

He might feel better if you played detectives.

The allergic component in the aetiology of childhood asthma is well recognised. Tracking down the specific offending allergens, however, is quite a detective job. Skin testing gives only a rough idea. Nasal and bronchial provocation tests can be difficult to interpret, risky or far too time consuming.

Phadebas RAST is the laboratory test that can eliminate a lot of suspects and identify the villains by revealing individual sensitivities reflected in high levels of specific IgE in the blood.

With Phadebas RAST, one ml of serum can give you a reliable profile of the most probable clinical sensitivities — a better guide to successful treatment.

Send off the coupon and examine the evidence.

Phadebas RAST® In-vitro test for atopic allergy.

- Send clinical information.
- Arrange for me to try the test.

IMPORTANT NEW BOOKS

Paediatric Cardiology Volume 2

Heart disease in the newborn

Edited by M. J. Godman and R. M. Marquis

1979 520 pages illustrated hardback £20.00

Contains information on research currently being done in centres in the USA, Canada, UK, Netherlands, Germany, France, Spain and Sweden. The emphasis is on problems occurring in the first 4 weeks of life.

Secretory Otitis Media and its Sequelae

Jacob Sadé

1979 334 pages illustrated hardback £19.50

Covers the research done within the last 20 years on one of the most important and prevalent of paediatric illnesses.

Aphasia, Alexia and Agraphia

D. Frank Benson

1979 320 pages illustrated hardback £13.00

A clinically orientated discourse on the neurogenically derived problems of language.

NEW EDITION

The Normal Child

Some problems of the early years and their treatment

Ronald S. Illingworth

1979 Seventh edition 368 pages illustrated hardback £8.00

FORTHCOMING PUBLICATION

The Orthopaedic Management of Spina Bifida Cystica

Malcolm B. Menelaus

1980 Second edition 304 pages approx. illustrated hardback £25.00 approx

Churchill Livingstone 

Robert Stevenson House, 1-3 Baxter's Place, Leith Walk, Edinburgh EH1 3AF

Current Paediatric Cardiology

**Elliot A. Shinebourne
and Robert H. Anderson**

Advances in the diagnosis and treatment of congenital heart disease have led to the situation where all but a small minority of anomalies can be successfully treated even in infancy. Because the subject has developed so rapidly there is a need for a concise up-to-date book suitable for paediatricians, cardiologists, and advanced students. Besides discussing individual anomalies the authors and invited experts review general topics related to congenital heart disease.

Taking blood oxygen measurement is as simple as this.

The Draeger oxymeter gives you simplicity with precision.

The vital job of obtaining blood oxygen measurements is a simple, straightforward procedure with the Draeger oxymeter.

It's entirely non-invasive and non-traumatic and there is no risk of blood infection or thrombosis.

It's simple. The electrode is attached to the skin, a few minutes allowed for warm-up, and the reading is available.

It's precise.

Several published papers attest to this.

And it's stable.

Precise measurement is maintained over long periods of use and response to pO_2 fluctuations is swift.

The Draeger oxymeter is a valuable aid in monitoring patients in neonatal and adult intensive care.

Its value will be more than apparent when you have read the literature and we'll be pleased to send you copies as soon as you ask.

