Paediatric IBD COVID-19 survey

Paediatric IBD COVID-19 survey

Southampton Children's Hospital, in collaboration with the BSPGHAN IBD working group, are aiming to compile the current UK picture on treatment and diagnosis of paediatric patients with IBD. We are not collecting patient identifiable data. This data will be used to report overall practice and aid with planning response/resourcing in the next stages of the pandemic.

We are collecting data for the month of *April 2020* only.

Please complete this form only reflecting the situation in your centre for *April 2020*.

* Required

1. Email address *

IBD centre and person completing survey

2. Hospital Name *

06/05/2020

Paediatric IBD COVID-19 survey

3. Full name of person reporting data *

Facilities available

4. Are you able to physically review IBD patients and potential new diagnosis of IBD? *

Mark only one oval.

- Yes- no difference to pre-COVID
- Yes- but reduced compared to pre-COVID
- No ability to review patients
- Other: _____

5. Are you able to review known IBD patients via webcam? *

Mark only one oval.

- Yes
- No
- Other: _____

6. Are you able to review known IBD patients via phone? *

Mark only one oval.

- Yes
- No
- Other: _____

7. What percentage of IBD follow ups have your centre been able to continue using phone/webcam or face to face (estimated)? *

06/05/2020

Paediatric IBD COVID-19 survey

8. Will this change your unit's practice to include more phone/webcam reviews once COVID-19 restrictions have lifted? *

Mark only one oval.

- Yes
- No
- Other: _____

9. What percentage of appointments do you expect to change, or would consider changing to phone/webcam? *

Mark only one oval.

- 10%
- 20%
- 30%
- 40%
- 50%
- 60%
- 70%
- 80%
- 90%
- 100%
- Other: _____

10. Do you have access to routine endoscopy for IBD patients? *

Mark only one oval.

- Yes
- No
- Other: _____

06/05/2020

Paediatric IBD COVID-19 survey

11. Do you have access to urgent (emergency) endoscopy for IBD patients? *

Mark only one oval.

- Yes
- No
- Other: _____

12. What are the indications within your centre allowing urgent (emergency) endoscopy in IBD? Please select all that apply *

Check all that apply.

- Diagnosis of new IBD patients
- Patients with acute disease flares
- Other: _____

13. Considering urgent (emergency) endoscopy only, how many IBD cases have undergone endoscopy during April? *

14. Do you have access to faecal calprotectin? *

Mark only one oval.

- Yes
- No
- Other: _____

06/05/2020

Paediatric IBD COVID-19 survey

15. Do your referring district general hospitals have access to calprotectin? *

Mark only one oval.

- Yes
- No
- Some do, some don't
- Don't know
- Other: _____

16. Do you have access to ultrasound? *

Mark only one oval.

- Yes
- No
- Other: _____

17. Do your referring district general hospitals have access to ultrasound? *

Mark only one oval.

- Yes
- No
- Some do, some don't
- Don't know
- Other: _____

18. Do you have access to MRI? *

Mark only one oval.

- Yes
- No
- Other: _____

06/05/2020

Paediatric IBD COVID-19 survey

19. Do your referring district general hospitals have access to MRI? *

Mark only one oval.

- Yes
- No
- Some do, some don't
- Don't know
- Other: _____

Newly diagnosed patients- with endoscopy and histology

20. How many children/young people have you diagnosed with confirmed IBD (with endoscopy/histology) since restriction of services? *

Newly diagnosed patients- no endoscopy or histology

21. How many children/young people have you diagnosed with presumed IBD (without endoscopy/histology) since restriction of services? If 0 patients move to section 6 *

22. In your opinion, how many presented with moderate-severe disease (equivalent to PCDAI >30, or PUCAI > 30)?

23. Of those children/young people diagnosed with presumed IBD (without endoscopy/histology) since restriction of services, how many have presumed Crohn's disease?

06/05/2020

Paediatric IBD COVID-19 survey

24. Of those children/young people diagnosed with presumed IBD (without endoscopy/histology) since restriction of services, how many have presumed ulcerative colitis?

25. How many presumed newly diagnosed children have you started on exclusive enteral nutrition?

26. How many presumed newly diagnosed children have you started on oral steroids?

27. How many presumed newly diagnosed children have you started on intravenous steroids?

28. How many presumed newly diagnosed children have you started on oral 5-ASA?

29. How many presumed newly diagnosed children have you started on topical 5-ASA?

30. How many presumed newly diagnosed children have you started on anti-TNF therapy?

06/05/2020

Paediatric IBD COVID-19 survey

31. Is there any additional information regarding newly diagnosed presumed patients that would be useful to report (non-patient identifiable)?

Support services available during COVID-19 pandemic

We are interested in changes during COVID-19

32. Do you have continued access to day-case procedures (select all that you have access to)? *

Check all that apply.

- Biologic infusions
 Intravenous iron infusions
 We did not have these services before COVID-19

Other: _____

33. Do you have access to IBD surgery if required? *

Check all that apply.

- Intestinal surgery
 Perianal surgery/seton insertion
 We did not have these services before COVID-19

Other: _____

34. Have any IBD surgeries taken place during the pandemic? *

06/05/2020

Paediatric IBD COVID-19 survey

35. Which IBD operations have been performed during the pandemic? *

Check all that apply.

- Perianal procedures
 Subtotal colectomy
 Right hemicolectomy
 None

Other: _____

36. Have you retained nurse specialist support for IBD patients? *

Mark only one oval.

- Yes
 No
 We did not have these services before COVID-19
 Other: _____

37. Have you retained dietetic support for IBD patients? *

Mark only one oval.

- Yes
 No
 We did not have these services before COVID-19
 Other: _____

38. Have you retained psychological support for IBD patients? *

Mark only one oval.

- Yes
 No
 We did not have these services before COVID-19
 Other: _____

06/05/2020

Paediatric IBD COVID-19 survey

Established IBD patients

39. Considering maintenance therapy, do you have patients on the following medications? Please select all that are appropriate.

Check all that apply.

- Thiopurines
 Anti-TNF therapy
 Methotrexate
 Ustekinumab
 Vedolizumab

Other: _____

40. Considering maintenance therapy, which of the following medications have you continued as normal (same as before COVID-19)? Please select all that are appropriate.

Check all that apply.

- Thiopurines
 Anti-TNF therapy
 Methotrexate
 Ustekinumab
 Vedolizumab

Other: _____

41. Considering blood monitoring for maintenance therapy, have you been able to continue routine monitoring?

Check all that apply.

- Continued in hospital
 Community blood testing
 Unable to continue monitoring

Other: _____

06/05/2020

Paediatric IBD COVID-19 survey

42. How many patients have been switched to subcutaneous biologic therapy due to COVID-19? *

43. How many IBD patients been infected with confirmed SAR-CoV-2? *

44. If patients have been infected please provide details including hospitalisation and if therapy was stopped
