

Radiometer introduce the second generation of Transcutaneous Blood Gas Systems.

The TCM2 TC OXYGEN MONITOR AND TCM20 TC CARBON DIOXIDE MONITOR are designed with a micro-processor to provide highly accurate tc-Po₂ and tc-Pco₂ values with a minimum of operator handling and a maximum of safety. They feature:

- ★ automatic electrode calibration
- ★ constant electrode temp. check
- ★ automatic instrument check
- ★ six hours' battery operation

Non-Invasive Determination of the O₂ and CO₂ Partial Pressures.

ELECTRODE HANDLING is greatly improved by:

- ★ Snap-on Membrane Units
- ★ modified electrolytes
- ★ soft-rim fixation rings

The TCM200 DATABASE has:

- ★ two chart speeds
- ★ three measuring ranges
- ★ analogue and digital outputs

When detached from the TCM200, the monitors may be battery-operated for 6 hours.

TRAVEL GRANTS FOR PAEDIATRIC RESEARCH

Milupa Limited are prepared to award Travel Grants for young Paediatricians and Scientists working in a Paediatric Department for visits of short duration (normally up to one month) to Departments or Institutes in order to learn new techniques or to have discussions about specific research projects. Preference will be given to candidates wishing to study in the UK but exceptionally, Grants may be made for travel abroad (if the particular technique is not available in the UK).

Applications giving full details of the proposed programme and the names of two referees may be submitted at any time to Mr T. L. Bell, Managing Director, Milupa Limited, Milupa House, Hercies Road, Hillingdon, Uxbridge, Middlesex, UB10 9NA, from whom further particulars may also be obtained. The selection of applicants for awards will be made by an independent Scientific Panel.

Sixth International Symposium of Paediatric Nephrology

The sixth International Symposium of Paediatric Nephrology will be held in Hannover, Fed. Rep. Germany, on August 29—September 2, 1983.

For further information write:

Prof. J. Brodehl, Kinderklinik, Medizinische Hochschule Hannover, Karl-Wiechert-Allee 9, 3000 Hannover 61, Fed. Rep. Germany.

Haemorrhage, Ischaemia and the Perinatal Brain

Karen E. Pape and J. S. Wigglesworth

The authors put forward many new and previously unpublished ideas in an area of major importance in perinatal medicine. A feature of the book is the chapter on the vascular anatomy of the developing brain, which contains extensive new and original work, illustrated in colour. Intended primarily for the paediatrician, it also should be of particular interest to pathologists, obstetricians and others concerned with perinatal care.

and safety
is no concern**

**No need now to sacrifice
efficacy for safety, because
Eumovate fulfils the need
for a corticosteroid
preparation with greater
topical activity than
hydrocortisone, yet
with a wide margin
of safety.**

Eumovate

(clobetasone butyrate)

a unique balance of efficacy and safety

Prescribing information

Uses

Eumovate is suitable for treating the milder forms of eczema, seborrhoeic dermatitis and other steroid responsive skin conditions.

Dosage and administration

Apply up to four times a day until improvement occurs, when the frequency of application may be reduced.

Contra-indications

Bacterial, fungal or viral diseases of the skin.
Hypersensitivity to the preparation.

Precautions

In infants and children, long-term continuous topical corticosteroid therapy should be avoided where possible, as adrenal suppression can occur. In infants, the napkin may act as an occlusive dressing, and increase absorption.

Appropriate antimicrobial therapy should be used concurrently whenever treating inflammatory lesions which have become infected.

Any spread of infection requires withdrawal of topical corticosteroid therapy and, possibly, commencement of systemic chemotherapy.
In patients with severe skin disease, prolonged application to the face is contraindicated.

In general, topical steroids should not be used extensively in pregnancy, i.e., in large amounts or for prolonged periods.

Side effects

In the unlikely event of signs of hypersensitivity appearing, application should stop immediately. If large areas were to be treated, some patients could absorb sufficient steroid to cause transient adrenal depression despite the low degree of systemic activity associated with clobetasone butyrate. Local atrophic changes could occur where moisture increases absorption of steroid, but only after prolonged use.

MANCHESTER UNIVERSITY
POSTGRADUATE MEDICAL STUDIES

Pathology of the Fetus and of the Neonate

A FULL TIME COURSE FOR
PATHOLOGISTS AND PAEDIATRICIANS
IN TRAINING TO BE HELD AT:—

The Stopford Building,
University of Manchester,
Oxford Road, Manchester 13

DATES:—MONDAY, 22nd TO
SATURDAY, 27th MARCH, 1982

The programme covers pathology related to intrauterine and early postnatal life and includes biochemical, genetic and radiological aspects of prenatal diagnosis, teratology and laboratory technique pertinent to a pathological service for this age group.

COURSE FEE = £125.00

(this covers a collection of histological sections)

HANDBOOK OF NEONATAL INTENSIVE CARE

by

H.L. Halliday MD MRCP Consultant
Paediatrician, Royal Maternity Hospital,
Belfast City Hospital, Royal Belfast Hospital
for Sick Children and Mater Infirmorum,
Belfast, N. Ireland.

G. McClure MD FRCP Senior Lecturer,
Department of Child Health, The Queen's
University of Belfast; Consultant
Paediatrician, Royal Maternity Hospital and
Royal Belfast Hospital for Sick Children,
Belfast.

M. Reid MB FRCP Consultant Paediatrician,
Royal Maternity Hospital, Belfast City
Hospital and Royal Belfast Hospital for Sick
Children, Belfast.

Written by three Consultant
Paediatricians, this pocket-sized book
will be helpful to all doctors involved in
the care of the newborn and especially
the resident junior staff on whose
shoulders much emergency care is
borne.

Written in a telegraphic style for easy
reference and access to important
information the book covers a wide range
of topics from high-risk
pregnancy to mother-infant
bonding and follow-up and
specific details of
management are given for
a great variety of neonatal
disorders.
