapy.

- \* Separate packs obviating wastage of mineral mixture.
- \* Larger packs providing a more convenient and practical supply unit.
- \* New mineral mixture formulation in line with recent research findings.<sup>1</sup>
- \* New dosage recommendations allowing use of the product from infancy.<sup>2</sup>

1 Lawson et al (*Arch. Dis. Childh.* 1977 52 62)

2 See new Data Sheet for details.

### **Aminogran Food Supplement**

A mixture of L-amino acids, including all the essential amino acids except phenylalanine. In packs of 500g.

### **Aminogran Mineral Mixture**

All the necessary minerals plus trace elements for balanced nutrition in the correct proportions for human needs. In packs of 250g.

Data Sheets and Monograph giving full prescribing information are available on request.

Aminogran is a trade mark of

# PROTECT THE NEXT GENERATION

## Phadebas<sup>®</sup> Dry Spot TSH Test in screening for congenital hypothyroidism

### TSH - screening for

- Highest sensitivity
- Excellent discrimination
- Low recalls, low administrative costs

## Phadebas<sup>®</sup> Dry Spot TSH Test

- RIA with two 3 mm discs
- Fast and flexible procedure
- Not labour - intensive
- Test range: 7-200  $\mu$ U hTSH/ml blood

# Simplicity itself

The Codman Shunt range, available only from Downs, has proved outstandingly popular with British surgeons. Here's why.

**UNI-SHUNT\*—the unique one piece shunt.**

Simple and easy to insert, it's one piece construction reduces the risk of infection and need for revision.

**ACCU-FLO\*—the guaranteed system which offers complete flexibility.**

The Accu-Flo range of shunts offer the surgeon a complete system from which to choose.

They are also guaranteed to function at the stated pressure. Renowned for their consistently high quality and low cost—up to 20% less than some competitive products—Accu-Flo shunts are also double sterile wrapped.

The whole range is available from stock, so there's no delay when ordering. For more details, fill in the coupon.

# Atopic Allergy?

a hereditary predisposition?

"In children with a double parental history of atopic disease the incidence of such disease was higher than in children with a single such heredity in whom, however, the incidence was higher than in children without any parental history of atopic disease."

When history and examination are equivocal the use of IgE as a parameter for atopic allergy either for diagnostic or predictive purposes should be decisive.

Kjellman, N-I Max: Immunoglobulin E and Atopic Allergy in Children. Linköping University Medical Dissertations 36, 1976.

## Phadebas IgE PRIST®

(Paper Radio Immuno Sorbent Test)

**A few facts about monocomponent insulin from Europe's largest insulin manufacturer.**

**MC**

means monocomponent, a designation unique to Novo insulins.

**MC**

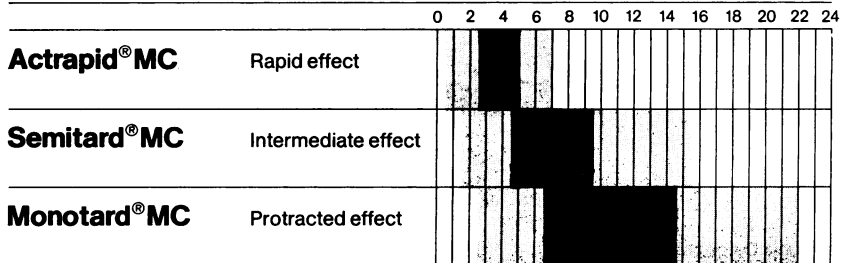

means a level of insulin purity unique to Novo which has been characterised by the following specification:

a-component	not detectable
Proinsulin like substances	<1ppm
Glucagon like substances	<1ppm
Pancreatic polypeptide	<0.01ppm
Somatostatin	<0.01ppm
VIP (vasoactive intestinal polypeptide)	<0.01ppm

**MC**

means a range of insulins providing a unique combination of purity and flexibility of administration.

# A new cutaneous pO<sub>2</sub> monitor from Kontron

This new technique is being used on an increasing scale to supplement blood gas analysis of high-risk neonates by continuously monitoring and recording cutaneous pO<sub>2</sub> via a temperature-stable, non-invasive sensor.

Features of the new instrument include:

- ✿ Built in chart recorder
- ✿ Dual temperature setting for sensor 43°C or 44°C
- ✿ Rapid response to changes in oxygen partial pressure
- ✿ Maximum/minimum alarm call

For demonstrations and full information about this Monitor, please complete the slip below and post to Dr. Peter Hargreaves, Kontron Instruments Limited, PO Box 188, Watford WD2 4YX, or telephone Dr. Hargreaves at Watford (0923) 47666.

