With its Liquor Carbonis Detergens constituent, Wright's Coal Tar Soap is indeed the perfect antiseptic—safeguarding a doctor's hands against infection and keeping them soft and smooth. Such a soap might so easily have been entirely 'medical'. MARMITE

yeast extract

***nutrition
in infancy***

contains
RIBOFLAVIN (vitamin B₂) 1.5 mg. per oz.
NIACIN (nicotinic acid) 16.5 mg. per oz.

Malnutrition in infancy presents a serious problem in many tropical countries. Nutritional deficiencies during this period of rapid growth not only cause morbidity among young children, but also undermine the health of the individual in later life. Anaemia, marasmus and kwashiorkor are some of the common nutritional disorders of early childhood. Although lack of protein is considered responsible for much ill-health among infants, vitamin deficiencies are also prevalent.

Marmite yeast extract supplies every known member of the vitamin B complex and, within the limits of the amount consumed, it is a useful source of predigested protein. It can be given to babies from birth and has been particularly recommended for infants that are not thriving.
