## **CHARLES C THOMAS · PUBLISHER**

MAJOR PROBLEMS IN CHILDHOOD CANCER edited by Carl Pochedly, Nassau County Medical Center, East Meadow, Long Island, New York, and Thomas F. Necheles, Tufts Univ. School of Medicine, Boston. Foreword by Sydney S. Gellis. (11 Contributors) Prognostic improvement is predicated on the close cooperation between the primary physician and the hematologist, oncologist, the radiotherapist and the surgeon. This material was selected on the basis of its clinical relevance and its value to the practitioner. '73, 392 pp., 90 il., 16 tables, \$14.75

MENTAL DEVELOPMENT EVALUATION OF THE PEDIATRIC PATIENT by Lawrence C. Hartlage and David G. Lucas, both of Indiana Univ. Medical Center, Indianapolis. This volume has been developed for use as a reference source for quickly assessing a given child's level of mental development in cognitive, perceptual-motor, language and academic areas. The book contains comprehensive screening items which can be used for children from ages two through nine, and provides guidelines for the use of ancillary personnel for much of the screening process. Child psychiatrists, pediatricians, psychologists, educators and others will find this text useful. '73, 92 pp., 36 il., \$6.50

POISONING: Toxicology-Symptoms-Treatment (3rd Ed.) by Jay M. Arena, Duke Univ. Medical Center, Durham, North Carolina. In this new edition, substantial changes have been made in all sections, and many new items are included for the first time such as tricyclic drugs, methadone, naloxone hydrochloride, drugs and chemicals in breast milk, methyl mercury in fish and humans, polychlorinated biphenyl, pentachlorophenol, isoniazid, animal poisons, a table of signs and symptoms of poisoning and many other additional tables and materials. This book provides the basic information for life-saving measures. '74, 832 pp. (7 x 10), 26 il. (1 in full color), 123 tables, \$39.50

THE HUMAN FETAL AND NEONATAL CIRCULATION: Function and Structure by S. Zoe Walsh, Karolinska Hospital and Institute, Stockholm, Sweden; W. W. Meyer, Univ. of Mainz, Federal Republic of Germany; and John Lind, Karolinska Hospital and Institute, Stockholm, Sweden. Based upon anatomic and physiologic studies, this extensively illustrated monograph details the changes that occur at birth. This text will serve well both for teaching purposes and as a reference for obstetricians, pediatricians and all physicians concerned with care and management of newborn infants. '74, 368 pp. (7 x 10), 275 il. (68 in full color), 22 tables, \$15.00

The Teacher's and Doctor's Guide to a Practical Approach to LEARNING PROBLEMS by Robert N. Pavy and Jean V. Metcalfe. This book is written for the child's teacher and doctor who are usually the first professionals to be aware of and required to deal with the child's learning problems. Presented are questions and answers and the areas to explore in seeking information as to the causes of the problems and their resolutions. This guide will help resolve the child's learning problems. '74, 84 pp., cloth-\$6.95, paper-\$4.25

LEUKEMIA IN CHILDHOOD by Andre D. Lascari, Southern Illinois Univ. School of Medicine, Springfield, Illinois, Foreword by Donald Pinkel. This text is an in-depth clinical presentation which covers all aspects and types of leukemia occurring in childhood including rare and unusual manifestations and complications. Topics discussed include preleukemia, morphologic diagnosis, differential diagnosis, special features, nervous system, infections, unusual forms of leukemia and other areas. Also a lengthy chapter on treatment discusses current forms of therapy for all known forms of leukemia in childhood. '73, 504 pp., 54 il. (6 in full color), \$16.75

# THERE ARE AROUND 300,000 REASONS FOR CONSIDERING RIVOTRIL IN EPILEPSY

Rivotril is an important new benzodiazepine derivative for the treatment of *all* clinical forms of epileptic disorder. The majority of epileptic patients – there are about 300,000 in the UK – are maintained with several drugs, a considerable number of which exhibit severe side-effects and pose real problems in overdosage.

