Taking charge of clinical risk...

Risk management has become a major issue in healthcare, aimed at reducing the probability of patients being harmed during treatment and minimising the subsequent consequences. This timely book is a unique source of reference for managers and clinicians keen to develop effective risk management, containing:

- Practical advice on implementation, the underlying principles, and recognising potential risks
- Chapters on the clinical applications in various specialties, including anaesthesia, obstetrics, paediatrics, and psychiatry
- Contributions from leaders in the field from the UK and USA
- All the information needed to investigate complaints, deal with claims in the optimum way, and reduce the impact of litigation.

The definitive guide to improving the quality of care for your patients

...and other management concerns

Quality and Safety in Anaesthesia
Edited by Jonathan Secker Walker
"It is satisfying to find a text that states what quality in anaesthetic practice is really about."
Today's Anaesthetist
ISBN 0 7279 0828 6
192 pages
UK £16.95;
Overseas £19.00
(BMA members £15.95; £18.00)

Outcomes into Clinical Practice
Edited by Tony Delamothe
A ground-breaking book on outcomes research, focusing on the opportunities to improve clinical effectiveness and set standards for good practice.
ISBN 0 7279 0888 X
169 pages
UK £17.95; Overseas £20.00
(BMA members £16.95; £19.00)

Rationing in Action
Expert advice on the implications of rationing to health providers and their patients.
ISBN 0 7279 0813 8
160 pages
UK £10.95;
Overseas £13.00
(BMA members £9.95; £12.00)

Management for Doctors
Edited by Jenny Simpson and Richard Smith
"An insightful and inspiring guide for any doctor who wants to know and understand more about NHS management."
Journal of the Royal College of Physicians
ISBN 0 7279 0858 8
200 pages
UK £12.95; Overseas £15.00
(BMA members £11.95; £14.00)

Cystic Fibrosis

Edited by Dennis J Shale

Treatment for this disabling disease has undergone major developments, resulting in many sufferers surviving until adulthood. The most up to date book on the subject available, Cystic Fibrosis brings together important research material from international workers in the field, providing physicians and paediatricians with the practical information needed to provide those afflicted with a manageable life style.

Contents include:
- Management of the disease in children and adults
- Genetic origins and implications for treatment
- Lung injury
- Infection
- Transplantation
- Ethical and psychosocial issues.

References:
Give someone with epilepsy a future to look forward to

People with epilepsy have the same aspirations as anybody else. What they need is a treatment which allows them to fulfil their potential.

Whatever the type of epilepsy, Epilim Chrono can help. Effective both in generalized and partial seizures,¹ it is well tolerated (particularly with regard to cognitive function)², and offers patients the convenience of once-daily dosing.

It helps people with epilepsy get on with their lives today, and look forward to tomorrow.
Meet our top consultants

Our revolutionary cartridge pen for the injection of Genotropin® growth hormone is so simple and easy to use that it’s become part of the lives of thousands of children. With success of that kind, how do you top it? Well, we’ve done it by finding out from patients themselves how we can make an even better pen.

And the result is the new Genotropin® Pen - we’ve made it easier to use, even for small children, and that makes it easier for them to keep to their treatment.

Genotropin® (somatropin, rbe) Abbotted Prescribing Information. Genotropin 36 IU, Genotropin 16 IU, Genotropin 4 IU KabiVial Multidose, Genotropin 2, 3, and 4 IU KabiQuick.

