

# Simplicity itself

The Codman Shunt range, available only from Downs, has proved outstandingly popular with British surgeons. Here's why.

**UNI-SHUNT**—the unique one piece shunt.

Simple and easy to insert, it's one piece construction reduces the risk of infection and need for revision.

**ACCU-FLO**—the guaranteed system which offers complete flexibility.

The Accu-Flo range of shunts offer the surgeon a complete system from which to choose.

They are also guaranteed to function at the stated pressure. Renowned for their consistently high quality and low cost—up to 20% less than some competitive products—Accu-Flo shunts are also double sterile wrapped.

The whole range is available from stock, so there's no delay when ordering. For more details, fill in the coupon.

# Reduced Subscription Rates for Junior Hospital Doctors Residents and Interns...

from January 1 1979

## Archives of Disease in Childhood

will be available to junior doctors in all parts of the world for a maximum of four consecutive years at **REDUCED Annual Subscription Rates.** (Thereafter, or when reaching consultant status this special offer will no longer apply.) The following subscription rates apply for the twelve issues published in 1979.

**Inland £17.00**

**Overseas US\$40.00**

(The full rates are: Inland £28.00; Overseas US\$65.50)

*The opportunity to subscribe to this journal of international authority and repute at a substantially reduced subscription rate is one not to be missed by junior doctors seeking to specialise in paediatrics.*

*Please complete the adjacent order form and send for your subscription NOW.*

*Further order forms can be supplied on request.*

# CHARLES C THOMAS • PUBLISHER

---

**POISONING: Toxicology, Symptoms, Treatments (4th Ed.)** by Jay M. Arena. The entire spectrum of toxic compounds is considered. Recent treatment controversies and environmental contamination receive particular emphasis. '79, \$44.50

**HOME-BASED SERVICES FOR CHILDREN AND FAMILIES: Policy, Practice, and Research** edited by Sheila Maybanks and Marvin Bryce. Nineteen program descriptions outline a variety of home-based family services, with information on treatment techniques, utilization of volunteers, and funding and administrative processes. '79, \$18.00

**MEDICAL TERMINOLOGY FOR MEDICAL STUDENTS** by William Blake Tyrrell. This text not only considers word history and origin, but also provides instruction for translating Latin anatomical nomenclature. '79, cloth-\$14.50, paper-\$9.75

**APPLIED AUDIOLOGY FOR CHILDREN (2nd Ed., 4th Ptg.)** by D. M. C. Dale. The application of audiological theory to the everyday use of hearing aids by children is clearly explained. '79, \$9.00

**GOURMET FOOD ON A WHEAT-FREE DIET (4th Ptg.)** by Marion N. Wood. Concerned with the elimination of wheat, rye, barley, and oats from the diet, this book was prepared for the needs and demands of those people whose bodies cannot tolerate gluten-bearing grains. '79, \$8.75

**REFLEX TESTING METHODS FOR EVALUATING C.N.S. Development (2nd Ed., 7th Ptg.)** by Mary R. Fiorentino. The text provides information on the assessment, diagnosis, and treatment of patients with abnormal reflexive reactions. '78, \$10.00

**FOOD ALLERGY AND THE ALLERGIC PATIENT: A Simple Review of Problems Encountered by the Recently Diagnosed Patient (Rev. 2nd Ptg.)** by E. Louis Taube. The author outlines the fundamentals of cyclic, fixed, and masked food sensitization, classifies natural food according to food families, and discusses diet planning. '78, \$4.75, paper

**PHYSICIANS' HANDBOOK OF NUTRITIONAL SCIENCE (4th Ptg.)** by Roger J. Williams. Topics include basic principles of nutritional science, internal nutrition, prenatal nutrition, biochemical individuality, and environmental effects. '78, \$11.50

**EPIDEMIOLOGY FOR THE HEALTH SCIENCES: A Primer on Epidemiologic Concepts and Their Uses (4th Ptg.)** by Donald F. Austin and S. Benson Werner. This manual provides rapid understanding of epidemiologic concepts not possible with standard textbooks. '78, \$4.75, paper

**THE MALTREATED CHILD: The Maltreatment Syndrome in Children—A Medical, Legal and Social Guide (4th Ed.)** by Vincent J. Fontana and Douglas J. Besharov. This text discusses the nature, causes, and extent of child maltreatment and methods of prevention and intervention. '79, \$14.50

