President of the British Paediatric Association
Editor, British Medical Journal
Technical Editor: Jennifer Orton

Notice to Contributors

Papers for publication should be sent to the Editors, Archives of Disease in Childhood, B.M.A. House, Tavistock Square, London WC1H 9JR. Submission of a paper will be held to imply that it contains original work which has not been previously published. Permission to republish must be obtained from the Editors.

Short reports. Case reports, brief laboratory observations, preliminary communications, and other short papers may be submitted for this section. Length must not exceed two printed pages of the Archives, i.e. in general not more than 1000 words of text, two figures or tables, and eight references. Single case reports will usually only be considered in this form.

For guidance on ethical aspects authors should refer to Editorials in this Journal (1967, 42, 109; 1973, 48, 751; 1978, 53, 441).

One page proof will be sent to the author submitting the paper.

Reprints. Twenty-five reprints are supplied free and further reprints may be ordered when the proof is returned.

Authors should check the following requirements before submitting a paper:

(1) Scripts to be top copy and typed in double spacing.
(2) SI units. The units in which the work was done will appear first with the other units, i.e. SI or traditional units, appearing after in parentheses. A conversion factor should be given as a footnote to tables, and in legends to figures.
(3) Institution(s) where work done to be stated.
(4) Address and position of author(s) to be given.
(5) Name and address of author supplying reprints to be given at end of paper.
(6) Figures: (a) provided with a caption, typed on a separate sheet, (b) referred to in the text.
(7) Diagrams to be drawn on stout white paper; any lettering may be lightly inserted in pencil.
(8) Photographs to be on glossy paper unmounted, and trimmed to include only relevant portion. Any lettering, etc. to be inserted should be indicated on a separate transparent sheet.
(9) Coloured illustrations may be considered, but the author will usually be asked to contribute to the cost.
(10) Tables (numbered, with titles) typed on to separate sheets. Large tables are expensive and are not encouraged.

(11) From January 1980 references in the text will be numbered. References given at the end of the paper should be listed in the order in which they are first mentioned. The full title of article or book should be given, and the first and last page numbers of the particular paper or chapter. The titles of journals should be abbreviated according to the style used in Index Medicus (see British Medical Journal, 24 February 1979, 1, 532–535).

(12) Summary to be typed on a separate sheet; and it should say what was done and what was concluded.

Notice to Advertisers

Applications for advertising space and rates should be made to the Advertisement Manager, Archives of Disease in Childhood, B.M.A. House, Tavistock Square, London WC1H 9JR.

Notice to Subscribers

Archives of Disease in Childhood is published monthly. From January 1980 the subscription rate will be £29.00 in the United Kingdom and the Republic of Ireland, and US $70.00 in all countries overseas. Payment for overseas subscriptions should be made in US dollars, i.e. US $70.00, or in your national currency based on the prevailing exchange rate to the US dollar of that currency, payable to the British Medical Association. Orders can also be placed locally through any leading subscription agent or bookseller. (For the convenience of readers in the USA subscription orders, with or without payment, can also be sent to: BRITISH MEDICAL JOURNAL, 1172 Commonwealth Avenue, Boston, Mass., 02134. All inquiries, however, must be addressed to the publisher in London.)

All inquiries regarding air mail rates and single copies already published should be addressed to the publisher in London.

COPYRIGHT © 1979 by Archives of Disease in Childhood. This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any relaxations permitted under national copyright laws, no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is not, however, required to copy abstracts of papers or of articles on condition that a full reference to the source is shown. Multiple copying of the contents of the publication without permission is always illegal.
Lymphocyte changes in β-thalassaemia major

Correspondence to Dr Salvatore Musumeci, Department of Paediatrics, University of Catania, Viale Andrea Doria, 95125 Catania, Italy.

Received 5 March 1979

Change of reference style

From January 1980, the *Archives* will change its style for citing references and will follow the number system. We are making this change in order to conform with the ‘Vancouver style’ of uniform requirements for manuscripts submitted to biomedical journals.