PEDIATRIC RESEARCH

Volume 13, No. 9

September 1979

Contents

- The Zinc, Copper, Manganese, Vanadium, and Iodine Content of Hair from 38 Canadian Neonates** 000
R. S. GIBSON AND M. S. DEWOLFE (Halifax, Nova Scotia, Canada) This investigation was undertaken to establish "normal values" for the zinc, copper, manganese, vanadium, and iodine concentrations of hair in 38 full term neonates.
- Parathyroid Hormone Response in Newborn Infants during Exchange Transfusion with Blood Supplemented with Citrate and Phosphate: Effect of iv Calcium** 111
P. WIELAND, G. DUC, J. A. FISCHER, AND U. BINSWANGER (Zurich, Switzerland) The authors attempt to investigate parathyroid secretory function in newborn infants before, during, and after exchange transfusion and to assess whether iv calcium supplementation can prevent the decrease in serum ionized calcium as well as the prolongation of Q-oTc intervals during exchange transfusion with donor blood preserved in citrate and phosphate
- Protease Inhibitors in Human Milk** 222
T. LINDBERG (Malmö, Sweden) This investigation reports the occurrence, electrophoretic properties, and amounts of some protease inhibitors in human milk from birth to 4 months after delivery.
- Serum Concentration of 24, 25-Dihydroxyvitamin D in Normal Children and in Children with Rickets** 333
T. M. NGUYEN, H. GUILLOZO, M. GARABEDIAN, E. MALLET, AND S. BALSAN (Paris, France) This paper describes the method of 24, 25-(OH)₂D measurement in serum and reports the results obtained in normal children as compared with normal adults, in children with Vitamin D deficiency or Vitamin D-resistant rickets, and in one child intoxicated with ergocalciferol.
- Ketotic Episodes in Glutaryl-CoA Dehydrogenase Deficiency (Glutaric Aciduria)** 444
N. GREGERSEN AND N. J. BRANDT (Aarhus and Copenhagen, Denmark) The finding of metabolites derived from the catabolism of branched-chain amino acids and the fatty acid in urine samples from a patient with glutaryl-CoA dehydrogenase deficiency indicate an inhibition of acyl-CoA dehydrogenases in the patient.
- The Effect of Sleep State on Chest Distortion and on the Ventilatory Response to CO₂ in Neonates** 555
M. DAVI, K. SANKARAN, M. MACCALLUM, D. CATES, AND H. RIGATTO (Winnipeg, Manitoba, Canada) The prevalence of chest distortion and the ventilatory response to CO₂ was measured during non-REM and REM sleep in neonates.
- Effect of Cigarette Smoke Exposure on Maturation of the Antibody Response in Spleens of Newborn Mice** 666
H. B. HERSCOWITZ AND R. B. COOPER (Washington, D. C.) These results indicate that the maturation of the splenic antibody forming cell response in developing mice was significantly inhibiting as a consequence of exposure to cigarette smoke.
- The effect of Diazepam Upon the Development of Hypertension in the Spontaneously Hypertensive Rat** 777
R. M. SCHIEKEN (Iowa City, Iowa) This study describes the long-term antihypertensive effects of the chronic administration of diazepam to young spontaneously hypertensive rats (SHR).
- Effect of Hydrocortisone on the Metabolism of Phosphatidylcholine in Maternal and Fetal Rabbit Lungs and Livers** 888
F. H. C. TSAO, G. R. GUTCHER AND R. D. ZACHMAN (Madison, Wisconsin) This investigation was undertaken to examine the effects of antenatal maternal steroids on phosphatidylcholine (PC) metabolism in maternal lung and liver in comparison with effects on fetal PC metabolism.
- A Study of Inheritance in Progressive Intrahepatic Cholestasis: Hepatic Excretory Function in Unaffected Family Members** 999
P. BIDOT, D. R. LABRECQUE, Y. E. HSIA, AND C. C. A. RIELY (New Haven, Connecticut) In an attempt to identify the heterozygous state for PIC hepatic excretory function was studied in the parents and four second degree relatives of two brothers with PIC.

The Denver Peritoneo- venous Shunt

**For the effective
control of Ascites.**

The heart of the Denver System is a one-way silicone rubber valve which is contained in a soft pump body, also made of medical grade silicone rubber.

The construction allows the system to be pumped percutaneously, to confirm its post-operatively patency or to clean it of any obstruction which may enter the system.

- A choice of placement
- Minimal tissue reaction
- Four flow rates available
- One-piece construction
- X-ray markers

For full details just return the coupon.

**UNIVERSITY OF OTTAWA
SCHOOL OF MEDICINE
CHAIR OF PAEDIATRICS**

Applications are invited from suitably qualified candidates for the Chair of the Department of Paediatrics at the University of Ottawa, School of Medicine. The successful applicant will be jointly appointed as Head of the Department of Paediatrics at the Children's Hospital of Eastern Ontario.

Applications may be made in writing, to:

The Dean
School of Medicine
Faculty of Health Sciences
University of Ottawa
275 Nicholas Street
Ottawa, Ontario
Canada K1N 9A9

**UNIVERSITE D'OTTAWA
ECOLE DE MEDECINE
CHAIRE DE PEDIATRIE**

L'Université d'Ottawa est à la recherche d'un titulaire pour la chaire de pédiatrie et la direction du département de pédiatrie à l'Hôpital pour enfants de l'est de l'Ontario.

Les personnes intéressées doivent faire parvenir leur curriculum vitae sous pli confidentiel au:

Doyen
Ecole de médecine
Faculté des Sciences de la santé
Université d'Ottawa
275, rue Nicholas
Ottawa, Ontario
Canada K1N 9A9

Reduced Subscription Rates for Junior Hospital Doctors Residents and Interns...

Archives of Disease in Childhood

is available to junior hospital doctors in all parts of the world for a maximum of four consecutive years at **REDUCED Annual Subscription Rates.**

(Thereafter, or when reaching consultant status this special offer will no longer apply.) The following reduced rates are unchanged for the twelve issues published in 1980.

Inland £17.00

Overseas US\$40.00

(The full rates are: Inland £29.00; Overseas US\$70.00)

The opportunity to subscribe to this journal of international authority and repute at a substantially reduced subscription rate is one not to be missed by junior doctors seeking to specialise in paediatrics.

Please complete the adjacent order form and send for your subscription NOW.

Further order forms can be supplied on request.
