

The Denver Peritoneo- venous Shunt

**For the effective
control of Ascites.**

The heart of the Denver System is a one-way silicone rubber valve which is contained in a soft pump body, also made of medical grade silicone rubber.

The construction allows the system to be pumped percutaneously, to confirm its post-operatively patency or to clean it of any obstruction which may enter the system.

- A choice of placement
- Minimal tissue reaction
- Four flow rates available
- One-piece construction
- X-ray markers

For full details just return the coupon.

Downs Surgical

**DEPARTMENT OF PEDIATRICS
UNIVERSITY OF GARYOUNIS
BENGHAZI, LIBYA**

FACULTY MEMBERS

(Lecturer, Assistant Professor, Associate Professor, Professor)

OPPORTUNITIES FOR RESEARCH FUNDING

Excellent opportunities for qualified candidates now exist in one of the most progressive and well-equipped university hospitals. Applications are currently being considered in the following subspecialties:

Pediatric Hematology	Neonatology
Pediatric Endocrinology	Oncology
Pediatric Nephrology	Pediatric Infectious Diseases
Ambulatory Pediatrics	Pediatric Cardiology
Pediatric Neurology	Pediatric Allergy/Immunology
Handicapped Children	Adolescent Medicine
General Pediatrics	

Selected applicants will be offered initial contracts of two to four years following completion of a one-year trial period. Applicants who qualify for interview will be sent full details of salaries, bonuses, travel and housing allowances. Additional allowances are made for staff members' wives and families who join them in Benghazi. Applicants should have M.R.C.P. (British), American Board of Pediatrics or equivalent. Curriculum vitae and applications should be sent to the attention of Dr. Abdelaziz Elzouki, Department of Pediatrics, Faculty of Medicine, Garyounis University, Benghazi, Libya (S.P.L.A.J.).

HOW TO DO IT

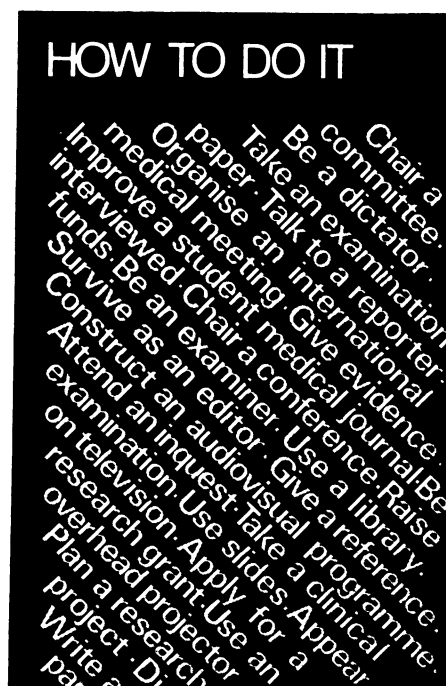

Every doctor knows the sinking sensation induced by waiting one's turn for an examination viva and the social anxieties of changing jobs. The misery of first night nerves does not, however, disappear with time: each decade brings new challenges. On these occasions—chairing a committee, giving evidence in court, appearing on television—practical tips can be enormously helpful. The same is true of the many skills not taught in medical school—how to lecture, referee papers, edit, or use a library. All these and many more nuggets of down-to-earth advice have been collected from past issues of the *BMJ* to form a compendium for the novice—whatever his or her age or seniority.

Price: Inland £4.00;

Look, no cut-backs!

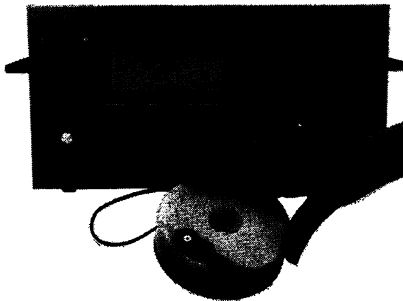

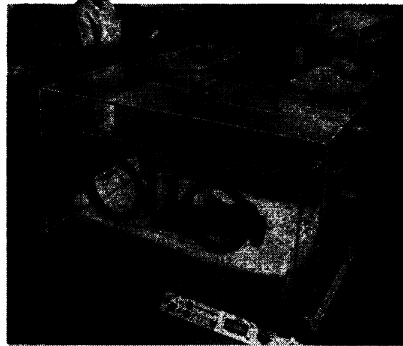

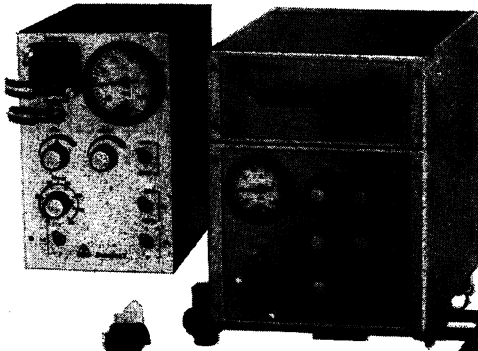

Use the new Draeger leasing plan and get the equipment you want now without touching your Capital Allocation.