Previously the *Archives* has used the Harvard reference system. Its advantages and disadvantages compared with those of the number system have seemed evenly balanced, but the editors have been aware of the burden imposed on authors and their secretaries by the different styles which different journals require. Therefore, with the unanimous agreement of the editorial committee, we have decided to support a move whereby a large— and increasing—number of major medical journals will accept manuscripts presented in one agreed style.

The system numbers references consecutively in the order in which they are first mentioned in the text. References are identified in the text by arabic numerals. For further details see instructions to authors inside the front cover, and the references cited.1,2

From now onwards all manuscripts submitted should accord with the new style.

Subject index  Volume 54, 1979

Abdominal
  pain, acute, and viruses in childhood, 780
  of nonorganic cause, recurrent, investigation
  using psychological tests, 165, P.
Abortuses resulting from prenatal diagnostic surveillance
  for neural tube malformations, examination, 158, P.
Achondrogenesis type II, histochemical and densitometric
  study of cartilage, 153, P.
Adder bites in children: short report, 392
Adenine phosphoribosyltransferase, complete deficiency
  presenting as renal stones, 25
Adenovirus infection, type-21, pulmonary sequelae,
  13-year follow-up, 155, P.
Adrenal hyperplasia, salt-losing
Aldosterone and renin response in human newborns to
  acute blood volume change: correspondence, 80
Allergy, bronchial, in cystic fibrosis, 164, P.
Amino-acid metabolism and growth in infants with
  chronic renal failure, 321, P.
Aminophylline IV and salbutamol IV, comparison in
  treatment of asthma: short report, 391; correspond-
  ence, 983
  intravenous, in apnoea, dosage schedule, 190
Aminocentesis, diagnostic service, morbid anatomists’
  role, 152, P.
Amniotic fluid, meconium-stained, increased concentra-
  tions of hypoxanthine and xanthine in, 727, P.
Amyloid nephropathy in familial Mediterranean fever,
  320, P.
Anaemia in childhood coeliac disease: correspondence,
  648
Anal stenosis, congenital, delayed diagnosis: short
  report, 68
Angiotensin and renin in normal prepubertal girls, 160, P.
ANTONATIONS
  A better deal for newborns with congenital heart
  disease, 268
  Diagnosis of malignant hyperphenylalaninaemia, 329
  Genetic registers, 169
  Red cell aplasia in children, 263
  Antidiuretic hormone secretion, inappropriate, in
  mechanically-ventilated newborn infants, 320, P.
  Antigen-antibody complexes in serum in juvenile chronic
  arthritis, 120
Antipyrine
  drug metabolism in malnourished children, 299
  treatment, maternal, in neonatal jaundice prophylaxis,
  725, P.
Aortic arch interruption presenting with absence of all
  limb pulses, 49
Aortography in infantile coarctation: short report, 717
Apnoea
  alarm systems, explanation for failure, 982, P.
  and hypoventilation in neonate, use of doxapram,
  981, P.
  intravenous aminophylline in, dosage schedule, 190
  of prematurity, relation to differential delay in myelina-
  tion of vagal fibres, 153, P.
  theophylline half life: short report, 238
Arrhythmias, cardiac, and prolonged QT interval in two
  neonates, sudden infant death syndrome in one, 776
Arterial oxygen tension
  continuous measurement, improved accuracy, sick
  newborn infant: short report, 307
  servo-control, new technique, preterm infants, 278
Arteriosonde, Infrasonde, and mercury sphygmomanom-
  eter, clinical evaluation and comparison, 184;
  160, P.; erratum, 420
Arteritis, Takayasu’s, as differential diagnosis from
  systemic juvenile chronic arthritis: short report, 798
Arthritis, juvenile, chronic,
  antigen-antibody complexes in serum, 120
  systemic, Takayasu’s arteritis as differential diagnosis:
  short report, 798
Aspergillosis, neonatal, accompanying fulminant necro-
  tising enterocolitis: short report, 559
Aspirin, rectal, absorption and antipyretic effect: short
  report, 713
Asplenia in the Ivemark syndrome, evidence against
  primary agenesis, 153, P.
  polyosplenia, comparative study of susceptibility to
  infection, 153, P.
Asthma childhood,
  acute, use of nebulised salbutamol, 163, P.
  bronchial, in Nigerian children, 448
  controlled trial of family psychotherapy, 116
  comparison of salbutamol IV and aminophylline IV:
  short report, 391
  house dust mite sensitive, hyposensitisation in, 164, P.
  use of nebulised chlorpheniramine, bronchodilator
  effects, 163, P.
  effects of physical training on hormonal responses to
  exercise, 524
AT10 (dihydrothachysterol) in treatment of hyper-
  calcaemia: correspondence, 82
Ataxia-telangiectasia, diagnostic considerations, 682
Azathioprine and cyclophosphamide, controlled trial in
  nephrotic syndrome and poorly selective pro-
  teinuria, 204
  Bacteria, role in acute wheezy bronchitis, 587
  Basal acid secretion, serum cholecystokinin and infantile
  pyloric secretion, 773
  Beclomethasone dipropionate, clinical comparison of
  aerosol, or as powder from rotohaler: short report, 233
  Behaviour
  deviance after early treated phenylketonuria, 14
  disturbance, in 3-year-olds, followed up study, 970 P.
Betamethasone, follow-up study of babies exposed to before birth, 725, P.

