NOTICE TO SUBSCRIBERS.

Subscriptions are payable to the British Medical Association. Address: British Medical Association House, Tavistock Square, London, W.C.1.

NOTICE TO CONTRIBUTORS.

Papers submitted to this journal are accepted on the understanding that they have not been and will not be published in whole or in part in any other journal, and are subject to editorial revision. All papers and other editorial communications should be addressed to Dr. Richard Ellis, Children's Department, Guy's Hospital, London, S.E.1. The author of an original article should make adequate references to previous work on his chosen subject. A full summary of his observations and conclusions must be given.

Articles must be as concise as possible and be typewritten on one side of the paper only, with double spacing and a margin of not less than $1\frac{1}{4}$ in. Only recognized abbreviations should be used. Graphs, charts, tables, and legends for them should be presented on separate sheets and not included in the text. When half-tone reproduction of x-ray illustrations is required, the author is advised to send the original film unless he wishes to bring out special points in a print of his own choice. Photographs and photomicrographs should be printed on glossy paper, should be larger than the size desired for reproduction, and, if transmitted through the post in a tube, should be rolled with the picture outside. With the exception of letters and numbers, which should be lightly written in pencil, everything that is to appear in the reproduction of a graph or chart should be carefully drawn in black ink on tracing linen, or Bristol board, or stout, smooth, white paper.

References should be arranged according to the Harvard system. In the text, the year of publication must follow the author's name, more than one paper in any one year being indicated by a small letter (a, b, c) after the date. No numbering of references is necessary. At the end of the contribution references are arranged in the alphabetical order of the author's names. The reference details are given as follows: Author's name and initials, year of publication (in parentheses), title of periodical (in italics, abbreviated according to the *World List of Scientific Periodicals*), volume number (bold type, Arabic numerals), and first page number (ordinary type, Arabic numerals) thus:

Cowan, J. (1929). *Quart. J. Med.*, **22**, 237.

When a book is referred to, the place and year of publication, edition, and page number should be given.

Contributors will receive one proof in page, but it is assumed that all but verbal corrections have been made in the original manuscript; an allowance at the rate of ten shillings per sheet of sixteen pages is made for alterations in the proof (printer's errors excepted), and contributors will be responsible for any excess.

Fifty free reprints of articles will, if desired, be given to contributors. A limited number of additional reprints at cost price can be supplied if application is made when returning proofs. An estimate of costs will be given on application to the Publishing Manager, British Medical Association.

Papers which have been published become the property of this Journal, and permission to republish must be obtained from the Editors.

Application for advertisement space should be addressed to the Advertisement Manager, British Medical Association, Tavistock Square, London, W.C.1. (Euston 2111).

Subscription 25/- per annum, post free: (20/- to members of the B.M.A.).

SCIENCE AND THE BRITISH MEDICAL ASSOCIATION.

The first of the two chief objects set out in the Memorandum of Association of the British Medical Association is the promotion of the medical and allied sciences, and it may fairly be said that pursuit of the second, namely the maintenance of the honour and interests of the medical profession, directly contributes to the attainment of the first. In the pursuit of its scientific activities, details of some of which are given below, the Association spends each year a considerable portion of its income.

Foremost amongst these activities is the publication of the *British Medical Journal*, with a weekly circulation of over 55,000 copies. The *Journal* serves as a comprehensive record of current developments and a forum for discussion in every field of medical science and professional organization in this country. The Association also publishes quarterly the following Specialist Journals: *British Heart Journal*, *British Journal of Industrial Medicine*, *Journal of Neurology and Psychiatry*, *Annals of the Rheumatic Diseases*. Apart from its periodical publications, the Association from time to time undertakes investigations, whether through special Committees or by the promotion of collective research, and publishes reports on the results. Recent examples of such reports are those on psycho-analysis, tests for drunkenness, mental deficiency, nutrition, fractures, relation of alcohol to road accidents, medical education, physical education, miners' nystagmus, etc. Copies of such reports can be obtained on application to the Secretary, B.M.A. House, Tavistock Square, W.C.1. Notices of investigations actually in progress are published from time to time in the *British Medical Journal*.

In the organization of the Scientific Sections at its Annual Meetings, the Association provides an unrivalled opportunity for discussion of new methods and old difficulties, not only within the confines of small groups of specialists but between specialists and the main body of the profession. British Medical Association Lectures in the Divisions and Branches afford another means of contact between the specialist and the general practitioner, and the regular clinical meetings and discussions arranged by many of the Divisions and Branches are an outstanding feature of the local life of the Association.

