Cerebral Palsy (CP) is the most prevalent cause of physical disability affecting children in developed countries with an incidence of 2/1000 live births. The risk of hip displacement increases with increasing severity of spasticity, with up to 75% of those with spastic quadriplegia having hip displacement. The intensity of screening increases with increasing gross motor function classification score (GMFCS). The aim of this re-audit was to improve hip surveillance among children with CP following a previous audit in October. A multidisciplinary meeting resulted in a single agreed protocol to improve hip surveillance among children with CP. A pro forma for clinical visits was introduced for all CP children.

### Results

1. **Improved learning and working environment**
2. **Supporting flexible working**
3. **Term time applications**
4. **Patient care and experience**
   - New children’s wards on both hospital sites have modern patient-care facilities & improved staff resources
   - New ‘Welcome Pack’ introduced for all in–patients to paediatric ward
5. **Recognition, being valued and supported**
   - Staff welcome & Congratulations initiative
   - ‘Hello My name is’ section started in the Paediatric Newsletter
   - ‘Learning from excellence’ & ‘Staff of the Month’ projects planned
6. **Communication and team working**
   - New Paediatric Newsletter developed with staff
   - Senior Safety walks implemented
   - ‘What Matters to You’ events

### Conclusion

- The ‘What Matters to You’ conversation is a simple concept that enables discussion to make real improvements to staff and patient experience.
- Senior Managers to consider ‘WMTY’ conversation findings and develop ‘Joy at Work’ agenda

**P143 WHAT MATTERS TO YOU- A STAFF ENGAGEMENT INITIATIVE**

Ahmed Khan*, Breige McCann. Daisy Hill Hospital, SHSCT, Newry, UK

**Background** High levels of staff engagement lead to better patient outcomes and better use of resources, higher patient satisfaction, with more patients reporting that they were treated with dignity and respect.

**Aim**

- To organize a ‘What Matters to You’ events in department of Paediatrics of both Daisy Hill Hospital and Craigavon Area Hospital, SHSCT
- To encourage more meaningful conversations between senior managers & front line staff.

**Method**

- Establish a multi-disciplinary project group
- Arrange a ‘What Matters to You’ (WMTY) event close to the workplace
- Developed a short questionnaire & event posters
- Invite all Paediatric staff in two hospital sites
- Invite Trust senior management team to come and talk to staff and listen to what matters to staff.
- Encourage staff to speak openly about ‘What matters to them’, what they feel ‘they can do’ and discuss ‘what others can do’ to improve staff & patient experience
- Feedback to be used to drive quality improvement agenda

**Results**

- Two ‘What Matters to You’ events was organized during June 2018 on both hospital sites
- Informal coffee morning with group discussions
- Over 50 multidisciplinary staff attended across two sites and openly discussed matters important to front line staff. They also completed a short questionnaire
- Senior management team including Medical–Director, Associate Medical–Director, Assistant Director of Children services attended.
- All questionnaires collected and analyzed.

**Outcome and impact**

- Following Five Key themes identified & subsequent improvement actions taken:
  1) Improved learning and working environment
  2) Work life balance
  3) Patient care and experience
  4) Recognition, being valued and supported
  5) Communication and team working