Betamimetics and neonatal lung adaptation, 153, P.

Bile,
- acids, concentrations, total serum, postprandial, in cystic fibrosis, 164, P.
- duodenal, in protracted diarrhoea, infants, 131
- salts, intestinal, in cystic fibrosis, 19

Bites, snake, in children: short report, 392

Bleeding, vaginal, recurrent, in infants and young girls without other evidence of precocious puberty: short report, 472

Blood,
- formation in infancy: annotation, 831
- pressure in first six weeks of life, 726, P.

- measurement, comparison and clinical evaluation of
  - Infrasonde, Arteriosonde, and mercury sphygmanometer, 184: 160, P.: erratum, 420

- Rh type, maternal, and spina bifida: correspondence, 567

- transfusion, and cytomegalovirus in neonates, 538

- volume change, renin and aldosterone response in human newborns: correspondence, 80

Body,
- fat in newborn: annotation, 845

- fatness, height and weight, family resemblance, 877

  see also Fat

Bone,
- growth and mineralisation, effect of puberty on rates, 950

- marrow relapse on treatment in childhood acute lymphoblastic leukaemia, 974, P.

Bowel,
- disease, inflammatory, acute in childhood: a new disease? correspondence, 906

- small, biopsy, critical assessment, 604

- neonatal small left colon syndrome: short report, 635

Breast
- development in the neonate, 979, P.

- feeding and smoking: correspondence, 240

- milk, bacteriological criteria for feeding to babies on SCBU, 804, P.

- and breast feeding in very low birthweight infants: short report, 897

- caffeine secretion: short report, 787

- cell concentrations, after storage, in glass and plastic containers, 981, P

- unheated, bacteriological monitoring, 760

Breath hydrogen test for detecting lactose malabsorption, 436

Breech delivery and hypopituitary dwarfism: correspondence, 485

Bronchial allergy in cystic fibrosis, 164, P.

Bronchial asthma, in Nigerian children, 448

Bronchitis, acute wheezy, role of viruses and bacteria, sputum study, 587

Bronchodilator,
- drugs and young children: correspondence, 649

- effects of nebulised chlorpheniramine in childhood asthma, 163, P.

- Buccal epithelial cells, E. coli adhesion, 162, P.

C-reactive protein test in diagnosis of septic complications of CSF shunts for hydrocephalus, 545

Caffeine,
- elimination, maturation in infancy, 946

- secretion into breast milk: short report, 787

Calcification, arterial, diffuse, and hydrops fetalis, 154, P.

Calcium, ionised, in pregnancy, 980, P.

Calculi, bilateral staghorn cystine renal, dissolution: short report, 795

Candida, defective killing in childhood malnutrition, 445

Candidiasis,
- mucocutaneous, complicating neonatal intensive care, 158, P.

- pulmonary, in cystic fibrosis: short report, 555

- systemic, presenting feature in acute anuric renal failure: short report, 70

Carbamazepine dose-frequency requirement in children, 454

Carbohydrate metabolism in chronic renal failure, 321, P.