For many years the Association has offered Scholarships and Grants to the amount of £1,000 annually to enable approved workers to prosecute research in subjects of their own choice. Besides these annual grants, a number of special Prizes are awarded by the Association, e.g. the Stewart Prize for work on epidemic disease, the Middlemore Prize for work on a prescribed subject in some department of ophthalmic medicine or surgery, the Katherine Bishop Harman Prize for research in the disorders incident to maternity. These prizes are awarded periodically, and notice of pending awards is published in the *British Medical Journal* and elsewhere. In addition, the Association awards annually the Sir Charles Hastings Clinical Prize for systematic observation, research and record in general practice. Particulars of all prizes, scholarships and grants may be obtained on application to the Secretary.

Members are entitled to use the Reading Room at the House of the Association, with its files of periodical medical literature, British and foreign, the Reference Library, and the Circulating Library. The Librarian is always ready to answer enquiries by members, whether personal or postal, and to supply references.

INDEX TO VOLUME XX

A
African children, Severe and prolonged underfeeding in (H. C. Trowell), 110
ALLEN-WILLIAMS, G. M.: Pulse-rate and blood-pressure in infancy and early childhood, 125
ALLIBONE, E. C. (and E. Finch): The measurement of the nutritional level of thiamin in children by the estimation of the urinary excretion, 169
Assessment of health in childhood (Norman B. Capon), 52

B
BARCLAY, Patience E.: Congenital thrombocytopenic purpura, 94
BARLOW, A.: Prognosis in prematurity, 184
BARLOW, Sir Thomas, A handlist of the writings of (A. White Franklin), 50
BARLOW, Thomas (1845-1945) (Sir Robert Hutchison, Bt.), 49
Belgian children, Growth and health of (Richard W. B. Ellis), 97
Bilateral adrenal hypertrophy in infancy (M. O. Skelton), 135
BINGHAM, Kaitilin (and Helen M. M. Mackay and R. H. Dobbs): The effect of national bread, iron medicated bread, and of iron cooking utensils on the haemoglobin level of children in war-time day nurseries, 56
Blood pressure and pulse-rate in infancy and early childhood (G. M. Allen-Williams), 125
BODIAN, M.: Penicillin, its dosage and administration in infants, 185
Bread, national, effect of, and iron medicated bread and of iron cooking utensils on the haemoglobin level of children in war-time day nurseries (Helen M. M. Mackay, R. H. Dobbs and Kaitilin Bingham), 56
Breast feeding, The value of (psychological) (D. W. Winnicott), 186
BRITISH PAEDIATRIC ASSOCIATION: Proceedings of the Sixteenth Annual General Meeting. Statistics of prematurity (J. L. Henderson), 184; Prognosis in prematurity (A. Barlow), 184; Statistics of pyloric stenosis (G. Davison), 185; Congenital malformations of the heart associated with lower chest recession (A. E. Naish), 185; Preliminary observations on serum protein values in infancy (R. Pugh), 185; Penicillin, its dosage and administration in infants (M. Bodian), 185; An experiment in control of neonatal infections in a maternity hospital (J. C. Spence), 186; The value of breast feeding (psychological), (D. W. Winnicott) 186; Tuberculous infection in patients admitted to a general children's ward (A. G. Watkins), 186; Vitamin D treatment of rheumatoid arthritis (F. J. Ford), 186; Tuberculous rheumatism (W. Sheldon), 187; The organization of out-patients in a children's hospital (K. D. Wilkinson), 187

C
CAPON, Norman B.: The assessment of health in childhood, 52
Cardiac complications in scarlet fever (C. Neubauer), 81
Century of changes in the mortality and incidence of the principal infections of childhood (A. H. Gale), 2
Clinical Material of health in paediatrics, where to get it, and how to use it (Charles McNeil), 151
Congenital hemi-atrophy (Lilly H. Zondek), 35
Congenital malformations of the heart associated with lower chest recession (A. E. Naish), 185
Congenital malformation of the heart in one of identical twins (Kathleen McClintock), 47
Congenital thrombocytopenic purpura (Patience E. Barclay), 94
COOPER, Edward C. Ross: Penicillin in infections of infancy, 117
CRUICKSHANK, Robert: Infection in infancy, 145
Cystic fibrosis of the pancreas (W. Douglas Henderson), 179

D
DAVISON, G.: Statistics of pyloric stenosis, 185
Decrease of serum cholesterol ester in haemolytic disease of the newborn (Arne Rothe-Meyer and Evelyn M. Hickmans), 160
Diagnosis of chronic intussusception in children (J. M. Garvie and F. H. Kemp), 73
Diarrhoea, Infantile (Patria Gairdner), 22

DOBBS, R. H. (and Helen M. M. Mackay and Kaitilin Bingham): The effect of national bread, iron medicated bread, and of iron cooking utensils on the haemoglobin level of children in war-time day nurseries, 56
DONALDSON, G. M. (and Harold Scarborough): Toxic thrombocytopenic purpura following local sulphathiazole therapy, 69
Dwarfism, Renal (M. L. Thomson and Vera K. Wilson), 32

