Nelson, Vaughan & McKay: TEXTBOOK OF PEDIATRICS (Ninth Edition)

By 81 authorities. Edited by Waldo E. Nelson, M.D., D.Sc.(Hon.), Professor of Pediatrics, Medical College of Pennsylvania and Temple University School of Medicine. Associate Editors: Victor C. Vaughan, III, M.D., Professor and Chairman, Department of Pediatrics, Temple University School of Medicine; and R. J. McKay, M.D., Professor and Chairman, The University of Vermont College of Medicine.

1590 pages. 527 illustrations. August 1969. £9.15.

PEDIATRIC CONFERENCES WITH SYDNEY GELLIS

Directed by Sydney S. Gellis, M.D., Professor and Chairman, Department of Pediatrics, Tufts University School of Medicine; Pediatrician in Chief, Boston Floating Hospital for Infants and Children.

Available only by yearly subscription of six C-60 two-track one-hour tape cassettes. Includes storage case £22.22.

Gellis & Kagan:

CURRENT PEDIATRIC THERAPY 5

273 contributors. By Sydney S. Gellis, M.D., Professor and Chairman, Department of Pediatrics, Tufts University School of Medicine; and Benjamin M. Kagan, M.D., Director, Department of Pediatrics, Cedars of Lebanon Hospital, Division of Cedars-Sinai Medical Center.

785 pages. October 1971. £10.65.

Naiman:

PEDIATRIC HEMATOLOGY

By J. Lawrence Naiman, M.D., St. Christopher's Hospital for Children, Philadelphia.

Booklet: 53 pages. Filmstrips: Three 35 mm filmstrips (94 full-colour frames) and two C-60 tape cassettes. June 1972. £30.45.

Smith & Wilson:

THE CHILD WITH DOWN'S SYNDROME (MONGOLISM)

By David W. Smith, M.D., Dysmorphology Unit, Department of Pediatrics, University of Washington Medical School; and Ann C. Wilson, St. Louis.

About 120 pages. Illustrated. Ready February 1973. Approximately £2.50.

Talbot, Kagan & Eisenberg:

BEHAVIORAL SCIENCE IN PEDIATRIC MEDICINE

By Nathan B. Talbot, M.D., Charles Wilder Professor of Pediatrics; Jerome Kagan, M.D., Professor of Human Development; and Leon Eisenberg, M.D., Professor of Psychiatry, all of the Harvard Medical School.

467 pages. Illustrated. October 1971. £7.25.

Schaffer & Avery:

DISEASES OF THE NEWBORN (Third Edition)

By Alexander J. Schaffer, M.D., Associate Professor Emeritus of Pediatrics, The Johns Hopkins University School of Medicine, and Pediatrician to the Johns Hopkins Hospital, Baltimore; and Mary Ellen Avery, M.D., Professor and Chairman, Department of Pediatrics, Faculty of Medicine, McGill University, and Physician-in-Chief, Montreal Children's Hospital.

919 pages. 353 illustrations. October 1971. £11.70.

W. B. Saunders Company Ltd. 12 Dyott Street, London WC1A 1DB.

If you haven't already received a leaflet on these publications, and you would like one, please write to our promotion department.

Gardner:

ENDOCRINE AND GENETIC DISEASES OF CHILDHOOD

By 57 authorities. Edited by Lytt I. Gardner, M.D., Professor of Pediatrics, State University of New York, Upstate Medical Center, Syracuse.

1072 pages. 415 illustrations. February 1969. £14.45.

Polgar & Promadhat:

PULMONARY FUNCTION TESTING IN CHILDREN

By George Polgar, M.D., Associate Professor of Pediatrics and Physiology, School of Medicine, University of Pennsylvania; and Varuni Promadhat, M.D., Research Fellow, Children's Hospital of Philadelphia.

273 pages. 112 illustrations. February 1971. £9.15.

Tachdjian:

PEDIATRIC ORTHOPEDICS

By Mihran O. Tachdjian, M.S., M.D., Associate Professor of Orthopedic Surgery, Northwestern University Medical School.

Two-volume set. Volume I: 766 pages. 1215 illustrations on 354 figures. Volume II: 1001 pages. 1810 illustrations on 453 figures.

December 1972. Set: £27.65. Single volume: £13.85.

Kendig:

DISORDERS OF THE RESPIRATORY TRACT IN CHILDREN:

Volume I: Pulmonary Disorders in Children
(Second Edition)

Edited by Edwin L. Kendig, Jr., M.D., Professor of Pediatrics, Medical College of Virginia; Director, Child Chest Clinics, Medical College of Virginia Hospitals.

852 pages. 354 illustrations. August 1972. £13.85.

Ferguson & Kendig:

DISORDERS OF THE RESPIRATORY TRACT IN CHILDREN

Volume II: Pediatric Otolaryngology
(Second Edition)

Edited by Charles F. Ferguson, M.D., Instructor of Otolaryngology, Harvard Medical School; Otolaryngologist, Children's Hospital Medical Center, Consultant Peter Bent Brigham Hospital, Boston; and Edwin L. Kendig, Jr., M.D., Professor of Pediatrics, Medical College of Virginia Hospitals.

517 pages. 313 illustrations. December 1972. £10.65.

Smith:

THE CRITICALLY ILL CHILD

Edited by Clement A. Smith, M.D., Editor of 'Pediatrics', Boston.

276 pages. Illustrated. October 1972. £5.00.

Bakwin & Bakwin

CLINICAL MANAGEMENT OF BEHAVIORAL DISORDERS IN CHILDREN (Fourth Edition)

By Harry Bakwin, M.D., Professor of Clinical Pediatrics, NYU, Visiting Physician, Bellvue Hospital; and Ruth Morris Bakwin, M.D., Professor of Clinical Pediatrics, NYU, Visiting Physician, Bellvue Hospital, Director Emeritus, Department of Pediatrics, NY Infirmary.

