

## Correction

---

Gill PJ, Goldacre MJ, Mant D, *et al.* Increase in emergency admissions to hospital for children aged under 15 in England, 1999–2010: national database analysis (*Arch Dis Child* 2013;98:328–34). A numeric error was introduced by the journal's production team. In the Results, it reads: "The total number of admissions for primary-care-sensitive conditions rose 18% (from 172532 to 335038; from 19 to 23 per 1000)." The numbers in bold are incorrect. The correct sentence and numbers should be as follows: "The total number of admissions for primary-care-sensitive conditions rose 18% (from 178043 to 209898; from 19 to 23 per 1000)." We would like to apologise to the authors for this mistake.

*Arch Dis Child* 2013;98:651.