Cardiac,
- action during haemodialysis, echocardiographic investigation, 322, P.

- malformations, congenital, see Heart disease, congenital

Cardiovascular diseases, risk factors in children, 320, P.

Caries, dental,
- and addition of sugar to liquid medicines, 974, P.

- incidence in coeliac disease: correspondence, 166, 566

Cartilage, histochemical and densitometric study in achondrogenesis type II, 153, P.

Catheterisation, umbilical, securing haemostasis during, neonate: correspondence, 166

Catheters, umbilical, simple method for stabilising: correspondence, 563

Cefuroxime plasma and CSF levels in meningitis: short report, 235; correspondence 729

Cells, buccal epithelial, E. coli adhesion, 162, P.

Cerebral lesions, ischaemic, and congenital cardiac malformations, 156, P.

Cerebrospinal fluid immunoglobulins in children: short report, 961

Cervical lymphadenitis due to mycobacteria of the Fortuitum group: short report, 312

Chickenpox, Henoch-Schönlein purpura after: correspondence, 166, 564

Chloramphenicol and phenobarbitone—drug interaction: short report, 76: correspondence, 563

Chlorhexidine, absorption from the intact skin, newborn infants, 379

Chlorpheniramine, nebulised, in asthma, bronchodilator effects, 163, P.

Chromosome, abnormalities, and immunodeficiency, four families with, 518

3 (3q), long arm, familial partial trisomy, 135

3 ring 20, with seizures, minor anomalies, and retardation: short report, 477

Cholecystokinin, serum, basal acid secretion, and infantile pyloric stenosis, 773

Chorioamnionitis and funisitis due to Corynebacterium kutscheri, 710
Ciliary anomalies, congenital, and respiratory disease, 159, P. 
Circulatory arrest with profound hypothermia in infancy, intellectual performance after, 1 
Cirrhosis, liver, modification by colchicine of hepatic collagen synthesis, 160, P. 
Indian childhood, raised hepatic copper concentration in, 803, P. and hepatitis A: short report, 901 
Clinic form, child-health, suggested design: current topics, 626 
Clomipramine therapy, maternal, neonatal effects: correspondence, 405 
Clonidine, dose in alternating hemiplegia: correspondence, 327 
Clubbing, digital, quantitation by shadowgram technique: short report, 145 
Coarctation, infantile, aortography: short report, 717 
Coeliac disease, 
childhood, and anaemia: correspondence, 648 
dental caries, incidence: correspondence, 166, 566 
diagnosis, Interlaken criteria: current topics, 783 
on gluten-free diets, small bowel mucosal changes in asymptomatic children with, 803, P. 
in identical twins at same age in both: short report, 395 
iron deficiency on gluten-free diet, 375 
Colchicine, in modification of hepatic collagen synthesis in cirrhosis of liver, 160, P. 
Colitis, granular-cystic, persistent or chronic diarrhoea, pathological changes, 157, P. 
Colon, small, left, neonatal, syndrome: short report, 635 see also Bowel 
Compensatory hypertrophy of renal size in chronic pyelonephritis and unilateral renal damage, 320, P. 
Complement, activating factor in membranoproliferative glomerulonephritis, 323, P. 
dericiency with membranoproliferative glomerulonephritis, recurrence after transplant, 323, P. 
profiles in glomerulonephritis, acute or membranoproliferative, 323, P. 
system, abnormalities with liver disease, 160, P. 
Congenital 
dislocation of the hip, pathology, 152, P. 
 analogue type disproportion myopathy, histological diagnosis with an uncertain clinical outlook, 735 
heart disease, a better deal for newborns; annotation, 268 
Connective tissue disorders, maternal, associated with congenital complete heart block in newborn, 7; 727, P. 
Consanguinity, parental, and fetal growth: short report, 317 
Continuous positive airways pressure, discontinuation in infants with respiratory distress syndrome: short report, 722 
Convulsions, 
diazepam, rectal administration, in acute treatment, 855 
febrile, associated with hydroxykynurenine hydroxyanthranilic acid ratios, 801, P. 
prophylactic diazepam in: correspondence, 244 
role of viruses, 869 see also Seizures 
Copper, concentration, hepatic, raised, in Indian childhood cirrhosis, 803, P. 
deficiency in a low birthweight infant: short report, 553 
Cord blood screening, regional, results of programme for detecting neonatal hypothyroidism, 171 
Coronary arterial lesions, and myocardial necrosis in stillbirths and infants, 918 
CORRESPONDENCE 
Acquired toxoplasmosis and acute hemisindrome in childhood, 326 
Acute inflammatory bowel disease in childhood: a new disease, 906 
Anaemia in childhood coeliac disease, 649

