

Atopic Allergy?

a hereditary predisposition?

"In children with a double parental history of atopic disease the incidence of such disease was higher than in children with a single such heredity in whom, however, the incidence was higher than in children without any parental history of atopic disease."

When history and examination are equivocal the use of IgE as a parameter for atopic allergy either for diagnostic or predictive purposes should be decisive.

Kjellman, N-I Max: Immunoglobulin E and Atopic Allergy in Children. Linköping University Medical Dissertations 36, 1976.

Phadebas IgE PRIST[®]

(Paper Radio Immuno Sorbent Test)

The test to predict atopic allergies in children.

BRITISH COUNCIL COURSE

PERINATAL PAEDIATRICS

10-22 June 1979

Dr David Harvey, Senior Lecturer in Paediatrics at the Institute of Obstetrics and Gynaecology will be Director of Studies for this course which aims to bring participants up to date by reviewing recent advances and growing points in the subject of perinatal paediatrics by means of lectures, discussion groups, visits to neonatal intensive care units and other relevant departments such as ultra sonic scanning. There will also be an exhibition of equipment used in Britain.

The course, to be held in London, is designed for *non UK citizens* who are Senior Paediatricians in charge of neonatal intensive care units and at Senior Obstetricians.

Information and forms for registration may be obtained from local overseas Representatives of the British Council or from Courses Department, The British Council, 65 Davies Street, London W1Y 2AA.

Application forms should be in London by 31 January 1979.

Demi-pension fee £465.

A new cutaneous pO₂ monitor from Kontron

This new technique is being used on an increasing scale to supplement blood gas analysis of high-risk neonates by continuously monitoring and recording cutaneous pO₂ via a temperature-stable, non-invasive sensor.

Features of the new instrument include:

- ✿ Built in chart recorder
- ✿ Dual temperature setting for sensor 43°C or 44°C
- ✿ Rapid response to changes in oxygen partial pressure
- ✿ Maximum/minimum alarm call

For demonstrations and full information about this Monitor, please complete the slip below and post to Dr. Peter Hargreaves, Kontron Instruments Limited, PO Box 188, Watford WD2 4YX, or telephone Dr. Hargreaves at Watford (0923) 47666.

Please contact me to arrange a demonstration of the Kontron pO₂ Monitor*

Please send me further information about the pO₂ Monitor*

Remembering Henry

Edited by Stephen Lock and Heather Windle

*A man of stature—in all ways—Henry Miller occupied a large part in many people's lives and his death in 1976 left a large gap. Though a neurologist of world renown he was best known in the North-East, where he spent most of his life, and where, for the last eight years of it, he was Vice-Chancellor of the University of Newcastle upon Tyne. A cross-section of his many friends and colleagues have contributed their reminiscences to **Remembering Henry** and, as each person saw him from a different angle, those who did not know him will find that the whole man gradually comes to life. Professor John Walton has written the introduction, three of Henry Miller's best-known articles are included (writing was his first interest after neurology), and there is a bibliography of his prolific publications. A fitting tribute, **Remembering Henry** may fill some of the gaps for those who have stayed behind. Profits from the book will be given to the Henry Miller Memorial Appeal.*

STATISTICS AT SQUARE ONE

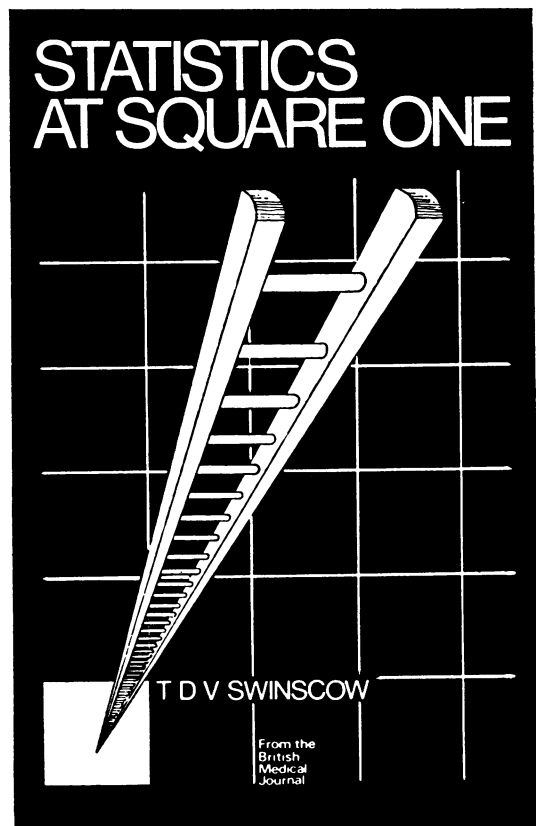

by T. D. V. SWINSCOW

from the British Medical Journal

The statistical testing of data is indispensable in many types of medical investigation and a help on countless occasions in clinical practice. This book provides step-by-step instruction. Subjects covered include standard deviation, χ^2 tests, t tests, non-parametric tests, and correlation. The book includes sections on Fisher's exact probability test and rank correlation not published in the *B.M.J.* series. Methods specially adapted to pocket calculators.

