

Highlights from this issue

Are children with prolonged fever at a higher risk for serious illness? A prospective observational study

Association between maternal influenza vaccination and neurodevelopmental disorders in childhood: a longitudinal, population-based linked cohort study

Conversion therapy: change the law not the person

Assessing autism spectrum disorder in children with a background of maltreatment: challenges and guidance

Managing challenges in congenital CMV: current thinking

Diagnosing early-onset neonatal sepsis in low-resource settings: development of a multivariable prediction model

Rifampin urinary excretion to predict serum targets in children with tuberculosis: a prospective diagnostic accuracy study

Neurodevelopment, vision and auditory outcomes at age 2 years in offspring of participants in the 'Women First' maternal preconception nutrition randomised controlled trial