Dose of clonidine in alternating hemiplegia, 327 
Early onset of homozygous β thalassaemia associated with neonatal jaundice, 82 
Early use of sodium nitroprusside in respiratory distress syndrome, 403, 808 
Epididymo-orchitis in Kawasaki disease, 728 
Evaluation of the Sheffield system for identifying children at risk from unexpected death in infancy, 406 
Familial neurodegenerative disorder associated with raised urinary VMA, 80 
Fucidic acid in Gunn rats. No influence on serum bilirubin concentration, 566 
Hemoch-Schönlein purpura after chickenpox, 166, 564 
Hyperpituitary dwarfism and breech delivery, 485 
Incidence of dental caries in coeliac children, 166, 566 
Infantile cortical hyperostosis with raised immunoglobulins, 985 
Intrathecal ATS and high dosage diazepam in neonatal tetanus, 650 
Kawasaki disease, 326 
Lomotil in diarrhoeal illnesses, 984
Cystic disease of lung, congenital, 155, P. renal, 321, P.

Death, stillbirth or neonatal, mourning by family after: personal practice, 303: correspondence, 905 sudden, see Sudden infant death syndrome.

Dental caries, see Caries, dental

Cytomegalovirus, and blood transfusion in neonates, 538 infections, seroepidemiology during early infancy, urban communities, 286

Cystinuria, childhood, in New South Wales, 676

P. basal cell carcinoma, 199 P. basic protein, 109 P. beta 2-adrenergic receptor, 330 P. beta 3-adrenergic receptor, 484 P. Beta vulgaris, 403 P. 

Death, stillbirth or neonatal, mourning by family after:
cystic disease of lung, congenital, 155, P.
cystic fibrosis, bronchial allergy in, 164, P.
comparative trial of manual and mechanical percussion technique with gravity-assisted bronchial drainage, 542
intestinal bile salts in, 19
multisepate gallbladder in, 157, P.
pancreatic changes in and in normal, 155, P.
postprandial total serum bile acid concentrations in, 164, P.
pulmonary candidiasis in: short report, 555
release of endogenous secretin in, 164, P.
screening by meconium analysis, 92

Cystinosis, adolescent, case report and review, 324, P.

Cystinuria, childhood, in New South Wales, 676

Cytomegalovirus, and blood transfusion in neonates, 538 infections, seroepidemiology during early infancy, urban communities, 286

Death, stillbirth or neonatal, mourning by family after: personal practice, 303: correspondence, 905

Cystinuria, adolescent, case report and review, 324, P.

Cystinosis, adolescent, case report and review, 324, P.

Cyclosporin, nephrotic neonates, 98

Cyclosporine, peritoneal, in treatment of neonate with propionic acidemia and severe hyperammonaemia: short report, 962

Coxsackie, Bl infection, spread, 291 type A16 infection in a neonate: correspondence, 649

Crayfish, 94

Cyanotic congenital heart disease, nephropathy in, 323, P.

Cyclophosphamide and azathioprine, controlled trial in nephrotic syndrome and poorly selective proteinuria, 204

Cyclophosphamide therapy, clinical remission during, Cushing's disease presenting with growth failure, 466

Cystic disease of lung, congenital, 155, P.
cystic fibrosis, bronchial allergy in, 164, P.
comparative trial of manual and mechanical percussion technique with gravity-assisted bronchial drainage, 542
intestinal bile salts in, 19
multisepate gallbladder in, 157, P.
pancreatic changes in and in normal, 155, P.
postprandial total serum bile acid concentrations in, 164, P.
pulmonary candidiasis in: short report, 555
release of endogenous secretin in, 164, P.
screening by meconium analysis, 92

