

ARCHIVES OF DISEASE IN CHILDHOOD.

1933

EDITED BY

HUGH THURSFIELD, D.M., F.R.C.P., and REGINALD MILLER, M.D., F.R.C.P.

WITH THE HELP OF

H. C. CAMBRON, M.D., F.R.C.P.

C. MAX PAGE, D.S.O., M.S., F.R.C.S.

H. A. T. FAIRBANK, D.S.O., M.S., F.R.C.S.

LEONARD G. PARSONS, M.D., F.R.C.P.

LEONARD FINDLAY, D.Sc., M.D.

G. F. STILL, M.D., F.R.C.P.

A. DINGWALL FORDYCE, M.D., F.R.C.P. EDIN.

EDITOR OF THE *British Medical Journal*.

Vol. 8.

AUGUST, 1933.

No. 46.

CONTENTS

PAGE

æmia in Childhood.

Part VI. Nutritional anæmia in mother and child. By A. V. Neale, M.D.,
M.R.C.P., and J. C. Hawksley, M.D., M.R.C.P. 227

Part VII. Monocytic reaction in myelosis. By Robert Gittins, M.D., M.R.C.P.,
D.T.M. & H., and J. C. Hawksley, M.D., M.R.C.P. 241

Factors causing variation in the hæmoglobin level with age in the first year
of life. By Helen M. M. Mackay, M.D., M.R.C.P. 251

Infantile Rickets associated with parathyroid hyperplasia. By F. S. Langmead,
M.D., F.R.C.P., and J. W. Orr, M.D., B.Sc. 265

On the occurrence of sex-linked variations in twins. By C. E. Kellett, M.D.,
M.R.C.P. 279

ISSUED BY THE BRITISH MEDICAL ASSOCIATION.

NOTICE TO SUBSCRIBERS.

Subscriptions are payable to the Financial Manager of the British Medical Association who has charge of all financial matters concerning the ARCHIVES OF DISEASE IN CHILDHOOD. Address: British Medical Association House, Tavistock Square, London, W.C. 1.

NOTICE TO CONTRIBUTORS.

All papers submitted for publication should be sent to Dr. Reginald Miller, 110, Harley Street, W. 1. All other editorial matters should be referred to Dr. Hugh Thursfield, 84, Wimpole Street, W. 1.

Papers sent for publication should be typewritten. Illustrations will usually be inserted in the text itself, and care should be taken that the text is marked to show the desired position of each illustration.

Charts and curves accompanying papers should be carefully drawn, on tracing linen. Any lettering on these drawings should be lightly inserted in pencil.

Contributors will receive one proof in page, but it is assumed that all but verbal corrections have been made in the original manuscript; an allowance at the rate of ten shillings per sheet of sixteen pages is made for alterations in the proof (printer's errors excepted), and contributors will be responsible for any excess.

Contributors will be supplied with reprints of their articles at cost price if application is made when returning proofs. An estimate of costs will be given if desired on application to the Financial Manager of the British Medical Association.

Papers which have been published become the property of the ARCHIVES and permission to republish must be obtained from the Editors.

SCIENCE AND THE BRITISH MEDICAL ASSOCIATION.

The first of the two chief objects set out in the Memorandum of Association of the British Medical Association is the promotion of the medical and allied sciences, and it may fairly be said that pursuit of the second, namely the maintenance of the honour and interests of the medical profession, is directly contributory to the attainment of the first. In the financial year 1928-29, according to an analysis made by the Treasurer of the Association in reply to a question at the Annual Representative Meeting, the sum of £35,000 was spent directly and exclusively on the advancement of science, a sum which, when the necessary addition has been made in respect of a proportion of the expenses of the maintenance of the House and staff of the Association, amounts to half of its total income for the period under review.

Foremost amongst the Association's scientific activities is the publication of the BRITISH MEDICAL JOURNAL with a weekly circulation of 38,000 copies. The JOURNAL serves as a comprehensive record of current developments and a forum for discussion in every field of medical science and professional organisation in this country, and includes in its Epitome of Current Medical Literature English abstracts of contemporary foreign work. The Association also publishes, in its JOURNAL OF NEUROLOGY AND PSYCHOPATHOLOGY, a quarterly review of current thought on the subjects with which it is concerned, including abstracts from foreign and American literature. Apart from its periodical publications, the Association from time to time undertakes investigations, whether through specially appointed bodies or by the promotion of collective research, and publishes reports on the results obtained. Recent examples of such reports are those on psycho-analysis, on tests for drunkenness, and on mental deficiency, treatment of varicose ulceration, after-history of gastro-enterostomy, incidence of cancer and its history after treatment, and the causation and treatment of arthritis. The reports already published can be obtained on application to the Financial Secretary and Business Manager. Notices of investigations actually in progress are published from time to time in the BRITISH MEDICAL JOURNAL.

In the organisation of the Scientific Sections at its Annual Meetings, the Association provides an unrivalled opportunity for discussion of new methods and old difficulties, not only within the confines of small groups of specialists but between specialists and the main body of the profession. British Medical Association Lectures in the Divisions afford another means of contact between the specialist and the general practitioner, and the regular clinical meetings and discussions arranged by many of the Divisions and Branches are an outstanding feature of local organisation.

For many years the Association has offered Scholarships and Grants to enable approved workers to prosecute research in subjects of their own choice. Besides these annual grants, a number of special Prizes are awarded by the Association, e.g., the Stewart Prize for work on epidemic disease, the Middlemore Prize for work on a prescribed subject in some department of ophthalmic medicine or surgery, the Katherine Bishop Harman Prize for research in the disorders incident to maternity. These prizes are awarded periodically and notice of impending awards is published in the BRITISH MEDICAL JOURNAL and elsewhere. In addition, the Association awards annually a prize for systematic observation, research and record in general practice. The Association also offers prizes for clinical papers on prescribed subjects by senior medical students and newly-qualified practitioners. Particulars of all Prizes, Scholarships and Grants may be obtained on application to the Medical Secretary of the Association.

Members are entitled to use the Reading Room at the House of the Association with its files of periodical medical literature, British and foreign, the Reference Library, and the Circulating Library. The Librarian is always ready to answer enquiries by Members, whether personal or postal, and to supply references.