Presentation: Genotropin 36 IU Two compartment cartridge for use in either the Genotropin Pen 36 or KabiMixier device. One compartment contains 36 IU somatropin (rbe) in the form of a sterile lyophilised powder. The second compartment contains 0.3% m-cresol in 1mL Water for Injections. Genotropin 16 IU Two compartment cartridge for use in either the Genotropin Pen 16 or KabiMixier device. One compartment contains 16 IU somatropin (rbe) in the form of a sterile lyophilised powder. The second compartment contains 0.3% m-cresol in 1mL Water for injections. Genotropin 4 IU KabiVial Multidose Two compartment cartridge in a reconstitution device. The first compartment contains 4 IU somatropin (rbe) in the form of a sterile lyophilised powder. The second compartment contains 0.3% m-cresol in 1mL Water for injection. Genotropin 2, 3 and 4 IU KabiQuick Two compartment cartridge in single dose syringes for reconstitution and injection. The first compartment contains 2, 3 or 4 IU somatropin (rbe) in the form of a sterile lyophilised powder. The second compartment contains 0.3% m-cresol or 1mL Water for Injections, respectively. Uses: Treatment of growth disturbance due to insufficient secretion of growth hormone or associated with gonadal dysgenesis (Turner Syndrome). Treatment of growth disturbance in prepubertal children with chronic renal insufficiency (CRI). Dosage and Administration: Route of Administration: Subcutaneous Injection. Dosage is individual. Insufficient secretion of growth hormone: generally a dose of 0.5 - 0.7 IU/kg body weight per week (14 - 20 IU/m² body surface area per week) is recommended. Higher doses have been used. Gonadal dysgenesis (Turner Syndrome): a dose of 1 IU/kg body weight per week (28 IU/m² body surface area per week) is recommended. CRI: a dose of 30 IU/m² body surface area per week (approximately 1 IU/kg body weight per week) is recommended. Higher doses may be needed if growth velocity is too low. Dose correction may be required after six months treatment. The weekly dose should be divided into 6 - 7 subcutaneous injections. The injection site should be varied to prevent lipoatrophy. Preparation of Solution: Somatropin (rbe) is reconstituted using the KabiMixer, KabiVial, KabiQuick or Genotropin Pen devices. Instructions on how to effect reconstitution are supplied separately at the specialist growth clinic, as are the Genotropin Pen and KabiMixier devices, and necessary needles. Contra-indications, Warnings etc: Genotropin should not be used when there is any evidence of tumour activity. Intracranial lesions must be inactive and any antitumour therapy completed prior to starting therapy. Genotropin should not be used for growth promotion in patients with closed epiphyses. Precautions: Therapy with Genotropin should be initiated by suitably qualified physicians. In diabetes mellitus, insulin dosage may need adjustment. Thyroid function may be affected and should be monitored periodically. In patients with endocrine disorders, slipped epiphyses of the hip may occur. Some rare cases of benign intracranial hypertension have been reported. In chronic renal insufficiency, renal function should have decreased to below 50% of normal and disturbed growth followed for a year preceding institution of therapy. Conservative treatment for renal insufficiency should have been established and should be maintained during treatment. Treatment should be discontinued after renal transplantation. Pregnancy and Lactation: Clinical experience of use in pregnancy is limited. Treatment should be interrupted if pregnancy occurs. Overdosage: Acute overdose is unlikely, though may lead initially to hypoglycaemia and subsequently to hyperglycaemia. Long-term overdose could result in symptoms consistent with the known effects of growth hormone excess. Side Effects: Common effects are related to transient local skin reactions. Pharmacological Precautions: Store at 2 - 8°C. Protect from light. Once reconstituted Genotropin should be stored in the refrigerator and protected from light. Genotropin 36 IU, Genotropin 16 IU and Genotropin 4 IU KabiVial Multidose in use may be stored for up to 14 days under these conditions. Once reconstituted Genotropin 2, 3 and 4 IU KabiQuick should be used immediately or within 34 hours kept in the refrigerator. Legal Category: POM. Package Quantities: Genotropin 36 IU Pack containing one cartridge for use in the Genotropin Pen 36KabiMixer devices. Genotropin 16 IU Pack containing one cartridge for use in the Genotropin Pen 16KabiMixer devices. Genotropin 4 IU KabiVial Multidose Two compartment cartridge in a reconstitution device. Pack containing one Genotropin 4 IU KabiVial Multidose. Genotropin 2.3 and 4 IU KabiQuick Two compartment cartridge in a reconstitution injection and injection device. Pack containing ten Genotropin 2 IU KabiQuick. Pack containing ten Genotropin 3 IU KabiQuick. Pack containing ten Genotropin 4 IU KabiQuick. Product Licence Numbers and Basic NHS Prices: 36 IU - 00230088, 1 x 36 IU - €774.50, 16 IU - 00230088, 1 x 16 IU - €132.00, 4 IU KabiVial Multidose - 00230088, 1 x 4 IU - €35.00, 2 IU KabiQuick - 00230089, 10 x 2 IU - €160.00, 4 IU KabiQuick - 00230089, 10 x 4 IU - €380.00. Product Licence/Product Authorisation Holder: Pharmacie & Upjohn Ltd., Dave Avenue, Milton Keynes, MK6 3BH. Distributed in Ireland by Cambell May Roberts Ltd. for Pharmacie Ireland Ltd., Pharmatall, Chapelizod, Dublin 20. Further information is available on request from the Product Licence holder. Genotropin, KabiMixer, KabiVial and KabiQuick are registered trademarks. Date of preparation: April 1996. P346/955.

Pharmacie & Upjohn
Journal of Medical Genetics

The first to be devoted specifically to Medical Genetics. It features Original Papers, Short Reports, General Reviews and Conference Reports on all aspects of Medical Genetics, as well as the 'Syndrome of the Month'.