Cystinosis, adolescent, case report and review, 324, P.
Diazepam,
high dosage and intrathecal ATS in neonatal tetanus, 650
prophylactic, in febrile convulsions: correspondence, 244
rectal administration in acute treatment of convulsions, 855
DiGeorge syndrome, successful restoration of immunity
with fetal thymic epithelial transplant: correspondence, 82
Dihydropyridine reductase and phenylalanine hydroxy-
lase activity, normal in atypical phenylketonuria, in vitro: correspondence, 166
Disturbed 3-year-olds, follow up study, 970, P.
see also Behaviour
Doxapram, use in apnoea and hypoventilation in
neonate, 981, P.
Draw-a-man and draw-a-woman Goodenough-Harris
tests, ethnic differences, 880
Drug(s),
induced immunosuppression, subacute sclerosing
panencephalitis after: short report, 640
metabolism in malnourished children, study with
antipyrine, 299
screening in sudden death syndrome, 152, P.
Dubin-Johnson syndrome with some unusual features in a
Chinese family, 529
Duchenne muscular dystrophy,
carrier detection, 534
creatine phosphokinase levels in screening for, 362
Dwarfism, hypopituitary, and breech delivery: correspon-
dence, 485
Dystonia,
phenothiazine-induced, associated with an increase in
serum creatine phosphokinase: short report, 150
Dystrophia myotonica see Myotonic dystrophy

Electrocardiograms, neonatal, 1028, consecutive, results
and assessment, 427
Encephalopathy, National Childhood Encephalopathy
study, preliminary report, 970, P.
Enterobacteriaceae, adhesion to buccal epithelial cells,
974, P.
Enterocolitis,
morphological classification, 157, P.
necrotising, fulminant, neonatal aspergillosis accom-
panying: short report, 559
Enteropathogens in preschool children and their pets,
163, P.
Environment, warm, response of term babies to, 178:
162, P.
Epididymo-orchitis in Kawasaki disease: correspon-
dence, 728
Epilepsy, and acute intermittent porphyria: short report,
644
Escherichia coli, adhesion to buccal epithelial cells
162, P.
Exchange transfusion in newborn, effects on granulocyte
function, 687
Exomphalos, giant, conservative or operative treatment,
441

Fecal viruses and morbidity among babies in Glasgow,
480, P.
Familial Mediterranean fever, amyloid nephropathy in,
320, P.
Family resemblance of height, weight, and body fatness,
877
Fat,
in the newborn: annotation, 845
loading test, oral, procedure for studying fat mal-
absorption in children, 770
necrosis, subcutaneous, and recurrent osteolytic lesions,
associated with pancreatic cyst: short report, 790
Febrile convulsions, see Convulsions
Feeding,
effect on neonatal oxygen consumption, 415
orojejunal, in low birthweight infants: correspondence,
244
transpyloric, in very low birthweight infant, 213
in 32 babies undergoing intensive care, 804, P.
see also Breast feeding
Feeds, infant, effect of temperature, 899
Ferritin, serum concentrations, in children with chronic
renal failure, 322, P.
Fetal,
growth and parental consanguinity: short report, 317
motor activity in 3rd trimester of pregnancy, 727, P.
pathology, pregnancy termination, second trimester,
152, P.
Fever, rectal paracetamol in small children: short report,
469
Fibre type disproportion myopathy, congenital, histo-
logical diagnosis with an uncertain clinical outlook,
735
Fibrin, intrarenal deposition, mediation and effect,
322, P.
Finger clubbing, quantitation by shadowgram technique:
short report, 145
Folate,
deficiency in low birthweight infants, diagnosis and
management, 271
nutrition and growth in infancy, 699
Follow up losses, persistent outpatient nonattenders,
study, 765
Food allergy, response to treatment with sodium cromo-
glycate: short report, 77
Foot length, useful measurement in neonate, 226
Form, clinic, child-health, suggested design, 626
Fucidic acid in Gunn rats. No influence on serum
bilirubin concentration: correspondence, 566
Funisitis and choioamnionitis due to Corynebacterium
kutscheri, 710

