

Lioresal[®]

Relieves spasticity due to

"... has become the agent of choice for the treatment of spinal spasticity..."¹

"... drug therapy for spinal spasticity has been revolutionised by baclofen (Lioresal)."¹

"... regarded by many as the drug of choice in the treatment of spasticity due to spinal cord lesions..."²

Now also indicated for

**Spasticity
associated with
cerebral palsy
and other
allied conditions**

C I B A

Packs

Lioresal is supplied as 10mg tablets of baclofen in packs of 100.

A new cutaneous pO_2 monitor from Kontron

This new technique is being used on an increasing scale to supplement blood gas analysis of high risk neonates by continuously monitoring and recording cutaneous pO_2 via a temperature-stable, non-invasive sensor.

Features of the new instrument include:

- ✱ Built in chart recorder
- ✱ Dual temperature setting for sensor $43^{\circ}C$ or $44^{\circ}C$
- ✱ Rapid response to changes in oxygen partial pressure
- ✱ Maximum/minimum alarm call

For demonstrations and full information about this Monitor, please complete the slip below and post to Kontron Instruments Limited, PO Box 88, St. Albans AL1 5JG, or telephone St. Albans (0727) 33221.

Please contact me to arrange a demonstration of the Kontron pO_2 Monitor*

Please send me further information about the pO_2 Monitor*

Simplicity itself

The Codman Shunt range, available only from Downs, has proved outstandingly popular with British surgeons. Here's why.

UNI-SHUNT*—the unique one piece shunt. Simple and easy to insert, it's one piece construction reduces the risk of infection and need for revision.

ACCU-FLO*—the guaranteed system which offers complete flexibility.

The Accu-Flo range of shunts offer the surgeon a complete system from which to choose. They are also guaranteed to function at the stated pressure. Renowned for their consistently high quality and low cost—up to 20% less than some competitive products—Accu-Flo shunts are also double sterile wrapped.

The whole range is available from stock, so there's no delay when ordering. For more details, fill in the coupon.

Bennett Air/Oxygen Mixer Delivers Accurate Oxygen Concentrations From 21% to 100%

The Bennett Air/Oxygen Mixer provides a reliable means of delivering precise oxygen concentrations for use with respiratory care equipment without prematching of inlet pressures. Infinitely adjustable oxygen concentrations can be delivered over a wide range of flows from 2-100 LPM at 50 PSI input. Accuracy is maintained within $\pm 2\%$ variation over a wide range of fluctuating flow rates and fluctuating inlet pressures. An adjustable alarm warns the operator if the pressure of either incoming source

gas drops below that indicated on the alarm setting. In the event of alarm, the mixer automatically switches output to the gas with the highest pressure and delivers only that gas. For more information, or a demonstration consult your nearest Puritan-Bennett distributor.

Puritan-Bennett, International Corp.

Atopic Allergy?

a hereditary predisposition?

"In children with a double parental history of atopic disease the incidence of such disease was higher than in children with a single such heredity in whom, however, the incidence was higher than in children without any parental history of atopic disease."

When history and examination are equivocal the use of IgE as a parameter for atopic allergy either for diagnostic or predictive purposes should be decisive.

Kjellman, N-I Max: Immunoglobulin E and Atopic Allergy in Children. Linköping University Medical Dissertations 36, 1976.

Furadantin Suspension

(nitrofurantoin)

To prevent lower urinary tract reinfection
in childhood

Furadantin Suspension, the only liquid form of nitrofurantoin, is recommended for recurrent U.T.I. in childhood because it is bactericidal and specific to the urinary tract, being active in both the urine and the renal medulla.

Furadantin Suspension is rapidly absorbed in the G.I. tract and does not cause changes in the gut flora.

when used prophylactically in susceptible individuals

Further information is available on request to the company.

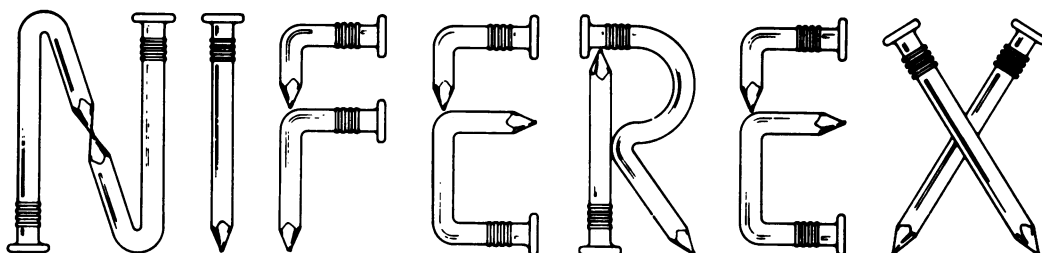

PL 0364/0010 PA-170/5/3

Furadantin is a registered trade mark.

