MODERN TOPICS IN PAEDIATRIC DERMATOLOGY

Julian Verbov

In this, the first British book solely devoted to paediatric dermatology, eminent physicians and paediatricians have combined to produce a concise, clear account of the more important skin conditions seen in paediatric practice. It is designed with the broadest scope for the widest audience. Numerous illustrations, detailed tables and copious references illuminate the text throughout.

SEPARATION AND SPECIAL CARE BABY UNITS, CDM No. 68

F.S.W. Brimblecombe, M.P.M. Richards & N.R.C. Robertson

This book thoroughly investigates the present admission policies to special care units; the effects of separating newborn babies from their families, the visiting patterns of parents and the handling of babies by the nursing staff. It emphasizes the need for humanitarianism in introducing technological change.

HAEMORRHAGE, ISCHAEMIA AND THE PERINATAL BRAIN, CDM No. 68/70

Karen E. Pape & J.S. Wigglesworth

This volume focuses on an area of major importance in perinatal medicine. The authors, who have both made significant contributions to the subject of cerebral haemorrhage in the newborn, put forward many new and previously unpublished ideas. A feature of the book is the chapter on the vascular anatomy of the developing brain, which contains extensive new and original work, illustrated in colour. Intended primarily for the paediatrician, it should also be of particular interest to pathologists, obstetricians and others concerned with perinatal care.

He might feel better if you played detectives.

The allergic component in the aetiology of childhood asthma is well recognised. Tracking down the specific offending allergens, however, is quite a detective job. Skin testing gives only a rough idea. Nasal and bronchial provocation tests can be difficult to interpret, risky or far too time consuming.

Phadebas RAST is the laboratory test that can eliminate a lot of suspects and identify the villains by revealing individual sensitivities reflected in high levels of specific IgE in the blood.

With Phadebas RAST, one ml of serum can give you a reliable profile of the most probable clinical sensitivities — a better guide to successful treatment.

Send off the coupon and examine the evidence.

Phadebas RAST® In-vitro test for atopic allergy.

- Send clinical information.
- Arrange for me to try the test.

THE HEINZ FELLOWSHIPS OF THE BRITISH PAEDIATRIC ASSOCIATION

H. J. Heinz Company Limited generously endows Fellowships in Paediatrics which the Nuffield Foundation administers in conjunction with the British Paediatric Association.

Two or three Fellowships will be offered each year, the number and type awarded in any one year depending on circumstances and the calibre of applicants available.

The types of Fellowship, which are open to men or women are:

- A To enable a paediatrician from any part of the Commonwealth overseas to spend up to twelve weeks in the United Kingdom, meeting British paediatricians and seeing something of their work. Preference will be given to those recently established in an academic career who can arrange their visit to allow attendance at the Annual General Meeting of the British Paediatric Association in April 1980.
- B Fellowship B scheme has been discontinued for the time being.
- C To enable a paediatrician from the United Kingdom of Senior Registrar or Consultant status, but in the early years of professional life, to make a short working visit (up to three months) to a centre in a developing country, teaching or conducting research so as to benefit both fellow and hosts.

Applications for these awards must be received by the Nuffield Foundation not later than 31st December 1979.

Applications for C Fellowships can be accepted up to 31st January 1980.

The conditions for the Fellowships and application forms may be obtained from the Director of the Nuffield Foundation, Nuffield Lodge, Regent's Park, London NW1 4RS.