-----  
Please contact me to arrange a demonstration of the Kontron pO<sub>2</sub> Monitor\*

# PEDIATRIC RESEARCH

Volume 12, No. 3

March 1978

---

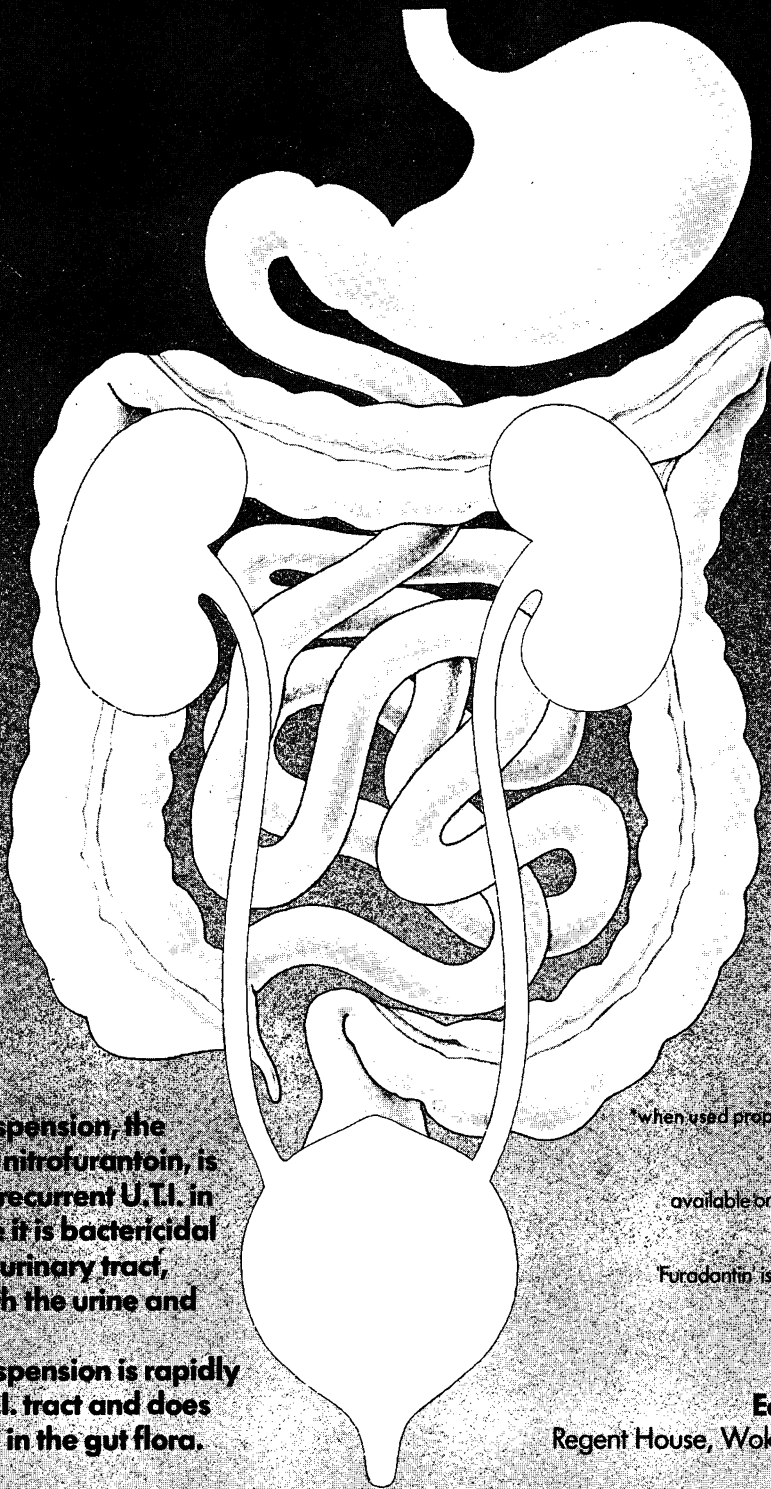

## Contents

- Quantitative Analysis of Nuclear Population in Muscle from Malnourished and Recovered Children** ..... 167  
F. M. HANSEN-SMITH, D. PICOU, AND M. N. H. GOLDEN (Kingston, Jamaica, West Indies) The purpose of this investigation was to determine the distribution of nuclei among the cell types in muscle of children before and after recovery from severe protein-energy malnutrition.
- The Lymphocyte Transformation Response of Fetal Hemolymphatic Tissue to Mitogens and Antigens** ..... 171  
D. M. MUMFORD, J. S. SUNG, J. O. WALLIS, AND R. H. KAUFMAN (Houston, Texas) These authors report studies in an ontogenetic survey of human fetal lymphocytes stimulated with concanavalin A and specific antigens.
- Erythrocyte Membrane Proteins of Premature and Full-term Newborn Infants** ..... 176  
D. L. SHAPIRO AND P. PASQUALINI (New Haven, Connecticut) Erythrocyte membrane proteins were analyzed by polyacrylamide gel electrophoresis to determine whether significant differences existed between the membrane proteins of premature infants, full-term infants, and adults.
- Effects of Diet and Behavior Therapy on Social and Motor Behavior of Retarded Phenylketonuric Adults: An Experimental Analysis** ..... 179  
D. MARHOLIN II, R. E. POHL III, R. M. STEWART, P. E. TOUCHETTE, N. M. TOWNSEND, AND E. H. KOLODNY (Boston, Massachusetts) This study assesses the effect of a low phenylalanine diet on the social and motor behavior of severely retarded phenylketonuric adults.
- The Chronically Reserpinized Rat as a Possible Model for Cystic Fibrosis. VII. Alterations in the Secretory Response to Cholecystokinin and to Secretin from the Pancreas *in Vivo*** ..... 188  
J. PERLMUTTER, J. R. MARTINEZ, A. M. MARTINEZ AND C. COOPER (Columbia, Missouri) The volume and composition of pancreatic juice secreted in response to cholecystokinin and to secretin stimulation was compared in rats treated with seven daily doses of reserpine and in untreated controls.
- Serum Bilirubin Binding Capacity and Free Bilirubin Concentration: A Comparison between Sephadex G-25 Filtration and Peroxidase Oxidation Techniques** ..... 195  