Gallbladder, multiseptate, in cystic fibrosis, 157, P.
Gastric,
hormones in the neonate, 979, P.
ulceration, fatal bleeding during first day of life, possible
association with maternal stress: short report, 146
Gastrin,
role in pyloric stenosis: correspondence, 809
secretion test in hypertrophic pyloric stenosis, 208
Gastroenteritis, acute, lactose malabsorption assessed by hydrogen breath testing in, 803, P.
rotavirus, recurrent attack after adenovirus-induced diarrhoea: short report, 398
Gaucher’s disease, non-neuropathic, presenting in infancy, 707
Genetic registers: annotation, 169
Gestational age, accuracy of pre- and postnatal assessment: short report, 896
confirmation by external physical characteristics: short report, 794
estimation, comparison of two methods: correspondence, 242
Glomerular, basement membrane, kinetics of glomerular visceral epithelial cell phagocytosis of macromolecular aggregates from lamina rara externa of, 324, P.
disease, podocyte degeneration in, 321, P.
Glomeruli, renal, size in congenital heart disease, and in sudden unexpected death in infancy, 159, P.
Glomerulonephritis, membranoproliferative, complement activating factor, 324, P.
or acute, complement profile in, 324, P.
deficiency of second component of complement, recurrence after transplant, 324, P.
and platelets, 324, P.
poststreptococcal, and IgA renal function and biopsy studies, 324, P.
proliferative, with crescents evaluated by renal biopsies, effects of pulsed steroids and plasmaphoresis, 159, P.
Glucose, concentration, continuous measurement, in vivo, enzymic polarographic sensor, 980, P.
urinary and blood, relationship between in diabetic children, 371
Gluten-free diet in coeliac disease and iron deficiency, 375
Gonadal infiltration in childhood leukaemia and lymphoma, post-mortem study, 156, P.
Goodenough-Harris draw-a-man and draw-a-woman tests, ethnic differences, 880
Granulocyte function, effect of exchange transfusion, 687
Group B streptococcal, disease early diagnosis in newborn, 972, P.
septicaemia, prophylaxis against early onset, 805, P.
Growth, delay, hormonal and auxologic patterns, boys, 805, P.
failure, Cushing’s disease presenting with, clinical remission during cyproheptadine therapy, 466
and folate nutrition in infancy, 699
hormone-gel, use, 609
hormone, human (UK): annotation, 733
therapy, effects, 971, P.
patterns in malignant disease, 165, P.
Gut hormones in the neonate, 979, P.

Haematuria, nonfamilial recurrent, 323, P.
Haemodialysis, echocardiographic investigation of cardiac action during, 322, P.
Haemoglobin levels, glycosylated, in diabetes mellitus, 295
Haemolytic-uraemic syndrome, prognosis, in children, 321, P.
Haemorrhage, fatal, from gastric ulceration during first day of life—possible association with social stress: short report, 146
intracranial, associated with acute infantile thrombocytopenia and vitamin K deficiency: short report, 471
intraventricular, clinical events relating to, newborn, 409
responsive to vitamin K in 6-week-old infant: short report, 310
Haemostasis, securing during umbilical catheterisation, neonate: correspondence, 166
Hair, concentration of zinc, schoolchildren, 958
Heads, large, (benign familial megalencephaly), in normal children, 512
Hearing loss in very low birthweight infants treated with neonatal intensive care, 421
Heart, block, complete, congenital, associated with maternal SLE and other connective tissue disorders, newborn, 7, 727, P.
disease, congenital, and ischaemic cerebral lesions, 156, P.
review in Poland studied pathologically, 156, P.
size of renal glomeruli in, and in sudden unexpected death in infancy, 159, P.
structural, in the newborn, changing profile: comparison of 1975 with 1965, 281
rate and rhythm in schoolchildren, 970, P.
Height, weight and body fatness, family resemblance, 877
Hemiplegia, alternating, clonidine, dose: correspondence, 327
Hemisyndrome, acute, and acquired toxoplasmosis: correspondence, 326
Hench-Schönlein syndrome, after chickenpox: correspondence, 166: correspondence, 564
annotation, 822
necessity to follow up: short report, 903