714 pages. Illustrated. June 1972. £7.45.

CRESCORMON[®]

human growth hormone for pituitary dwarfism

Growth hormone is species-specific.
CRESCORMON[®] (Human Growth Hormone Kabi)
is prepared from human pituitary glands.
(*Biochim, Biophys. Acta, 74, 525, 1963*).

Only carefully selected material is used ; the homogeneity of the resultant highly purified human growth hormone is checked and its potency is assayed by double antibody radioimmune and biological techniques.

Treatment with CRESCORMON[®] results in accelerated growth velocity, most marked during the first month, and corresponding to age over the first year.

No adverse reactions have been observed, though in a few patients a low titre of antibodies has developed.

Product Licence No. 0022/0020

*CRESCORMON[®] is manufactured by AB Kabi, Stockholm, Sweden,
and is available in the U.K. only from:*

Kabi Pharmaceuticals Limited,
Bilton House, Uxbridge Road,
Ealing, London W5 2TH.
Telephone : 01-567 4717 or 01-579 1871

Radiological Diagnosis of Digestive Tract Disorders in the Newborn

**B. J. Cremin, D(Obst), RCOG, MCRA, FFR;
S. Cywes, MMed(Surg); J. H. Louw, ChM, FRCS**

This is the result of the combined ideas of a radiologist who has specialized in this field and of two surgeons who have contributed significantly to progress in paediatric surgery. It deals mainly with conditions which present in the first few weeks of life—emergencies which if misdiagnosed can result in death or permanent disability.

Clearly illustrated, it supplies all the information needed by those who deal with alimentary disturbances in the newborn infant.

NEW BOOKS FROM BLACKWELL**Common Symptoms of Disease in Children**

R. S. Illingworth, M.D., F.R.C.P., D.P.H., D.C.H. *Fourth Edition*, March 1973. 336 pages, 4 illustrations. About £3.25.

Professor Illingworth has made a complete revision of this book, resulting in literally hundreds of changes and alterations. Of the third edition, the *British Journal of Hospital Medicine* wrote: 'For a book that is neither specifically concerned with medical advances nor examination candidates it is an extraordinary achievement that a third edition should be called for within four years of first publication... I have no doubt that the third edition will enjoy the same deserved success as its predecessors.'

Paediatric Neurosurgery

Kenneth Till, M.A.(Cantab.), M.B., B.Ch.(Cantab.), L.R.C.P.(Lond.), F.R.C.S.(Eng.). Summer 1973. 288 pages, 150 illustrations. About £6.00.

Introduction to Developmental Assessment

R. S. Illingworth, M.D., F.R.C.P., D.P.H., D.C.H. Summer 1973. 64 pages, 88 illustrations. Paper, about £1.00

Lecture Notes on Paediatrics

S. R. Meadow, M.A., M.R.C.P., D.C.H., and R. W. Smithells, M.B., F.R.C.P., F.R.C.P.(E), D.C.H. Summer 1973. 224 pages, 55 illustrations. Paper, about £1.50.

This book provides a broad framework of paediatrics for medical students, and contains enough factual information for the final M.B. qualifying examination. Emphasis is placed on the common problems of childhood, and their relationship to growth and development. Since most students are more familiar with adult patients, priority is given to the special skills and knowledge required to deal with the sick child.

Paediatric Fluid Therapy

F. Harris, M.D., M.Med.(Paed.), M.R.C.P.(Edin.). 1972. 160 pages, 11 illustrations. Paper, £2.25.

Practical Neonatal Paediatrics

R. J. L. Brown, M.B., F.R.C.P., D.C.H., and H. B. Valman, M.B., M.R.C.P., D.C.H., D.R.C.O.G. *Second Edition*, Summer 1973. 104 pages, 3 illustrations. Paper, about £1.50.

Problems of the Newborn

from the *BRITISH MEDICAL JOURNAL*

Many doctors outside the neonatal and paediatric field may be unaware of the rapid advances made in the care of the newborn in the last decade. Last year the *B.M.J.* published a series of articles discussing the diagnosis and management of common conditions affecting newborn babies. The articles have been revised by their authors and collected together as a booklet, forming a useful guide to both serious problems and more everyday topics which confront doctors in their practice.

Metabolic Aspects of Disease

Treatment of inborn errors has advanced our basic knowledge of disease. Metabolic problems are also a frequent consequence of disease.

Day-time variations in serum phenylalanine (triangles) and tyrosine (circles) in a phenylketonuric child having his first meal as usual at 07.45 hours or fasting until 11.45 hrs. Note the phenylalanine depressing effect of the breakfast (phenylalanine-restricted meal with Albumaid (R) (Güttler, Olesen & Wamberg—Kennedy Institute—Denmark in *Enzymopenic Anaemias, Lysosomes and other papers*, pages 149-158 E. & S. Livingstone.)

PRECISION PRODUCTS:

Designed to meet the metabolic defect are called for.

Products more fundamental than enzymes.

Products more basic than protein.

Products which enable precise nutrition

Products which succeed where cows' milk is a failure.

PRECISION PRODUCTS FOR:

- Phenylketonuria, Homocystinuria,
- Cystinosis, Maple Syrup Urine Disease
- Hyperglycinaemia, Hyperprolinaemia,
- Arginine Succinic Urea,
- Histidinaemia, Tyrosinosis,
- Carbohydrate and Protein Intolerance,
- Malabsorptions, Cystic Fibrosis,
- Glycogen Storage Disease.

MILNER SCIENTIFIC AND MEDICAL RESEARCH

Now maintains a world-wide interest in every aspect of metabolism in disease, and products are directly available in most countries.
