

Major new books for the paediatrician

Control of Growth Edited by *J. M. Tanner*

British Medical Bulletin (Volume 37, Number 3)

112 pages illustrated paperback £9.50

Controlling the growth and development of a child has become a more easily achieved reality in recent years. Understanding of the process involved has increased greatly, and a large amount of important research is currently underway.

This book contains highly authoritative papers, written by eminent workers in the field, which cover major areas of investigation such as cell multiplication, factors involved in post-natal development, the importance of hormones, and abnormalities of growth mechanisms.

Clubfoot *Vincent J. Turco*

(Current Problems in Orthopaedics Series)

208 pages 213 half-tone and 18 line illus hardback £16.00

Presents in detail the aetiology, diagnosis, pathological anatomy of the bones and soft tissues, roentgenological examination and some of the accepted concepts and methods of treatment of the clubfoot.

Includes a long-term statistical analysis of the results, complications and unusual findings in a large series of operative procedures on children followed from birth to maturity.

Other important books

Recent Advances in Paediatrics—6

Edited by *David Hull*

1981 276 pages 27 half-tone and 19 line illus
hardback £17.00

Helping Clumsy Children

Edited by *Neil Gordon and Ian McKinlay*

212 pages 20 half-tone and 35 line illus
paperback £5.95

The Liver and Biliary System in Infants and Children

Edited by *R. K. Chandra*

360 pages 143 half-tone and 49 line illus
hardback £26.00

Child Health in the Community

Edited by *Ross G. Mitchell*

Second edition 368 pages illustrated hardback
£16.00

FORTHCOMING

Legg-Calvé-Perthes' Disease

Anthony Catterall

160 pages approx illustrated hardback
£16.00 approx.

An up-to-date account of the problems of this disease, providing a present state of the art in the form of a critical review.

Scheduled for March 1981 publication

Ultrasound in Pediatrics

Jack O. Haller and Arnold Shkolnik

(Clinics in Diagnostic Ultrasound Volume 8)

320 pages 100 half-tone and 25 line illustrations
24 tables hardback £11.00 approx

The most comprehensive, up-to-date survey of paediatric ultrasound available in the field today.

Covers neurosonography (B-mode), the chest, abdomen, pelvis and scrotum of the paediatric patient, and equipment specially designed for paediatrics.

Scheduled for January 1981 publication

Churchill Livingstone

Robert Stevenson House, 13 Baxter's Place, Leith Walk, Edinburgh EH1 3AF, UK

If a mother can't breastfeed Milupa now offer two granulated formulae

New Aptamil

– a fully adapted baby milk formula that may be preferred for the newborn infant where breastfeeding is not chosen or isn't possible.

- low sodium level
- adapted protein content
- lactose is the only carbohydrate
- added trace minerals

Milumil

– a modern modified baby milk that is particularly suitable when baby needs a more satisfying milk food.

- easily digested fat content
- amylose and maltodextrin in addition to lactose
- experience shows good acceptability

Everyone agrees that breastfeeding gives a baby the best start in life, but when breastfeeding is not chosen or is not possible Aptamil or Milumil can be used with confidence. They meet the latest DHSS recommendations for the composition of infant formulae and are granulated for easy mixing and measuring. Aptamil and Milumil are available from your local chemist.

The new generation of Baby Foods

NOW AVAILABLE
single application
FLEXULES

**When
efficacy
is the need
and safety
is the concern**

...need now to
...sacrifice efficacy for
...because Eumovate
...the need for a
...corticosteroid preparation
with greater topical activity than hydrocortisone, yet
with a wide margin of safety.

Eumovate

(clobetasone butyrate)
a unique balance of efficacy and safety

Indicating information

Eumovate is suitable for treating the following forms of eczema, seborrhoeic dermatitis and other steroid responsive skin conditions.

Dosage and administration
Apply up to four times a day until improvement occurs, when the frequency of application may be reduced.

Contra-indications
Bacterial, fungal or viral diseases of the skin. Hypersensitivity to the preparation.