"The ability to put symbols in sequence may well be one of the greatest advances in man's development... This excellent and attractive volume will give you an idea into which category an article or projected article fits. The ink you save may be your own. It is superb value."
O'Donnell, Barry, *British Medical Journal*, 1977, 1, 451.

"... this gem of a practical booklet squeezes the essence of biostatistics into 75 well-written, well-organized pages. Newcomers to the field will like the way obscure concepts are clarified; experts will find the book valuable as a teaching aid."
de Jong, Rudolph H., *J.A.M.A.*, 1977, 237, 1874

PEDIATRIC RESEARCH

Volume 12, No. 9

September 1978

Contents

- Searching for Molecular Abnormalities in Genetic Disease by the Use of a Double Labeling Technique. I. Rationale, Techniques, and Initial Evaluation..... 887**
S. D. J. PENA AND K. WROGEMANN (Winnipeg, Manitoba, Canada, and London, United Kingdom)
A procedure, based on double labeling of normal and diseased fibroblast proteins followed by extensive fractionation and analysis, is presented for detection of protein defects in genetic diseases on the basis of structural rather than functional alterations.
- Searching for Molecular Abnormalities in Genetic Diseases by the Use of a Double Labeling Technique. II. Deficiency of a Basic Protein in Fibroblasts of Patients with Pompe's Disease... 894**
S. D. J. PENA, N. M. QUILLIAM, J. L. HAMERTON AND K. WROGEMANN (Winnipeg, Manitoba, Canada, and London, United Kingdom)
A double labeling technique was utilized to search for molecular defects in two fibroblast strains obtained from patients with Pompe's disease.
- The Effect of Iron Supplements and Blood Transfusion on Iron Absorption by Low Birth-weight Infants Fed Pasteurized Human Breast Milk 899**
M. J. DAUNCEY, C. G. DAVIES, J. C. L. SHAW, AND J. URMAN (London and Cambridge, England)
These studies were performed to determine how much iron was absorbed from pasteurized human breast milk by very low birthweight preterm infants to learn the effect of iron supplementation on the amount of iron absorbed, and to compare the amount of iron absorbed with the amount of *in utero* deposition by a fetus of equivalent gestational age.
- Identification of Small Cells in Fetal and Infant Adipose Tissue 905**
M. DUNLOP, J. M. COURT, J. M. HOBBS, AND T. J. C. BOULTON (Parkville, Victoria, Australia)
This study reports the separation, identification, and sizing of infant and fetal adipose tissue of small cells, which has been shown previously to contribute to the total cell content of adipose tissue in early life.
- The Growth and Development of Fat Cells in Infancy 908**
T. J. C. BOULTON, M. DUNLOP AND J. M. COURT (Parkville, Victoria, Australia)
This report provides further information on studies on adipose tissue from fetuses and normally nourished children, and the clinical correlations between the subjects and the sizes of cells containing fat in adipose tissue.
- Plasma Free Amino Acids in Normal Children and in Patients with Protein-Caloric Malnutrition: Fasting and Infection 912**
J. GHISOLFI, P. CHARLET, N. SER, R. SALVAYRE, J. P. THOUVENOT, AND C. DUOLE (Toulouse, France)
This study was undertaken to determine plasma free amino acid deviations in protein-caloric malnutrition relative to normal values and to determine the influence of fasting, infection, and enteropathy on plasma aminogram disorders.
- Effects of Phenobarbital on Seizure Activity in the Gerbil 918**
K. S. WATANABE, R. J. SCHAIN AND B. G. BAILEY (Los Angeles, California)
The present studies were performed to correlate anticonvulsant and biologic effects of phenobarbital and to determine the effects of administration of the drug to the Mongolian gerbil (*Meriones unguiculatus*), an animal predisposed to exhibit "spontaneous" seizures.
- Effects of Continuous Positive Airway Pressure after Oleic Acid-induced Lung Injury in Dogs 923**
A. B. OSHER, B. GOTHE, D. H. SIMMONS, B. WAYMOST, AND H. GREEN (Los Angeles, California)
The physiologic response to continuous positive airway pressure (CPAP) therapy was studied in dogs with oleic acid-induced respiratory distress syndrome. Although tissue oxygenation improved, hypoventilation occurred at higher levels of CPAP.
- Aspirin-induced Hemolysis: The Role of Concomitant Oxidant (H₂O₂) Challenge 927**
J. A. STOCKMAN III, B. LUBIN, AND F. A. OSKI (Syracuse, New York)
These studies were designed to evaluate the role of acetylsalicylic acid on normal, intact red blood cells at concentrations of salicylate which are readily achievable *in vivo*.
- Early Diagnosis of Hemoglobinopathies 932**
V. E. HEADINGS, S. I. O. ANYAIBE, S. P. BHATTACHARYA AND E. L. HOPKINS (Washington, DC)
This study presents an immunochemical approach to diagnosis of hemoglobin variants in the newborn infant by radial immunodiffusion and in the fetus by fluorescent cytoimmunodiffusion.