Special Offer! Save 50% on your subscription

Members of major societies including the Clinical Genetics Society, the American Society of Human Genetics and the European Society of Human Genetics qualify for the special annual subscription rate of £98/$180

Research Areas of Special Emphasis

- Molecular Genetics and its Clinical and Cyogenetic Applications
- Dysmorphology: The Delineation and Genetic Basis of New Syndromes
- Fundamental Aspects of Human Genetics
- Development of Medical Genetic Services
- Ethical and Social Aspects of Medical Genetics

Statistics at Square One 9th Edition
T D V Swinco, revised by M J Campbell
This step-by-step guide has helped thousands of readers get to grips with the basic tools of statistics. Now completely revised and expanded it remains the essential primer for students and specialists alike.
- Includes new chapters on survival analysis and design of studies
- Uses examples from medicine to illustrate techniques, such as the 2 test, non-parametric tests and correlation
- Describes the newest techniques, such as stem and leaf plots, box-whisker plots and unequal variance t-tests
- Answers all of the common questions about statistics and offers exercises for self-testing
January 1996 152 pages
UK £8.95; Overseas £11.00
(BMA members £7.95; £10.00)

Medical Statistics on Personal Computers
R A Brown, J Swanson Beck
Explains how to get the best out of software available for analysing statistical data on PCs.
160 pages Second edition 1994
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)

Statistics with Confidence
Martin J Gardner, Douglas C Altman
Gives reasons for using confidence intervals, followed by detailed methods of calculation, including numerous worked examples and specially compiled tables.
156 pages 1989
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)

Confidence Interval Analysis (CIA)
Martin J Gardner, Stephen B Gardner, Paul D Winter
This microcomputer disk with manual can be used alone or with Statistics with Confidence.
Software is available for IBM compatibles on either 5 1/4 or a 3 1/2 inch disk.
82 pages 1989
UK £6.00 Educational establishments, research institutes and the NHS; £4.50 (inc VAT)

Statistics in Practice
Sheila M Gore, Douglas G Altman
107 pages 1982
UK £10.95; Overseas £13.00
(BMA members £9.95; £12.00)
Now you can find the information you really need...

Evidence-Based Medicine

Editors: B Haynes & D Sackett

With 2 million new papers published each year, how can you be sure you read all the papers essential for your daily practice, and how can you be sure of the scientific soundness of what you do read? One answer to this dilemma is practising evidence-based medicine, basing clinical decisions on the best available scientific evidence.

To meet this need the BMJ Publishing Group together with the American College of Physicians is launching a new journal - Evidence-Based Medicine. This new journal is a development of the ACP Journal Club.

Published bi-monthly Evidence-Based Medicine will survey a wide range of international medical journals (at least 70) to identify the key research papers that are scientifically valid and relevant to practice.

Launching in September 1995, Evidence-Based Medicine will:

- use scientific criteria to select the abstracts from the most important papers from the world's leading journals
- select only those papers which have a direct message for practice
- provide commentaries on the abstracts which will make clear the importance of the papers
- supply educational material to teach you about evidence-based medicine
- cover all medical advances that are really important
- cover internal medicine, and the major specialties, including general surgery, paediatrics, obstetrics & gynaecology, psychiatry, general practice, anaesthesiology and ophthalmology.

Annual Subscription Rate (Volume One, 7 issues - 1995-96)

treatment with oral corticosteroids because of the lower risk of systemic effects. Contra-indications, warnings, etc: Contra-indications: Hypersensitivity to any of the ingredients. Special warnings and precautions: Care is needed in patients with pulmonary tuberculosis and oral thrush in the airways. A short course of oral steroids in addition to Pulmicort may be required in patients with excessive mucus in the bronchi. Transfer of patients dependent on oral steroids to Pulmicort demands special care; see data sheet for further details. The nebuliser chamber should be cleaned and dried after every administration. Pulmicort does not affect the ability to drive and use machines. Pulmicort Respules can be mixed with 0.9% saline and with solutions of surfactants, sodium citrate, or potassium bromide. Side-effects: Mild irritation in the throat, coughing and breathlessness and oral candidiasis have been reported. In rare cases microbial resistance may provoke bronchial constriction in hyperactive patients. Facial skin should be washed after use of the face mask: irritation can occur. Coughing can usually be relieved by inhaling a hot vapor (e.g. saturating) 5-10 minutes before inhalation of Pulmicort Respules. Avoid in pregnancy. Pharmaceutical precautions: Store below 30°C. Use within 3 months of opening the foil envelope. Protect from damp and light. Use within 12 hours of opening. Legal status: POM. Basic NHS price: Pulmicort Respules 0.25mg/ml 120 single dose units £52.00. Pulmicort Respules 1.0mg/ml 120 single dose units £44.44. Product licence nos.: Pulmicort Respules 0.25mg/ml PL 0017/0398, Pulmicort Respules 1.0mg/ml PL 0017/0399. Name and address of product licence holder: Astra Pharmaceuticals Ltd., Home Park, Kings Langley. Hemel Hempstead WD4 8QX.