**MATERNAL NUTRITION AND CHILD HEALTH** by Douglas R. Shanklin and Jay Hodin. Evidence which establishes a direct relationship between the quality of nutrition during pregnancy and the pregnancy's success is developed. '79, \$14.75

**PRENATAL PATHOLOGY: Fetal Medicine** by T. V. N. Persaud. Topics include reproductive physiology; embryogenesis; maternal-fetal relationships; pathophysiology of the conceptus; fetal disorders; and the causes, intrauterine diagnosis, and management of congenital disorders. '79, \$23.00

**PRELEUKEMIC DISORDERS** by Lawrence Kass. The author discusses myeloblasts and acute myeloblastic leukemia, the similarities and dissimilarities of various preleukemic disorders, their clinical and hematologic aspects, and other related topics. '79, \$19.75

**CHILD PSYCHIATRY (4th Ed., 2nd Ptg.)** by Leo Kanner. The text discusses the history of child psychiatry, basic orientation, clinical considerations, and personality problems arising from physical, psychosomatic, and behavioral problems. '79, \$19.50

**HUMAN NUTRITION: Its Physiological, Medical and Social Aspects. A Series of Eighty-two Essays (3rd Ptg.)** by Jean Mayer. One of the most respected nutritionists of our time grapples with the scientific, administrative, and clinical aspects of nutrition and its relationship to health, poverty, war, and technology. '79, \$19.75

**A PICTORIAL HISTORY OF MEDICINE (5th Ptg.)** by Otto L. Bettmann. This well-illustrated history of medicine covers a time span which ranges from early Egyptian culture through civilizations of the Nineteenth Century. '79, \$14.50, paper

**INTRODUCTION TO MODERN PHOTOTHERAPY** by Leon Goldman. The author considers current laser light phototherapy, light art as therapy, transillumination, and the various therapeutic modalities that different portions of the electromagnetic spectrum can provide. '78, \$17.50

**MEDICAL WRITING: The Technic and the Art (4th Ed., 2nd Ptg.)** by Morris Fishbein. Offering a vast amount of technical advice, this text explains the steps one should follow in preparing a paper for various audiences in various situations. '78, \$11.50

## Topics in Paediatrics 1: Haematology and Oncology

P. H. Morris Jones, *Senior Lecturer in Child Health, University of Manchester.*

Reviews the epidemiology and advances in treatment of childhood malignancy. It points out the various pitfalls and discusses the problems of intensive therapy and their management. The psychosocial difficulties encountered by the patients and their families are dealt with in detail. New lines of treatment and some of the less common tumours are also reviewed. Finally the effects of therapy on growth and development and how the late sequelae can be handled are described.

Contents: The Epidemiology of Childhood Tumours – Cancer in Children – Presentation and Prognosis in Childhood Leukaemia – Molecular Phenotypes: A New Perspective on Diagnosis and Classification of Leukaemias – The Presentation, Management and Prognosis of Solid Tumours of Childhood – The Diagnosis and Management of Bone Tumours – The Management of Brain Tumours in Children – Hodgkin's Disease: Present Concepts and Advances in Management – Retinoblastoma – Modern Treatment – Supportive Care of Children with Cancer – Empirical Therapy in Febrile Granulocytopenic Patients – Growth and Hormonal Status of Children Treated for Malignant Disease – The Child's Response to the Stress of Serious Disease – Psychological and Social Problems in Families of Children with Leukaemia – The Parent's Reaction.

# PROBLEMS OF CHILDHOOD

While in paediatrics the spotlight has, perhaps, swung recently on to behavioural and psychological aspects of child development, much of the clinician's time is still spent with acute and chronic physical disorders. Both these aspects of medical problems in childhood were reviewed in a series of *BMJ* articles published early in 1976, and these have been collected together after further revision by their authors. We hope the collection will prove useful to doctors at all stages of their careers: for children occupy a great deal of the time of every general practitioner, and confidence in their care demands both experience and knowledge.

## He might feel better if you played detectives.

The allergic component in the aetiology of childhood asthma is well recognised. Tracking down the specific offending allergens, however, is quite a detective job. Skin testing gives only a rough idea. Nasal and bronchial provocation tests can be difficult to interpret, risky or far too time consuming.

Phadebas RAST is the laboratory test that can eliminate a lot of suspects and identify the villains by revealing individual sensitivities reflected in high levels of specific IgE in the blood.

With Phadebas RAST, one ml of serum can give you a reliable profile of the most probable clinical sensitivities — a better guide to successful treatment.

Send off the coupon and examine the evidence.

