

EMERGENCIES IN GENERAL PRACTICE

This book comprises 57 specially commissioned articles on medical emergencies which appeared originally in the *British Medical Journal*.

Contents include haemorrhage and thrombosis, cardio-respiratory crises, anaesthesia and hazards of therapy, acute abdominal cases, obstetrics, fits and coma, electrocution, burns and gassing, poisoning, acute psychiatric states, and special and minor surgery.

Invaluable to all doctors everywhere.

470 pages, cloth bound with full index. 25s. net (by post—inland and overseas 26s. 9d.).

CLINICAL PATHOLOGY IN GENERAL PRACTICE

This handbook on clinical pathology meets the needs of the general practitioner, the houseman, and the senior student. It contains thirty-nine articles comprising a series specially written for the *British Medical Journal*. Each article has been revised and brought up-to-date by its author. The book gives authoritative information on available laboratory facilities; reliable tests and which to use; techniques for collecting and preserving specimens; interpretation of results and significance of abnormal findings.

321 pages. Price 21s. (by post—inland and overseas 22s. 3d.).

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Second Collection

Third Collection—with
Classified Contents List
to volumes 1, 2 and 3

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable textbooks.

25s. each (by post—inland and overseas 26s. 9d.).

"ANY QUESTIONS?"

Second Series

Third Series—with
Cumulative Index

These pocket-size volumes each contain some 200 questions and expert answers from the "Any Questions?" pages of the *British Medical Journal*. Each answer has been chosen for its practical value to doctors in their day-to-day work. Many deal with subjects not covered in the standard textbooks.

The Third volume has a cumulative index to all the answers appearing in the three books in the series.

7s. 6d. each (by post 8s. 3d.).

Just Published

New (7th) Edition

NELSON'S TEXTBOOK OF PEDIATRICS

By 79 Leading Authorities. Edited by WALDO E. NELSON
Professor of Pediatrics, Temple University School of Medicine

£5 15s. 6d. (approx.)

The new (7th) edition of this world famous work gives you a complete and up-to-date picture of how to keep the well child healthy; and how to diagnose and treat the diseases of infancy and childhood.

New contributors, new material and 115 new illustrations have been added to make this new (7th) edition as up to the minute as possible. Among the sections that have been *entirely rewritten* in the light of present day advances are those on: The Newborn Infant; the Nervous System; Fluid Therapy; The Cardiovascular System; and Diseases of the Blood. *New chapters* have been added on such problems as: sub-acute sclerosing leuko-encephalitis—infections by enteric viruses (enteroviruses)—tropical eosinophilia—kala-azar—pulmonary ventilation in health and disease—mesenchymal diseases.

Whether you treat children regularly or only occasionally, you'll find that "Nelson" has an effective answer to every paediatric problem you are likely to encounter.

CHILD HEALTH AND WELFARE

Ready in June

THE CHILD WITH ABDOMINAL PAINS

By J. APLEY, M.D., M.R.C.P. 80 pages, about 8s. 6d.

This small book should prove of great value to general practitioners, paediatricians, and indeed to all doctors who deal with children. It presents a helpful and comprehensive approach to a very common and often baffling disorder. It also puts in perspective some related disorders of childhood and of adult life. There is much new and interesting information, based on wide experience and carefully controlled observations. The case histories make fascinating reading. Clear guidance is given on diagnosis, and treatment is set out simply. Rational diagnosis and treatment are of great importance, because without them many children do *not* "grow out of" the disorder.

OXYGEN SUPPLY TO THE HUMAN FOETUS

A C.I.O.M.S. Symposium, edited by JAMES WALKER with the assistance of A. C. TURNBULL. *Consulting editors:* CLEMENT A. SMITH and DONALD BARON. 304 pages, fully illustrated, about 35s.

This book contains the edited proceedings of a Symposium attended by an international group of respiratory physiologists, clinical paediatricians and obstetricians, each an expert in his field. The full range of current experimental work is presented, and is analysed and criticized from the experimental, technical, physiological and technical viewpoints. The result is an essential basic text for the research worker and clinician in this rapidly expanding area of knowledge.

THE CHILD WITH A HANDICAP

Edited by EDGAR E. MARTMER, M.D., with 27 Contributors. 434 pages, 44 illustrations, 82s. 6d.

Twenty-seven specialists in various areas of child care have combined their talents in showing how to recognize handicapped children, what the handicap is, its cause, and—most important of all—what can be done for such an individual to enable him to live with or overcome his handicap.
