ABSTRACTS OF WORLD MEDICINE

A monthly journal of informative abstracts—covering every important article published in over 1,600 medical periodicals throughout the world—dealing in each issue with a comprehensive range of subjects.

FOR THE SPECIALIST to keep him informed of work in progress in other fields as well as his own.

FOR THE GENERAL PRACTITIONER to enable him to keep abreast of new developments in every branch of medicine.

FOR THE POSTGRADUATE STUDENT to give him a synoptic view of current progress and a guide to further reading.

FOR THE MEDICAL LIBRARY to provide an invaluable supplement to its existing resources.

A specimen copy may be obtained free from the Publishing Manager

COMBINED ACTION

Because the B vitamins appear to act synergistically, many doctors, when prescribing these vitamins, prefer to recommend a natural source which supplies the essential factors together.

As a dietary source of the B vitamins Marmite has been found to be particularly useful, since it supplies riboflavin (1.5 mg. per oz.) and nicotinic acid (16.5 mg. per oz.) as well as folic acid, pantothenic acid, pyridoxin, biotin, choline, inositol and p-aminobenzoic acid. Marmite can be incorporated in the diet in a variety of ways and it is therefore easy to administer adequate quantities.

MARMITE yeast extract

Obtainable from Chemists and Grocers