W. J. CASHORE, P. J. P. MONIN, AND W. OH (Providence, Rhode Island) An adaptation of a peroxidase method was used to measure bilirubin binding capacity and was compared with results obtained following quantitative Sephadex gel filtration.
- Immunologic Studies in Arylsulfatase A in Normal and Metachromatic Leukodystrophy Liver** ..... 199  
E. SHAPIRA, R. R. DE-GREGORIO, AND H. L. NADLER (Chicago, Illinois) Utilizing monospecific antisera to arylsulfatase (ASA) and its subunits, ASA was demonstrated to be composed of two immunologically distinct subunits.
- Uric Acid Metabolism in Therapy of Glycogen Storage Disease Type I** ..... 204  
P. J. BENKE AND S. GOLD (Miami, Florida) In the present study, factors are examined which may explain lower serum uric acid in a new therapy of patients with glycogen storage disease type I.
- Neonatal Serum Bilirubin from Skin Reflectance** ..... 207  
R. E. HANNEMANN, D. P. DEWITT, AND J. F. WIECHEL (West Lafayette, Indiana) These authors describe a method for the measurement of neonatal skin reflectance and correlate these measurements with serum bilirubin.
- Whole Body Protein Synthesis in Relation to Basal Energy Expenditure in Healthy Children and in Children Recovering from Burn Injury** ..... 211  
C. L. KIEN, D. K. ROHRBAUGH, J. F. BURKE, AND V. R. YOUNG (Cambridge and Boston, Massachusetts) This study was designed to examine the relationship between energy expenditure and protein turnover in healthy children and in patients during varying states of recovery from burn injury.
- Iron Deficiency in the Rat: Biochemical Studies of Brain Metabolism** ..... 217  
B. MACKLER, R. PERSON, L. R. MILLER, A. R. INAMDAR, AND C. A. FINCH (Seattle, Washington) These studies were undertaken to determine the effects of iron deficiency on brain metabolism.

# Furadantin Suspension

(nitrofurantoin)

To prevent lower urinary tract reinfection  
in childhood<sup>1</sup>

**Furadantin Suspension, the only liquid form of nitrofurantoin, is recommended for recurrent U.T.I. in childhood because it is bactericidal and specific to the urinary tract, being active in both the urine and the renal medulla.**

**Furadantin Suspension is rapidly absorbed in the G.I. tract and does not cause changes in the gut flora.**

<sup>1</sup>when used prophylactically in susceptible individuals

<sup>2</sup>Further information is available on request to the company

PL 0364/0010 PA 170/5/3

<sup>3</sup>Furadantin is a registered trade mark

**Eaton Laboratories**  
Regent House, Woking, Surrey GU21 5AP