That an anticonvulsant drug should be a benzodiazepine with low toxicity, be remarkably free from serious side-effects, 2.3.4.5 have a rapid onset of action and be compatible with other anticonvulsants a major breakthrough.

### Rivotril is such a drug.

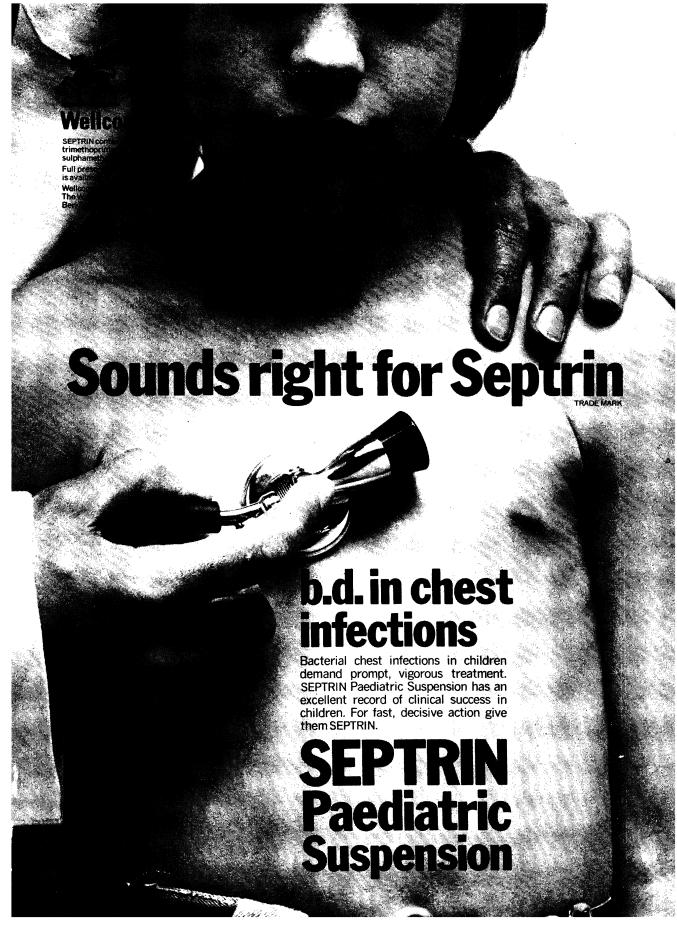

- **66**The effect of [Rivotril] on grand mal is remarkable . . . in the majority of patients the favourable effect was indisputable.
- **66**Clonazepam [Rivotril] is particularly effective in cases of petit mal, and the results of treatment are certainly comparable with those achieved with other currently-used anticonvulsant drugs. **97**<sup>2</sup>

# Metabolic Aspects of Disease

Treatment of inborn errors has advanced our basic knowledge of disease. Metabolic problems are also a frequent consequence of disease.

Day-time variations in serum phenylalanine (triangles) and tyrosine (circles) in a phenylketonuric child having his first meal as usual at 07.45 hours or fasting until 11.45 hrs. Note the phenylalanine depressing effect of the breakfast (phenylalanine-restricted meal with Albumaid (R) (Güttler, Olesen & Wamberg—Kennedy Institute—Denmark in Enzymopenic Anaemias, Lysosomes and other papers, pages 149-158 E. & S. Livingstone.)

**PRECISION PRODUCTS:** 

Designed to meet the metabolic defect are called for.

Products more fundamental than enzymes.

Products more basic than protein.

Products which enable precise nutrition.

Products which succeed where cows' milk is a failure.

### PRECISION PRODUCTS FOR:

Phenylketonuria, Homocystinuria, Cystinosis, Maple Syrup Urine Disease Hyperglycinaemia, Hyperprolinaemia, Arginine Succinic Urea, Histidinaemia, Tyrosinosis, Carbohydrate and Protein Intolerance, Malabsorptions, Cystic Fibrosis, Glycogen Storage Disease.

### MILNER SCIENTIFIC AND MEDICAL RESEARCH

Now maintains a world-wide interest in every aspect of metabolism in disease, and products are directly available in most countries.