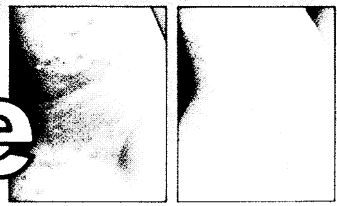

Precautions
In infants and children, long term continuous topical corticosteroid therapy should be avoided where possible, as adrenal suppression can occur. In infants, the napkin may act as an occlusive dressing, and increase absorption. Appropriate antimicrobial therapy should be used concurrently whenever treating inflammatory lesions which have become infected. Any spread of infection requires withdrawal of topical corticosteroid therapy and, possibly, commencement of systemic chemotherapy. As with all corticosteroids, prolonged application to the face is undesirable. In general, topical steroids should not be used extensively in pregnancy, i.e., in large amounts or for prolonged periods.

Side effects
In the unlikely event of signs of hypersensitivity appearing, application should stop immediately. If large areas were to be treated, some patients could absorb sufficient steroid to cause transient adrenal depression despite the low degree of systemic activity associated with clobetasone butyrate. Local atrophic changes could occur where moisture increases absorption of steroid, but only after prolonged use.

Basic NHS cost (exclusive of VAT)
25 gram tube £1.63 (also available in 100 gram tubes).
20 x 1 gram Flexules £2.58

THE HEINZ FELLOWSHIPS OF THE BRITISH PAEDIATRIC ASSOCIATION

H. J. Heinz Company Limited generously endows Fellowships in Paediatrics which are now administered by the British Paediatric Association.

Two or three Fellowships will be offered each year, the number and type awarded in any one year depending on circumstances and the calibre of applicants available.

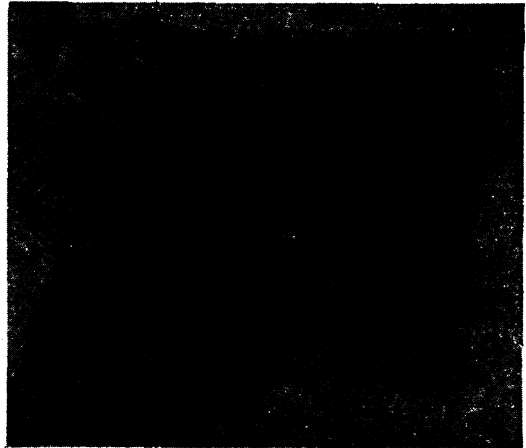

The types of Fellowship, which are open to men or women are:

- A To enable a paediatrician from any part of the Commonwealth overseas to spend up to twelve weeks in the United Kingdom, meeting British paediatricians and seeing something of their work. Preference will be given to those recently established in an academic career who can arrange their visit to allow attendance at the Annual Meeting of the British Paediatric Association in April 1983.
- B Fellowship B scheme has been discontinued for the time being.
- C To enable a paediatrician from the United Kingdom of Senior Registrar or Consultant status, but in the early years of professional life, to make a short working visit (up to three months) to a centre in a developing country, teaching or conducting research so as to benefit both fellow and hosts.

Applications for these awards must be received by the British Paediatric Association not later than 31st January 1982.

Applications for C Fellowships can be accepted up to 31st January 1982.

The conditions for the Fellowships and application forms may be obtained from the British Paediatric Association, 23 Queen Square, London WC1N 3AZ.

Thanks to Graseby Dynamics, your staff can be where they're needed most.

Even from the other end of a ward, they can hear the audio signal of an MR 10 ... safe in the knowledge that it is virtually immune from false alarms and unaffected by external influences.

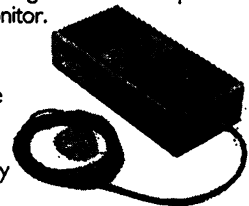

This is because the only point of contact is a tiny disposable pneumatic capsule, taped unobtrusively to the baby's abdomen.

For minimal restriction and maximum safety, lightweight non-kink plastic tubing connects the capsule to a remote battery powered monitor.

The tough lightweight construction of this hand-sized monitor enables it to be used in almost any situation in hospital or the mother's home, with the added security of both audible

and visible signals. **The MR 10 Respiration Monitor**

Thankfully, the unique and economic design ensures continuous monitoring wherever it is needed most, even during transportation.

Graseby Dynamics Ltd