PEDIATRIC RESEARCH

Volume 12, No. 7

July 1978

Contents

- Effects of Propranolol during Pregnancy and Development of Rats. I. Adverse Effects during Pregnancy** 747
N. SCHOENFELD, O. EPSTEIN, L. NEMESH, M. ROSEN, AND A. ATSMON (Petah Tiqva and Ramat Aviv, Israel)
A methodical investigation on the effects of propranolol in pregnant rats was initiated in view of previous laboratory findings and reports of small placentas and fetuses in women receiving propranolol during pregnancy.
- Influence of Exogenous Cortisol and Triglyceride Feeding on Glucose Homeostasis in the Fasted Newborn Rat** 751
P. FERRE, J. P. PEGORIER, R. ASSAN, E. B. MARLISS, AND J. GIRARD (Toronto, Ontario, Canada)
The effects of cortisol injection at birth and triglyceride feeding after birth were analysed in 16-hr-old fasted newborn rats.
- Effects of Diet and Weight Loss on Plasma Glucose, Insulin, and Free Fatty Acids in Obese Children** 757
I. DESCHAMPS, J. F. DESJEUX, S. MACHINOT, F. ROLLAND, AND H. LESTRADET (Paris, France)
Glucose, insulin, and free fatty acid changes were analysed in relation to weight loss after dieting in a sample of obese children.
- Cyclic Nucleotide Phosphodiesterase Activities of the Human Liver: Comparison between Control and Reye's Syndrome Samples** 761
E. S. KANG (Memphis, Tennessee)
Comparison of the cyclic nucleotide-degrading enzyme activities of liver from Reye's syndrome and control subjects revealed differences in K_m and specific activity of low affinity cAMP phosphodiesterase.
- The Relationship between Intracellular and Extracellular Potassium in Normal and Malnourished Subjects as Studied in Leukocytes** 767
J. PATRICK (Kingston, Jamaica, West Indies)
Studies of leukocyte potassium measured in malnourished children revealed different values in kwashiorkor and marasmus.
- Effects of Continuous Positive Airway Pressure on Pulmonary Function and Blood Gases of Infants with Respiratory Distress Syndrome** 771
C. P. RICHARDSON AND A. L. JUNG (Salt Lake City, Utah)
Lung volume, alveolar turnover rates, the distribution of ventilation, and arterial blood-gas measurements were made on 32 newborn infants with respiratory distress syndrome on continuous positive airway pressure.
- α_1 -Antitrypsin and α_1 -Acid Glycoprotein Levels in the Cord Blood and Amniotic Fluid of Infants with Respiratory Distress Syndrome** 775
S. K. LEE, D. W. THIBEAULT, AND D. C. HEINER (Torrance, California)
To determine whether there is a preferential decrease in α_1 -antitrypsin in the cord blood of infants with respiratory distress syndrome, these authors compared the reduction in the blood levels of α_1 -antitrypsin with that of a low molecular weight protein, α_1 -acid glycoprotein, which has no antiproteinase activity.
- Polygraphic Studies of Normal Infants and Infants at Risk for the Sudden Infant Death Syndrome: Heart Rate and Variability as a Function of State** 778
R. M. HARPER, B. LEAKE, T. HOPPENBROUWERS, M. B. STERMAN, D. J. MCGINTY, AND J. HODGMAN (Los Angeles California)
Results of this investigation indicate that there is a lag in the decline in heart rate between 1 and 3 months in infants at risk for the sudden infant death syndrome.
- Lymphocyte Subpopulations in Otitis Media with Effusion** 786
J. M. BERNSTEIN, C. SZYMANSKI, B. ALBINI, M. SUN, AND P. L. OGRA (Buffalo, New York)
These studies were performed to analyse the distribution and nature of immunocompetent cells in different forms of middle ear inflammation in an effort to establish guidelines for classification of otitis media with effusion.
- Selenium and Glutathione Peroxidase Activity in Maternal and Cord Plasma and Red Cells...** 789
N. RUDOLPH AND S. L. WONG (Brooklyn, New York)
In order to define the normal range of selenium levels and to evaluate whether any correlation exists in the human between selenium and glutathione (GSH) peroxidase activity, paired samples of maternal and cord erythrocytes and plasma, respectively, were assayed for selenium and for GSH peroxidase activity.