### **Phadebas RAST®** In-vitro test for atopic allergy.

- Send clinical information.

## Contents

- The Relationship of Amniotic Membrane 11-Oxidoreductase Activity to Lung Maturation in the Human Fetus** ..... 957  
A. K. TANSWELL AND B. T. SMITH (Kingston, Ontario, Canada)      The findings demonstrate that in pregnancies where the fetus is destined to develop respiratory distress syndrome after delivery, the amniotic membranes are defective in their ability to produce cortisol, resulting in a possible reduction in the amount of cortisol available to the fetal lung during maturation *in utero*.
- Cellular and Humoral Immunity in Cartilage-Hair Hypoplasia** ..... 961  
M. VIROLAINEN, E. SAVILAHTI, I. KAITILA, AND J. PERHEENTUPA (Helsinki, Finland)      In an unselected series of 28 subjects with cartilage-hair hypoplasia, almost all subjects had subnormal responses in tests of cellular immunity, although most of them had no apparent unusual susceptibility to infections. This feature was a more constant feature of the syndrome than the hair abnormality.
- Salivary Amylase in Cystic Fibrosis: A Marker of Disordered Autonomic Function** ..... 967  
G. P. DAVIDSON, A. KOHEIL, AND G. G. FORSTNER (Toronto, Ontario, Canada)      To determine whether an increased salivary isoenzyme activity might be present in cystic fibrosis, these scientists examined total serum amylase and isoenzyme patterns from a series of patients, including cystic fibrosis (CF) patients with and without steatorrhea, patients with exocrine pancreatic insufficiency without CF (Shwachman's syndrome), and a control group who had neither CF nor pancreatic insufficiency.
- The Effect of Racemic, D-Propranolol, L-Propranolol, and Practolol on the Response to Cold by the Newborn Rabbit** ..... 971  
I. DOBER, V. JASZAI, T. HEIM, AND R. D. G. MILNER (Pecs, Hungary, Toronto, Canada, and Sheffield, England)      In this investigation the newborn rabbit has been used as a model to investigate the effects of propranolol, the isomers of propranolol, and practolol on the response to cold exposure.
- Fetomaternal Potassium Relations in the Rat on the Twentieth Day of Gestation. II. Effects of Maternal Hypocalcemia** ..... 977  
A. G. FANTEL (Seattle, Washington)      A study of potassium homeostasis during maternal hypokalemia was undertaken in potassium-deficient rats on the 20th day of gestation.
- Plasma 25-Hydroxyvitamin D in Familial Hypercholesterolemic Children Receiving Colestipol Resin** ..... 980  
R. C. TSANG, M. S. ROGINSKY, M. J. MELLIES, AND C. J. GLUECK (Cincinnati, Ohio)      The effects of colestipol, a new synthetic organic bile sequestrant polymer (U26-597A), on vitamin D metabolism have been assessed in children with familial hypercholesterolemia over a 2-year period.
- Pulmonary Diffusing Capacity in Lambs During the Early Neonatal Period** ..... 983  
J. M. BISSONNETTE, W. H. DRUMMOND, W. K. WICKHAM, AND J. Z. CRONAN (Portland, Oregon)      When a rebreathing method to measure pulmonary diffusing capacity in neonatal lambs was employed, a significant increase in diffusing capacity was found to take place in the first day of life.
- Distortions in Fetal Growth Standards** ..... 987  
R. L. NAEYE AND J. B. DIXON (Hershey, Pennsylvania)      The findings of the present studies indicate that widely used fetal growth standards appear to include measurements from both growth-retarded neonates and from neonates older than their calculated gestational ages.
- Maturation of *p*-Aminohippuric Acid Transport in the Developing Rabbit Kidney: Interrelationships of the Individual Components** ..... 992  
B. R. COLE, J. T. BROCKLEBANK, R. G. CAPPS, B. N. MURRAY, AND A. M. ROBSON (St. Louis, Missouri)      This investigation was undertaken to examine systematically the contribution of the individual cellular mechanisms to the reduction on aryl acid excretion in the immature rabbit kidney with *p*-aminohippuric acid being used as the test aryl acid.
- Abnormal Colonization of Neonates in an Intensive Care Unit: Means of Identifying Neonates at Risk of Infection** ..... 998  
K. SPRUNT, G. LEIDY, AND W. REDMAN (New York, New York)      Results of these studies indicate that serial throat cultures permit selection of the group of Intensive Care Unit neonates at greatest risk of infection and indicate the probable organism from which they are at risk.
