Supplementary Figure 2: Flow diagram of study stages

1. Review of literature, observational data and consultation with paediatric infectious disease clinicians to identify potential attributes and levels

2. Parents invited to take part in focus-group discussions (n=50)

3. Parents declined to take part (n=10)

4. Parents take part in focus-group discussions and complete coin-ranking exercise (n=40)

5. Attributes and levels for DCE confirmed

6. DCE pilot to test interpretation and understanding (n=10)

7. Attributes, levels and design of DCE finalised

8. Parents invited to take part in DCE (n=104)

9. Declined to take part (n=4)

10. Parents participating in DCE (n=100)

11. Did not complete DCE (n=2)

12. Parents completing DCE (n=98)

13. HCPs invited to take part in DCE (n=110)

14. Declined to take part (n=1)

15. HCPs participating in DCE (n=109)

16. HCPs completing DCE (n=108)