E
Effect of national bread, of iron medicated bread, and of iron cooking utensils on the haemoglobin level of children in war-time day nurseries (Helen M. M. Mackay, R. H. Dobbs and Kaitilin Bingham), 56
ELLIS, Richard W. B.: Growth and health of Belgian children, 97
Experiment in control of neo-natal infections in a maternity hospital (J. C. Spence), 186

F
FINCH, E. (and E. C. Allibone): The measurement of the nutritional level of thiamin in children by the estimation of the urinary excretion, 169
FINDLAY, Leonard: The fragility of the red cell to hypotonic saline in infancy and childhood, 64
FORD, F. J.: Vitamin D treatment of rheumatoid arthritis, 186
Fragility of the red cell to hypotonic saline in infancy and childhood (Leonard Findlay), 64
FRANKLIN, A. White: A handlist of the writings of Sir Thomas Barlow, 50

G
GAIRDNER, Patria: Infantile diarrhoea, 22
GALE, A. H.: A century of changes in the mortality and incidence of the principal infections of childhood, 2
GARVIE, J. M. (and F. H. Kemp): The diagnosis of chronic intussusception in children, 73
Growth and health of Belgian children (Richard W. B. Ellis), 97
GUTHRIE, Katharine J.: Idiopathic muscular hypertrophy of oesophagus, pylorus, duodenum and jejunum in a young girl, 176

H
Haemolytic disease of the newborn, decrease of serum cholesterol ester in (Arne Rothe-Meyer and Evelyn M. Hickmans), 160
Handlist of the writings of Sir Thomas Barlow (A. White Franklin), 50
Health in paediatrics, Clinical Material of, where to get it and how to use it (Charles McNeil), 151
Heart, Congenital malformation of associated with lower chest recession (A. E. Naish), 185
Heart, Congenital malformation of the, in one of identical twins (Kathleen McClintock), 47
Hemi-atrophy, Congenital (Lilly H. Zondek), 35
HENDERSON, W. Douglas: Cystic fibrosis of the pancreas, 179
HENDERSON, J. L.: Statistics of prematurity, 184
Hepatomegaly, Splenomegaly and, in an adolescent simulating Banti's syndrome (A. F. MacCabe and W. G. Taaffe), 138
HICKMANS, Evelyn M. (and Arne Rothe-Meyer): Decrease of serum cholesterol ester in haemolytic disease of the newborn, 160
HIGGINS, Ian: Spontaneous pneumothorax in infancy, 141
HUTCHISON, Sir Robert, Bt.: Thomas Barlow (1845-1945), 49
Hypertension Malignant, Pyelonephritis and ulceration of small intestine in a child (J. Edgar Morison), 90
Hypertrophy, Bilateral adrenal in infancy (M. O. Skelton), 135

I
Idiopathic muscular hypertrophy of oesophagus, pylorus, duodenum and jejunum in a young girl (Katharine J. Guthrie), 176
Infantile diarrhoea (Patria Gairdner), 22
Infection in infancy (Robert Cruickshank), 145
Intussusception, Chronic, diagnosis of, in children (J. M. Garvie and F. H. Kemp), 73

- J**
 JACOBY, N. M. (and L. Sagorin): Osteomyelitis of the jaws in infancy treated with penicillin, 166
 Jaws, Osteomyelitis of the, in infancy treated with penicillin (N. M. Jacoby and L. Sagorin), 166
- K**
 KEMP, F. H. (and J. M. Garvie): The diagnosis of chronic intussusception in children, 73
 KRESTIN, David: The results of routine prophylaxis and treatment of rickets in war-time nurseries, 28
- L**
 LANGLEY, F. A.: The nature of Still's disease with report of a case 155
 LEYS, Duncan: Paroxysmal tachycardia in infancy, 44
- M**
 MACCABE, A. F. (and W. G. Taaffe): Splenomegaly and hepatomegaly in an adolescent simulating Banti's syndrome, 138
 MCCLINTOCK, Kathleen: Congenital malformation of the heart in one of identical twins, 47
 MACKAY, Helen M. M. (R. H. Dobbs and Kaitilin Bingham): The effect of national bread, of iron medicated bread, and of iron cooking utensils on the haemoglobin level of children in war-time day nurseries, 56
 MCNEIL, Charles: The Clinical Material of health in paediatrics, where to get it, and how to use it, 151
 Measurement of the nutritional level of thiamin in children by the estimation of the urinary excretion (E. C. Allibone and E. Finch), 169
 MORISON, J. Edgar: Pyelonephritis, malignant hypertension and ulceration of small intestine in a child, 90