It's as if there haven't been any cut-backs or investment restraints.

Through the new Draeger leasing plan, you can go ahead and modernise without even going near your Capital Allocation funds.

Leasing payments are counted as running costs, not capital spending, so there is no drain on funds set aside for purchasing equipment.

If you've been waiting your turn in the budget queue, why not consider the waiting to be over?

Use the Draeger leasing plan to modernise now, with any of the following Draeger equipment:-

- Incubators for the SCBU and transport.
- Babytherm intensive care crib.
- UV1 long-term ventilator for children and adults.
- Babylog neonatal ventilators for the SCBU and transport.
- Vapor 19 vaporisers for halothane and enflurane.
- Washing, drying and disinfecting equipment.

Re-open your equipment shopping list now. Contact us for full details of the Draeger leasing plan.

PEDIATRIC RESEARCH

Volume 14, No. 2

February 1980

Contents

Editorial	000
Joseph A. Bellanti	
A Review. CF at Forty-Quo Vadis?	000
P. B. DAVIS AND P. A. DI SANT'AGNESE (Bethesda, Maryland)	A selective literature review of cystic fibrosis is presented.
Comparative Study of X-Ray and UV Induced Cytotoxicity, DNA Repair and Mutagenesis in Down Syndrome and Normal Fibroblasts	000
L. P. YOTTI, T. W. GLOVER, J. E. TROSKO, AND D. J. SEGAL (East Lansing, Michigan and Edmonton, Alberta, Canada)	Normal and Down Syndrome fibroblasts were found to react similarly to each of three experiments testing the effect of radiation on their colony forming ability, DNA synthesis and induced mutation to 6-thioguanine resistance.
Serum Prolactin and Respiratory Distress Syndrome in the Newborn	000
Y. F. SMITH, D. K. MULLON, M. HAMOSH, J. W. SCANLON, AND P. HAMOSH (Washington, D.C.)	The data presented in this article demonstrate a correlation between low fetal serum prolactin and the development of Respiratory Distress Syndrome in the newborn.
Glucose Metabolism of Human Mononuclear Cell Subpopulations	000
S. STORCH, W. KLEIN, AND S. A. FEIG (Los Angeles, California)	To determine the metabolism of mononuclear cell subpopulations, the authors measured the glycolytic metabolism of relatively enriched T cells, non-T mononuclear cells, non-T lymphocytes and monocytes.
Ontogeny of the Renin-Angiotensin-Aldosterone System in the Fetal and Newborn Lamb ...	000
S. R. SIEGAL AND D. A. FISHER (Torrance, California)	This study measures the responsiveness of the renin-angiotensin system and plasma aldosterone levels upon acute furosemide infusion into fetal and newborn lambs.
Fetal and Maternal Hormonal Response to Starvation in the Ewe	000
R. L. SCHREINER, P. A. NOLEN, P. W. BONDERMAN, H. C. MOOREHEAD, E. L. GRESHAM, J. A. LEMONS, AND M. B. ESCOBEDO (Indianapolis, Indiana)	Correlations and comparisons are made of plasma glucose, fructose, insulin and glucagon in pregnant ewes and their fetuses before and after maternal fastings.
Cystinuria: Absence of Lysine Permeability at the Brush Border Membrane of Intestinal Cells	000
L. COICADAN, M. HEYMAN, E. GRASSET, AND J.-F. DESJEUX (Paris, France)	This <i>in vitro</i> study assesses the Na ⁺ dependent L-lysine epithelial transport across the enterocyte brush border membrane of normal and cystinuric patients.
Removal of Cholesterol from Blood by Affinity Binding to Heparin-Agarose: Evaluation on Treatment in Homozygous Familial Hypercholesterolemia	000
P.-J. LUPIEN, S. MOORJANI, M. LOU, D. BRUN, AND C. GAUGE (Ste-Foy, Quebec, Canada)	A decreased plasma cholesterol "steady state" is reported upon chronic extracorporeal treatment in two patients with homozygous familial hypercholesterolemia.
Diamine Oxidase Activity in Fibroblasts from Normal and Cystic Fibrosis Patients	000
W. A. GAHL AND H. C. PITOT (Madison, Wisconsin)	Using putrescine as substrate, diamine oxidase activity in homogenates of <i>in vitro</i> cultured human fibroblasts is compared between normal humans and cystic fibrosis patients.
Steroid and Growth Hormone Levels in Premature Infants After Prenatal Betamethasone Therapy to Prevent Respiratory Distress Syndrome	000
P. L. BALLARD, P. D. GLUCKMAN, G. C. LIGGINS, S. L. KAPLAN, AND M. M. GRUMBACH (San Francisco, California and Auckland, New Zealand)	The present study reports that betamethasone therapy causes a transient suppression of adrenal steroids and growth hormone in the fetal circulation but does not interfere with the newborn infant's adrenocortical response to stress.
